OPPOSED TO WAYS OF PALE FACES

Indians Protest Against Hunters' Licenses.

Johnny Beaver and Tom Sampson, the vanguard and leaders of a band of Columbia river braves and squaws were in the city the latter part of the week on their way to the Blue mountains to spend their much needed annual summer "vacation."

The state law requiring hunters to take out licenses with the attendant one plank of the realm, was the source of much disgust in the breasts of both Beaver and Sampson.

They appeared before Deputy Clerk Pruitt Cox and with considerable eloquence tried to impress the accommodating officer with the evil ways of the white man.

It was a plain case that they were opposed to the ways of the pale face especially the railroads and civilization in general.

Their argument against the railroads, if it could have been saved, would have been enough to fill several pages in the report of the Oregon Railroad Commission.

When told that it was absolutely necessary to produce a big dollar to secure the required document, the squashes slowly but reluctantly dug up and lazily walked away with all the sulkiness characteristic with the red man.

Bert Owens writes to the Condon Times that while he and Louis Mattingly were looking out section lines he saw two cubs and caught one, when the mother bear made for him, and he says, "grabbed me by the seat of the pants and I jumped a log and that delayed her a little. I gave up for lost, but Mattingly heard me yelling and he and his dog took a hand in the scrap just in time. They attacked the bear and after a furious battle she was laid low with a lucky blow in the head with the ax. The old bear only got the seat of my overalls and drawers. I am sure she was very welcome to them."

BIG YIELD OF WHEAT HAY

Thirty-Three Tons Cut From Ten Acres.

E. C. Watkins was in town Saturday. He stated that he had just finished putting up 10 acres of blue stem wheat hay which turned out the biggest yield of anything we have heard of this season.

The grain was grown on bottom land on Bob Dexter's place on upper Willow creek, and from 10 acres cut the yield was 33 tons of the best of hay.

An offer of \$10 per ton was made for the hay right in the field.

This is an average of \$33 an acre which is a big profit. Wheat hay loose is selling for \$12 and baled, \$14 per ton in Heppner.

Woolgrowers Will Meet.

The annual convention of the Woolgrowers' Association of America will be held in Salt Lake City, Utah, August 25 to 28 inclusive. It is expected that there will be upward of 500 sheepgrowers in attendance. An attractive program has been arranged for the meeting with speeches by prominent Western men. The convention will have a number of matters before it for consideration, not the least important of which will be the movement to inaugurate a national storage plan. The question of transportation also will be taken up and an active fight made to eliminate what is alleged to be unjust discrimination against the Western woolgrowers on the part of the more important railroad systems.

The decision of the executive committee with reference to the establishment of a central wool station for the Intermountain country will also occupy a prominent place in the deliberation of the convention. The states of Arizona, Montana, Nevada, Idaho, Wyoming and Utah represent 12,000,000 sheep and annual wool clip of 85,000,000 pounds.

The College catalogue just issued from the college printery, is a 288 page book containing 46 pages of illustrations. The catalogue shows the addition of 24 instructors, and 10 graduates employed as assistants, making a total of 76 in the faculty for the year 1908-9. There are 16 buildings on the college grounds. The student body numbered 1166 last year, and a total of 22 societies, clubs and literary organizations among the students assisted materially.

No More Cheap Beef.

Cheap beef is a thing of the past because land has become so valuable that there is not enough range to keep meat prices down, according to Colonel Ike Prior, president of the Cattle Raisers' association. He says thousands of calves were slaughtered in Texas last year because there was no feeding ground where the raisers could run them until they grew up.

Foley's Kidney Remedy will cure any case of kidney or bladder trouble that is not beyond the reach of medicine. No medicine can do more. Slocum Drug Co.

Great quantities of fruit are going to waste in the Bend country, due to the fact that the people are not aware that a certain wild berry is quite edible says the Bulletin. This berry is known locally as the "coyote berry," and grows in great profusion along the river.

Cured Hay Fever and Summer Cold
A. S. Nusbaum, Batesville, Indiana, writes: "Last year I suffered for three months with a summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed only to aggravate it. Fortunately I insisted upon having Foley's Honey and Tar. It quickly cured me. My wife has since used Foley's Honey and Tar with the same success." Slocum Drug Co.

On his return from a trip a Wellerbun man, tells the Radium, said his party had killed 26 rattlesnakes. This tale might have passed muster, but when he told of rattlers plunging into the front streams and catching fish, the reporter began to doubt.

Disagreeable at Home
Lots of men and women who are agreeable with others, get "cranky" at home. Its not disposition, its the liver. If you find in yourself that you feel cross around the house, little things worry you, just buy a bottle of Ballard's Herbine and put your liver in shape. You and everybody around you will feel better for it. Price 50 cents per bottle. Patterson & Son.

Big Sheep Sale.

The largest sheep sale consummated for years was closed at Caldwell, Idaho, last week when George Y. Gray of Nevada, sold to John T. Jones of Los Angeles, 34,000 head of old sheep for \$85,810, says the Boise Capital News. A pick of 5400 of the sheep brought \$2.65 each and the remaining 28,600 sold for \$2.50 each. In addition to the above sale Mr. Jones also purchased 20,000 lambs at \$1.80 each.

Some of the old sheep are to be shipped to Chicago and the remainder will be grazed on the range in Nevada until the market improves.

Oregon Agricultural College.

[Weekly news letter special to Gazette.]
A bulletin on "Incubation Experiments," to be published soon, will prove one of the most interesting and valuable publications ever issued from the college. It embodies results of extensive experiments on methods of incubation.

Prof. James Dryden, head of the Poultry department, has been elected first vice-president of the "International Association of Poultry Instructors and Investigators," at a recent meeting held at Cornell University.

It has been demonstrated by Prof. Pernot that freshly canned fruit heated at a low temperature three days in succession will serve the same purpose as one heating at a high temperature and at the same time preserve the color, flavor and shape of the fruit. Housewives should note this fact, and if information is desired send to the college for bulletin.

It is not generally known that the Engineering department of the Agricultural College has been giving road building a great deal of attention. It is the intention to add instructors to this department, go into road building extensively and as soon as possible give the people of Oregon information that will result greatly to the improvement of the State's highways.

The College catalogue just issued from the college printery, is a 288 page book containing 46 pages of illustrations. The catalogue shows the addition of 24 instructors, and 10 graduates employed as assistants, making a total of 76 in the faculty for the year 1908-9. There are 16 buildings on the college grounds. The student body numbered 1166 last year, and a total of 22 societies, clubs and literary organizations among the students assisted materially.

Four hundred thousand feet of lumber were bought by Swift & Co this past week for use on their town-site near the plant now being built. Twenty-five dwellings will be started immediately, some quite pretensions for the officers of the company. Hundreds of smaller homes will go up as rapidly as practicable.

Last Sunday J. S. Macomber of Dallas plucked from his lemon tree a fully matured lemon much larger in size than is generally sold in the stores. There are 36 smaller ones on the tree not yet fully developed. The tree is grown in a tub and kept in the house in the winter, but grows out of doors during the warm weather. It is prolific and thrifty in every respect.

Twenty men have been employed during the summer at the Corvallis brickyard, and when the season is finished 750,000 brick will be the output.

A family living near Weilerville on the Makenzie has killed 12 rattlers since March, three of them in one day.

Attention, Asthma Sufferers!
Foley's Honey and Tar will give immediate relief to asthma sufferers and has cured many cases that had refused to yield to other treatment. Foley's Honey and Tar is the best remedy for coughs, colds and all throat and lung trouble. Contains no harmful drugs. Slocum Drug Co.

A Wallawa county man picked 130 gallons of strawberries from 1,750 plants. Of this number 370 plants were planted the first of May, 1907, and this season yielded 58 gallons.

A Hood River Early Harvest apple measures 1 3/4 inches around. Independent and reliable—The Oregonian.

CENTRAL OREGON RAILROAD

Work Commenced at Condon.

According to the Portland Journal-Interior Oregon is to have 200 miles of electric railroad extending from Condon to Fossil, with branches into the Bayville district in Grant county to the John Day country and then on down to Prineville, Bend and the adjacent granitic area of present transportationless country. Construction work on the first 40 miles of the line began Saturday at Condon and will be in operation in time to handle the wheat crop of 1909, while the other sections will be pushed to completion as rapidly as the construction forces can lay the rails.

Back of the project, the Wasco company Electric & Water Power Company, and David Eccles of Ogden, powerful financial interests of Oregon and California, and moneyed men of central Oregon. Already \$600,000 is ready and waiting for the commencement of construction work while unlimited funds are in course of aggregation.

Men who are interested in the project say it is a certainty and that the work commenced will be carried out as rapidly as the construction can be accomplished. Mr. Eccles is now in charge of the flotation of the bond issue of \$15,000,000.

The contract for 200 miles of road, the necessary bridges and power plants, has been let to the Portland Construction company.

According to the plans of the promoters of the company the line will begin at Condon and will run from there to Fossil. It will have a branch to Bayville in Grant county and another west to the John Day River where a power plant capable of producing 20,000 horsepower of commercial electricity will be constructed.

A branch will be constructed to the Muddy creek country past the Prineville Land & Livestock company's irrigation tract, and over the divide on a grade of not more than three per cent. It will tap the Pine Creek valley at Ashwood, thus making available the great mining district there.

A branch will be run from Cross Keys and a second power plant will be constructed at the Junction of Trout creek with the Deschutes river capable of producing 60,000 horse power of commercial electricity. From Cross Keys the line will run south to the Agency Plains, through Madras and on south to the Bend country.

Another branch will be constructed eastward near Redmond to Prineville and Howard tapping the gold mines of that district. From these two mining districts 8,000 tons of milling ore will be guaranteed a day, it being the present intention to construct a smelter and reduction works at a central point where the development of the project is far enough advanced.

Rain Checks Fires.

Heavy rains in Crook, Lake and Klamath counties are doing much to extinguish the forest fires which have been devastating the timbered area in a dozen places. So intense are some of the conflagrations, however, that the rain will not suffice to put the fires out unless it continues for a week or more. Thus being the case, Forest Supervisor Ireland, keeping all his men in the field, attention being centered primarily on the great fire near Redmond, which has a frontage of nearly 20 miles. The supervisors of adjacent districts, at Burns, John Day, and Mitchell, have been called upon for men, and at this time more than 200 fire fighters are in the field.

THE WHEAT MARKET.

Club 75c.
40 and 75c.
Blue stem 75c.
The wheat market has been quiet during the past week. Very few transactions are reported.
Farmers generally are very busy with harvest operations.

What is the world coming to when two of bend's young ladies walk into a cigar store in broad day light and each purchase a cigar? asks the Bulletin.
