

WHEN IS MUSIC, MUSIC?

MUSIC IS MORE THAN JUST THE MECHANICAL REPRODUCTION OF SOUND; MUCH, MUCH MORE!

Understand Music. Then you'll understand Phonographs. Music is not merely sound; it is not merely harmony or rhythm. Music is a flooding, mysterious power. It is generated by a dynamo—the artist's soul, his imagination, his personality. It is the expression of feelings, emotions. It exists not so much in sounds—but in accents which his feelings give these sounds—in what is called tone-color.

Mere sound, harmony, rhythm are to be heard in the playing of many phonographs. But—Soul Expression! Tone Color! These are something from another realm.

THE NEW EDISON "The Phonograph with a Soul"

actually RE-CREATES Music. That is why the New Edison matches its Re-Creations of the artist's voice against that art-warmth and tone-color of the living gives you the live, pulsating life's living voice. The Re-Creation voice, not merely an imitation.

Come into our store and hear for yourself how Edison has Re-Created the soul, the feeling, the electric spark of emotion in Music.
