A pretty story is told of how John C. Fremont informed his wife of the Joyful news of his election as senator of California in 1850. The balloting of the delegates took place in San Jose, and of Manila Bay bearing many wounded saloons aprang up like mushrooms at inexplicable phenomena connected with Mrs. Fremont was at Monterey, and as a season of heavy rains was on there was but little prospect that her keen desire to know the result would find Immediate gratification. Before a blazing fire that night sat Fremont's wife, her fingers for the first time fashioning a dress for herself on the trustworthy outlines of one that had been ripped up for the purpose. Her little daughter had been put to bed, and her companions for the evening were the Australian woman who had replaced her two Indian servitors and her baby playing

on the bearskin rug near the fire. Besides the voice of the woman and an occasional chirrup from the baby she heard nothing but the storm with out till the door opened and a man, dripping with rain, stood on the thresh old and asked in consideration of his sorry plight if he might enter. It was He had torn himself away from his idolizing followers and ridden out into the darkness and storm to tell his wife, 70 miles away, that he had been elected to the United States senate. Though it was late in the night when he reached Monterey, he was in the saddle again before dawn and on his way back to San Jose, making in all a ride of 140 miles. - Argonaut.

The Red Flag.

The red button and the red flag bave been the emblem of labor and revolution for more than 3,000 years. In the nuclent world the favorite colors of the aristocracy were white and azure blue, while red was plebelan. Minerva and culture, were always represented as dressed in flaming red, and the banners of the Greek and Roman trade unions were of the same color. The red flag nowhere in antiquity meant feroeity and slaughter, but rather typified the fact that all men, whether slaves or masters, had in their veins the same blood and in their nature the same bumanity.

But in the frequent servile wars of Italy and Greece the red flag gradually became the emblem not of labor, but of revolt. At one time when the rebellious slaves and gladiators under Spar tacus defeated three Roman armies the red flag was on the point of supplanting the eagle in the imperial city itself. It is related that the labor soldiers were so fanatically devoted to their flag that it was the custom of their generals when is battle to hurl it far into the enemy's ranks and so compel its devotees to rush forward and recover it.-New York Post.

A Bad Judge.

Some years ago King Edward VII. then Prince of Wales, was a guest at a country house in England, and, picking up a sporting paper in the billiard room one morning, was soon deep in its contents. A elergyman, also a guest, noticed this, and, sidling up, asked in a tone that was meant to interested in that paper?"

The prince glanced around. "I never read anything I do not feel interested in," he remarked.

The clergyman, though, would not be highness, that one of my friends has fate of some of the soldiers. They have

"Well," said the prince as he turned to another column. "he must have been a very bad judge of horseffest."

"Save Me From My Friends."

This saying is commonly attributed tered by professions of insincere friend ship said, "I pray God to deliver me from my friends; I will defend myself from my enemies.

The thought, however, is attributed by the French to Marshal Villars while Kant discovers it in an Italian fled form. Antigonus, one of the generals of Alexander the Great, offered sacrifice that the gods might protect him from his friends and at the same time declaring he could look after his enemies himself. Churchill has some thing of the idea in the lines:

Greatly his form he dreads, but must his trickle. He burts the must who laxishly commonsten

The Rector's Prophecy

A party of gentlemen, including Pro feasor Bailey and Rector Roberts, a divine widely celebrated for his wit and the audacity of his puns, were crossing the campus of a well known university.

The reverend gentleman, comment ing on the fact of his recent elevation to the greater dignity and the assump tion of the more resounding title : canon of the church, exclaimed, "And now that I am a canon I suppose I shall be a bigger bore than ever.

The Manufacture of Plate Glass. The casting table of a plate glass far tory is about 20 feet long. 15 feet wide and 6 inches thick. Strips of from up each side afford a bearing for the roll

ers and determine the thickness of the plate to be cast. The molten glass is poured on the table, and the roller passing from end to end spreads the glass to a uniform thickness. The glass, after cooling rapidly, is transfer red to the annealing oven, where it remains several days. When taken out. it is very rough and uneven and to that state is used for skylights and other rather than transparency. The greater part of the glass, however, is ground.

aboard who insisted upon coming home sank, the spark of life seemed to die out, matter. and then a determined will-power would fan the little, feeble spark of life into renewed effort. Something was on his mind and he tossed uneasity and brooded over it until one day when his life current seemed at its lowest abb he called for an officer and took him into his confidence. He had saved \$700 and when he died he wanted the entire amount turned over to Miss Helen Gould, to be used for the benefit of sick and destitute soldiers. He said he knew what a friend she was to the boys in blue, and that she would see that ! went for the purpose it was intended Ceres, the goddesses of labor and agri- If he gave it in care of some one else they might squander his hard-carned \$700 or appropriate it for some other ourpose. He had a wise head, for hi knew he could confide his "little all" into no more faithful bonds. The officer promised to carry out his wishes and the old soldier became more recon ciled to his fate, but still he desired to die on shore. "Could be hold out?" That was his query every day, for more than one of the soldiers, not as ill as he had been and with youth in their favor, had succumbed and were finishing their journey silent passengers in their long, narrow boxes,

Finally they sighted the Golden Gate. There was joy among the sick boys and the eyes of many filled with tears. They had gone out hale, hearty soldier boys, with life spreading out like a grand panorama before them and illied with possibilities of a future attended with success and possibly fame. They were going to be so brave and go into the very thickest of the light or wherever their country called them. They might come back covered with sears, but what of it-that was only a soldier's fate! The dream was ended; they were coming home, some wounded by Filicarry reproof, "Is your royal highness pino bullets, but more suffering from disease that lead sent the strong, your soldiers back to their native fand merphysical wrecks. BRIEF REVIEW.

Cure for Consumption.

Dr. George M. Barney of Brook yn, formerly President of the Long Island Medical Society, is the discoverer of an alleged new cure for consumption. He o be brought about and felt by the patient within the period of one week. The doctor is quoted as follows: "My treatment consists of introducing into the system a chemical or combination of chemicals: This combination thors oughly saturates the system, and by reason of the irredstible power destroys: the bacilli without injuring the tissue cells. It is administered in three ways. through the assuth, hypodermically and in vapor form. When the vapor is differn minutes while scated in a specially equipped steel cabinet. Personally, I prefer the vapor, as it goes deep into the lungs and reaches the diseased parts. To effect a cure requires all the way from twelve to sixteen weeks of treatment, according to the resistance of the disease and the recuperating physical condition of the patient."

Good Heat Conductors. The tendency of heat to diffuse itself s effected by radiation, conduction and onvection. Nearly all dull and dark substances are good radiators, while bright, polished surfaces radiate badly. some substances conduct heat more freely than others, silver among the metals being the best conductor, and as cunit of measurement is taken at 1000, Compared with silver as a conductor gold is 981, copper 845, zinc 641, tin 400. London steel 397 and wrought fron 136. Class, wood, gases, liquids and resinous substances are had conductors. Water is such a poor conductor that if heat is applied to the top it will boil at the top the city would be found after death while the bottom will remain cold.

on the Head of a Pin.

There is a man in Philadelphia who years a commonplace looking little pin as a watch charm. To the naked eye it is not different from the millions of other pins. Yet its bend is a maserpiece of the engraver's art, for on t is engraved the English alphabet in ald English lettering, and in the center is cut the year when it was done, 1900.

The naked eye cannot distinguish a eratch on the pin's head, but a powrful magnifying glass, such as is used y a watchmaker, reveals the letters of the alpimbet in proper order around the edge of the head, every character separate and perfectly formed.

There was on exhibition at the Paris exposition last year a marvel of BEputian work, the writing of the Lord's prayer on paper one-eighth of an inch puare. This was done by Fred Swarts Brink, a penman in Philadelphia. He regarded it as the finest work of the kind ever done, but when he saw the engraving on the pin's head be confessed that he had been outdone. bought the work of the engraver, August Starcke, for a trifle and recently carried the pin to a jeweler and requested a salesman to have it gold plated and a little ring soldered on the body of the pin, so that he could attach it as a charm to his watch chain, "Some sentiment connected with the

ARTISTS WHO DEVOTE THEIR TAL-

ENT TO ADVERTISING PURPOSES. Some of Them Have Had Years of

Training in Drawing and Color Work, and Some Have Studied In Famous old World Ateliers. Although the vivid advertisements of

the excellences of foods, ointments, clothing, all mechanical appliances known to man and a thousand other things never dreamed of in the philosophy of a hundred years ago are continunlly catching the eye and possibly shocking the artistic sensibilities of the beholder, few of the ordinary observers give a moment's question to the makers of advertisements. The advertis ing craze has grown of late to such hage and unlovely proportions that any brief account fails to explain its workings. The office of a large advertising concern is one of the busiest places in town. Artists are constantly appear ing with designs for the firm, a small trmy of men with paint pots and brushes are hovering about waiting to be ent out, and everywhere are gay evidences of the results of all this labor.

Who are the men that paint these heroic' pictures one sees on unused walls and lafty fences?" asked a reperfer of one of the men who keeps here subordinates busy.

"They are not the people you think them. I fancy," was the answer. "Inread of being daubers, with about the dillity necessary to wield a whitewash brush, our best men are real artists. By this I mean that many of them have had years of training in drawing and color work. Several of them have tudied abroad in the atellers of well nown men. A man whom I saw paintng a head on a wall yesterday is a lgld Instructor in a Brooklyn art Recently one of our men paintd on a large wall the biggest portrait ver attempted. He had studied five ears in the Paris art schools."

Why do they take up this work?" The other doesn't pay. It's a case of commercialism in art. They find but they can't make the real thing are, so they come to this common There's money in it. Why, ir star painters get \$50 a week. The subers, who put in backgrounds, don't curn more than \$10 or \$15 a

The men who paint the designs in arious inaccessible and conspicuous clases have with them small copies of the designs to be reproduced. Long. experience makes them expert in acurately tracing the design upon the hosen surface. Although the familiar advertisements scattered over the city seem exactly allke and one face seems the exact counterpart of another, yet closer inspection will show various points of difference. In the case of a very familiar picture which is displayed from one end of the United States to the other, when it was first brought out one man was bired for the sole purpose of painting that one design, and to do this be traveled from Maine to California.

"Not the least of our difficulties," said the advertising man, "is finding raising in that state, and a tract of places to put our signs. We hire men who do nothing else but go about and obtain permission from owners to put up billboards on their premises, use a vacant wall or decorate a fence or a medianely under cultivation, but the re- roof. It needs great tact to do this, When there are objections, they must be overcome, and after this is done an exceedingly theh soil, but there the owner often gets the idea that his seems to be no reason to doubt that the available space is worth thousands of conditions diversary to produce an ex- deliars to us and to him. The experiences of advertising men among farmers and tramps would make a

mighty interesting book." "Why do you say tramps?"

"Oh, the tramps are our worst eneudes. They build fires behind our bilibeards and burn them or else tear them down out of sheer wantonness." When asked about the price a blank

brick wall in a conspicuous part of New York would bring to its owner if he let it for advertising purposes, the advertising man laughed and said be could not tell that, but he did not mind who make a barmful use of them. In saying that he was now paying \$6,000 a year rent for a wall in the middle of the shopping district. "This is not an unusual sum to pay," he added, "for

Advertising tirms are liberal subscribers to all art magazines, particularly to those French art periodicals clan's prescription, and even in this which display the newest drawings of case no careful druggist will rely whole the still popular poster. The ideas of ly upon the prescription should there the foreign artists are taken freely and be suspicious cheumstances connected converted into gandy designs for advertising the latest song or a new cigar stopped by making the purchase of without the least compensation, since, poisius impeasode by laymen, but a as the advertisers assert, American which 12 guineas are given annually fruitful source of scandal and shame to ideas are assimilated abroad just as unceremoniously,
