Stacy Roberts states that his son, Hugh, who has been an invalid for so long, is gradually gaining his health again and hopes for entire recovery. He is now located on a nice little place near Marysville, Cal., and is starting up in the poultry business. The dry, warm climate of that section seems to be very beneficial to him, but Stacy says there is no doubt about its being the hottest place on the face of the earth, and no less than a half mile from that place that we all desire to avoid when we shuffle off and he is glad to get back where it is not so hot and where we have some variation in the seasons. It has been many months since rain has visited that portion of the Sacramento valley—in fact it never rains there very much, yet it is one of the greatest grape producing sections in the world and withal a very prosperous section, and to those who like that climate, a very pleasant place to live.
