The remains of the late Archbishop Seghers arrived at Esquimsult on the Thetis Wednesday morning and were to be interred yesterday.

Some of the inland papers deny the existence of any smallpox-to speak of, and declare that what there is, if any is "under control," whatever that

The Al-Ki and Michigan crossed out, the A. B. Field left for Tillsmook with A. B. Hallock and freight for that port, and the Alliance came in, yesterday.

The keen northeast wind quieted down towards evening yesterday, and the temperature sensibly moderated, but at 2:30 this morning a fresh breeze was blowing from the east.

Chehalis county sports amuse themselves by shooting the insulators from the telephone line. The company offer a prize of \$50 for the apprehension of the shooters.

The electric light lamp at the cross ing of Third and Lafayette streets, accidentally took a tumble last night, which accounts for its failure to illnminate that portion of the city.

Arrangements have been made for thoroughly warming the opera house this evening. So there need be no fear of having the pleasure of listening to Abbott marred by a chill.

smallpox has gone north, south and east, and it may try to go west, al-though the splendid climate of Astoria does much to insure our safety

A friend who was in yesterday says he don't charge anything for the advice, but he thinks medicines taken internally are most likely to produce beneficial results, because they have the inside track, so to speak.

Lumbermen report the California market rather slack and it is said to be the intention of some of the large lumber manufacturers to reduce the supply till it is equal to the demand, and so be able to maintain prices.

A basket social will be held at the Norwegian and Danish church, upper Astoria, Saturday evening Nov. 17, 1888, at 7:45 A. M. A good program, including speaking and singing, has been prepared and a good time is expected. Everybody is invited. The ladies will please bring a basket

The Manzanita was up the river above Tongue Point yesterday, and the water was so rough and choppy that she had to tow the light keepe of beacon No. 4, opposite Harrington's Point, to the beacon. She leaves for Tillamook rock this morn ing with supplies and a segment casting for the hoisting crane on the

The present cold snap makes fires desirable so it would be well for everyone to inspect their flues and see that there are no dangerous openings in them through which fire may be communicated to the wood work or other inflammable material. Chief engineer Snyder is looking after the matter as much as possible, but each individual should be a committee of one on his own premises.

The strong northeast wind jolted things up lively along the dock yes-terday. Clinton's pile driver soow, moored at the foot of Cass street, butted Denny Curran's Whitehall boat to its destruction and damaged the government boat also. The steamer Novelty also received some at-tention, getting off with her stem split. Better keep clear of a pile driver; it's a hard hitter.

The new electric light lamps were put in place yesterday and burned with ateady and undiminished brilliancy not being subject to those protracted attacks of syncope which so much impaired the value of the old lamps. It is to be hoped that the

lamps will continue as well as they have begun, because the sudden changes from dazzling light to overnal pedestrian with distrust and dis-

portation facilities that they are compelled to let some of the wheat go to Portland by way of the O. R. & N. lines. Probably as soon as they get sufficient transportation they will relieve Portland of the trouble of handling the grain. But by that time the Astoria and South Coast railroad will give the farmers a gravity line to run give the farmers a gravity line to run their wheat down to the ocean on which will be cheaper than to send it over the backbone of the Cascades to the sound.

The following, advised as a preventive of smallpox, is good most any time, and if followed will be of material benefit to health whether one is exposed to the disease or not: Live carefully and do not eat largely of heating victuals. Keep the bowels in good condition. The blood should not be kept at too high a stage. The frequent use of lemons is recommended; oream tartar is also a good tonic and purifier. The use of liquor of any kind is not advisable, nor the excessive use of tobacco, but are likely to be or have been exposed is to vaccinate early and often. It is the only true preventive. The others are only assistants, preparing the system that it may more easily with-stand a siege of the dread affliction.

PERSONAL MENTION.

J. D. Higgins is at Weston, Or. somewhat improved in health. Emma Abbott To-Night

There will be a large audience at the opera house to-night to listen to Gou-nod's grand music of "Faust" rendered by the favorite prima donna Emma Abbott and artists, chorus and or-chestra. It was in this opera that Miss Abbott achieved one of her ear-liest successes; and she treasures sacredly a little book in which Gounod himself wrote a flattering criti-cism of her impersonation of his he roine "Marguerita". Miss Abbott will be supported by Lizzie Annan-dale, as "Siebel," with her superb contralto voice. Senor Michelena, the gifted lyric tenor, as "Faust,"
William Pruette, the famous baritone, as Valentine, while Wm. Broderick, with his rich basso voice, will
sing the solo of "Mephisto." The world-wide reputation of these talented artists guarantees an unusual treat to those who attend.

No Danger.

There was a rumor of there being fire at the school house in district No. 1, last Wednesday. As a matter of fact there was no fire, but in conequence of a large pitchy stick being put in the furnace a great volume o smoke was made which came through a crack in the chimney, and this gave rise to the rumor of a fire in the school house. The walls of the chim-neys were at first made too thin and they have cracked in some places, the directors have commenced building another thickness of brick around the fines so as to strengthen them and make them effectually tight. The repairs are expected to be completed so as not to interrupt school on nex Monday, and parents need not feel the slightest uneasiness in regard to the safety of their children on ac-

A SOCIETY STORY.

Bridget Must Receive Company in The Kitchen.

The town gossips are now telling this story of Mrs. S. Van Rensselar Cruger, wife of the Republican nom-inee for the office of lieutenant-governor. She is an acknowledged soci

ernor. She is an acknowledged society leader, and her parlors are eagerly sought by aspiring young men about town. Among frequent callers was a well known, good looking young man, whom half the feminine part of the upper 400 have lavished smiles which would easily turn the head of one less experienced.

This lucky individual had gone to pay his respects to Mrs. Cruger. A servant had disappeared above stairs with his card, when a remarkably pretty housemaid entered the drawing room where the young man was waiting, and proceeded to dress the lamps. The girl was so pretty, and her trim figure so appealing in a long and snow white apron, that the gallant threw prudence to the winds and caught her in his arms. He was in the act of bestowing sundry violent caact of bestowing sundry violent ca-resses upon her tempting mouth, when a softly modulated voice, speaking in the calmest way interrupted his elysium and turned his hot blood to ice. Mrs. Cruger's tall and elegant figure was standing in the doorway. She had come down sooner, perhaps, than was her wont, or maybe the kisses had been so sweet that the young man had lost track of the flight

of time. "Bridget," said the voice, "have I not always told you that you were to receive your company in the kitchen?" Bridget fled. The ardent gallant did not raise his eyes again, and when his senses told him that the coast was clear he found the front door without difficulty. Nowadays his card is missed from Mr. Oruger's crowded receiver.—New York Sun.

A Warning.

The modes of death's approach are various, and statistics show conclusively that more persons die from dis eases of the Throat and Lungs than any other. It is probable that everyone, without exception, receives vast numbers of Tubercle Germs into the system and where these germs fall upon suitable soil they start into life and develop, at first slowly and is shown by a slight tickling sensation in the throat and if allowed to continue their ravages they extend to the lungs producing Consumption and to the head, causing Catarrh. Now all this is dangerous and if allowed to proceed will in time cause death. At ness; allowing a cold to go without your attention is dangerous and may tation and forbids them to take part in boycotting and the plan of campaign movements which they must oppose with all means in their power.
