WALK UP THE HILL.-We would call miserable condition of the old steps up bear repairing, and a new one is an actual necessity. While they are about it, let us have a walk made that will be of easier grade than the present, even if it costs a little more. We would suggest that the Council take under consideration the laying of a walk from sideration the laying of a walk from the head of Fifth street, rounding the bluff and come out by the bridge on the top. By this means there need be no steps, but an easy grade can be ob-tained for a sidewalk. We are satisfied that the expense of such a walk will be but little when the convenience of it is taken into consideration. There should also be a walk constructed along the side of the road which now leads up the bluff. The first mentioned, is an actual necessity, and we trust our city fathers will do something immediately for the benefit of those residing on the for the purpose.
