TASKS OF ENUMERATORS. The Census of Const. Was Not an Easy

Thing to Ties.

According to the census builtetin presented to the dominion parliament there was a good deal of fixed work about taking the Canadian sensus, says the Chicago Herald. "The work of tusing the census of Canada has allowed to the census of Canada has allowed to the census of Canada has allowed." he census of Canada has difficulties pe culiar to the country which, apart from the system adopted, cause delay in obtaining the returns from enumerators. In densely populated countries, under holders' seh dules in a day or two each having to collect an average of 70.

"In Canada the staff of enumerators tion. A steamer with commerators on board traversed the deep indents of the Pacific coast line as far as Alaska thence to Queen Charlotte islands, to enumerate the people, Pack horses were required in the mountain region of the same province to carry the enu-merators and their portfolios through the valleys which run along the hills of the rockies. Dog trains were a neces sity in Saskatchewan.

"To obtain the population on the northern slopes of the height of land i Ontario and Quebec a cance expeditio started from the headwaters of th Lierve river to go by lake and river an portages to Albany river at James' bay Camping outfits and canoes were need ad to enable the enumerators to take the population in the Niplasing district, just beyond the 'height of land.' The just beyond the 'height of land.' The snumerators in Manatoba had now to foot it, now to go by buckboard, and now by boat, and in one instance the nan losing himself, had to save his will fle by slaving and gating his lorse. Many townships in Alyona had sound potatoes, cut into quarters, two pieces to the hill, sixteen inches apart.

Lurry to plant. But if left a couple of weeks it will settle down all right. Unit of the plow, open trenches the width of the plow, eight the four great ocean routes.

The importance of our commerce with Great Britain is shown by the fact that she taken by slow and toilsome pedes.

"For the north shore of the Gulf of St. Lawrence a schooner had to be the schooner returned to the straits and sailed along the coast, picking up the snumerators and returning to the mouth of the Saguenay river."

A VANDERBILT LINEN CLOSET

the Effete Aristoc acy of a scope. Only those who have visited ducal and royal establishments abroad can have any conception of the scale of splendor maintained in the great houses of this ountry's plutocracy, says the Illustrated American. Every department is a study in itself, and not the least in-teresting feature of Mrs. Frederick Vanderbilt's private palace, for stance, is the linen closet, where all of her costly damasks and embroidered linens are stored. Of course, everyone has heard of the point lace sheets. Mrs. Willie K. bronght to her pretty sisterin-law from Europe awhile ago. They were a decided novelty over here, and naturally created a sensation among millionaire houseleepers. It may have been the acquisition of these very ex-quisite bed coverings that incited Mrs. Vanderbilt to order her linen emploard with such nicety. Certain it is that no system or detail could improve upon the present arrangement. The closet is in reality a room finished in hardwood and admirably decorated. Every device has been studied to preserve the articles and facilitate the means of getting at them. The tablecloths, each with its particular set of napkins, are hald away n sets, the napery all being of the very handsomest description, and ar-istic as well as valuable. In phase of shelves, or drawers pulling back and pigeon-holes are built in on one sidwith doors that put up and let down Every set has its superate com artment with the name outside, in order that naid may put her hand on the right thing at once. This system is earried out in disposition of all the linen, while is naturally of the finest quality, an towels, while a mere sugge tion of violets, beliotrope or white rose is permitted in perfuming the unpery. Tri 1 of the Pyx. The trial of the pyx is an interesting

annual eeremony that in one form or another has occurred for centuries in England. The pyx is a box in which certain numbers of coins of every de nomination are placed after each days work in the Beltish royal mint for years. The Goldsmitter company to afforded the jury since its institution several hundred years are. When I'd jury open the pyx they weigh the coin in bulk and several individually, testin them also with fire and ghemicula that there can be left no trace of t true value of British and Britt to ou The low of waight ely" allowed to the most most t were coined last year for use at home and in the colonies.

NEW METHODS OF PLANTING.

r. The 1,000 bushels mark has not en reached but it is claimed it can be one in a favorable season. Over 900

ishels have been grown. In densely populated countries, that the defacto system, the distribution and collection of the seacoules is no very deep and thoroughly enriched with special fertilizers. Then trenches are o med ten inches wide and eight inches feep, the land baying been plowed to a epth of ten incaes. The bostom of the schedules. The vast population of trench is then covered with two inches British India, 284,730,630 people, was of soil mixed with sufficient special potaken by nearly 1,033,033 enumerators tato fertilizer. On this the potatoes are placed and covered with two inches of numbers 4.300 persons. These had to traverse the immense area of Canada by every imprincible in those of locomolium. When the potatoes are up the ground is level, the treuch having been filled in ground is level, the treuch having been filled in ground is level. filled up gradually. The surface is kept an of weeds with a hoe or shallow running cultivator. This is apparently a vast amount of work yet it is said to pay well. Where land is worth from \$300 to \$500 an acre, and rents for \$50 to \$75 or more an acre for the season great

crops must be raised to make it pay Let us apply this system in a modified form. On this Coast there are large tracts of sandy, allovial looms of great ricaness and depth. It is fully as rich naturally as need be for any potato crop. If plowed twelve inches deep when at the right stage of moisture some of the best sandy loams, free from "hard pan" and "bed rocs," fall from the plow as mellow as an ash heap. It does not even need harrowing, but harrowing and cross harrowing will firm it down if in a Lurry to plant. But if left a couple of FINANCIAL AND COMMERCIAL.

and cover them deep. This gives four products. thartered, the enumerators put on sound and dropped at different points antil the Straits of Belle Isle were ceached, from which point the schooner was directed to the Isle of Anticost, the census of which having been taken secret of the plan is that the plants grow a plant to be schooler of the schooler was directed to the Isle of Anticost, the census of which having been taken secret of the plan is that the plants grow a plant is that the p secret of the plan is that the plants grow amounted to \$15,560,000, and the importance two full crops of potatoes, one above the thickness to \$10,000,000. In 1885 they other. In other words the tubers have amounted to \$70,000,000 and \$65,100,000

If the land is not rich enough it can banks, having a capital of \$99,500,000. be made so with special fertilizers. The How Our Four Hunfred Compete with new agriculture or scientific farminggrowing crops two or tured times as great as time average heretofore-is the kind that will pay best. As much may be realized from ten acres as from paign of 1860. twenty to forty acres by the old system. This can only be done by giving the longs to George A. Warren, of Indianapcrop the food it requires and tuorougaly and deeply mixing it with the soil, with nine years old, and was brought from level, smallow cultivation.
