Representative Burton Defends the Measure

EVANS WILL BE PROMOTED

Washington, March 17-Representative Barton found it mocossary today to enter into a defense of the rivers and barbors bill, to show that the expenditures for rivers and bathers have not increased to any such great extent as that for other departments of the government. The social criticisms have been made about the bill, and the flings about "log-relling," "pork" and pub lic plander distributed so as to secure a aufficient aumber ,d gette." But Burton points out that only & small proportion of the money goes to the improvement of small streams and harbors. The members of both houses are determined to pass the bill at this session, and every precaution has been taken so es to preyent its defeat. By passing the the danger of an irrigation amendment being put on to it in the Senate, which would have given the friends of the measure some concern. There is still some talk shout amounting the provision regarding the casel and locks at The Dalles, but it is expected that the work can be commenced by an amendment authorising an appropriation which is

nection with the Pension Bureau, to se cept from the President a position which lected. It is well known that Mr. Ev ans has the entire confidence of the President, and the latter will not con sider the question of his retirement antil a position entirely satisfactory to the Commissioner has been provided.

England Hos so Four of Inquiry London, March 17,-In the House Commane this siteraoon Sir Henry Campbell-Beanermas the .Liberal lead er, moved the appointment of a select committee to investigate the whole commercial history of the South African war, including the centracts for the purchase of remember, mest and forage, and the contracts for freight and transportation, saying that is so doing he was only fulfilling a -moral duty and schoing a sentiment deeply feit through out the country. The war secretary Mr. Broderick, replied that the govern ment did not fear an investigation. It was true that operations of the magni tude of those in South Africa there must have been mistakes and shortcoming, and the war affice would demand as its right an investigation at the prop or time. But British operations in all parts of the world would be paralyzed f an inquiry was forced now. Had the war office been in the condition in which Sie Heary Campbell Bannermen left it, the war could not have been carried on for two months, owing to the .Cashier shortage of goos, ammunition and the supplies requisits for a campaign.

84. Petersburg, March 15 -A stu dents' riot bere, in which over 10,000 people engaged, kept a large force of pelice and cavalry busy throughout the day. Probably 100 arrests were made. but the repressive measures were injured, no fatalities sere reported.

Praise for Both Britan and Boer.

London, March 18 -Describing the disaster to General Methuen, the Pretoris correspondent of the Standard praises the gallantry of the Boers, who, he says, charged beedless of the hot fire pagred into their lines. Se contrasts the cool steadiners of the British infantry supporting the game with the blind panic which asserved and stampeded the mounted rear guard. ## Repairing Neatly

Never thought of such a sign for a medicine did you? Well, it's a good sign for Scott's Emulsion. The body has to be repaired like other things and Scott's Emulsion is the medicine that does it.

These poor bodies wear out from veorry, from over-work from disease. They get thin and weak. Some of the new ones are not well made-and all of the old ones are racked from long usage.

Scott's Emulsion fixes all kinds. It does the work both inside and out. It makes soft so strict as on the corresponding sun bones hard, thin blood red. day of 1901.
