

BUTTER MART REGAINS LAST WEEK'S LOSS

Portland, Dec. 13 (AP)—Advance of 4 cent pound in the price of prime first cube butter during the late session of the produce exchange, reflected weather conditions more than anything else. The advance simply took care of the loss of a similar amount during the closing session of last week.

Market for butter is naturally showing more strength all along the coast as a result of the record cold snap, which has invaded the so-called non-winter state to the south with heavy snowfall even on the desert.

As yet there is no appreciable decrease in the supply of butter and churning operations here continue much the same as last week but decrease is sure to follow, at least for a time.

Butterfat values continue mixed but mostly either at the high point or within a fraction of it.

Steadiness is generally reflected in the egg market with no general change in some price cuts. A recent days have come up to the open values listed by the Pacific co-ops.

Fairly steady tone is showing in the market for cheese but general prices were unchanged. There is however little price shading reflected at any point.

Continued steadiness is reflected for live chickens with the exception of springers, which remain slow. Ducks are quoted nominally. Live geese are quoted in a limited way 8 cents pound.

Nothing but a waiting attitude is showing for potatoes in the local jobbing trade. No local shipments of consequence have been made in carloads for some time because of the absence of offerings.

Prices in the onion market reflect the freezing weather which makes it impossible to take stock out of most warehouses. Local supplies are scant and while there is only a small call, sales are being made to retailers around a dime advance.

Fractional price advance has followed the betterment in demand for country killed calves. Sales are reported up to 7 cents pound for extreme tops.

Very slow trading tone is showing for country killed lambs as a direct result of the recent boosting of the price to a dime a pound. All sorts are moving slowly. Hog market is firm to higher along the coast.

A small supply of California green peppers is offering 15 cents pound.

A carload of Texas grapefruit, the first for an extended period, is offering 55 cents case.

Delay in shipment will cause the first carload of mixed California vegetables to arrive here Thursday.

Dried bean market is more active with prices inclined to firm. Eastern cranberries are firmer here but at unchanged prices.
