

IN all receipts for cooking requiring a leavening agent the ROYAL BAKING POWDER, because it is an absolutely pure cream of tartar powder and of 33 per cent. greater leavening strength than other powders, will give the best results. It will make the food lighter, sweeter, of finer flavor and more wholesome.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW-YORK.

Nineteen Days in the Woods.

W. H. Beller recently turned up at his home in Mercer county, W. Va., after having been lost for 19 days in the New Pine mountains. For the first four days he traveled constantly in the endeavor to find his way out of the wilderness in which he was lost. When he found that he had but two matches left, and fearing that he might use them up and be unable to kindle a fire, he picked out a permanent camping place, started a fire against a pine tree and made ready to live as best he could until aid came. His tree burned until it fell and then he piled brush against the fallen trunk in order to keep the fire going. He remained at that place 15 days, moving a few feet each day as the fire traveled along the prostrate tree. He slept as best he could by night, and by day never lost sight of his rifle. Once an antlered buck came within rifle shot, but Beller had the chagrin to see his rifle leaning against a tree, with the buck between him and the weapon. He hallooed at intervals each day, and the noise at last brought a hunter to his aid. Beller was then a haggard wreck, his clothing burned in many places and his fingers both burned and frozen. He believes that he could not have held out two days longer. —New York Sun.

Safety on the Big Ocean Liners.

The strange, eventful history of the overdue Canadier proves two things for, say, the 500th time. One is that the engineers know their business. The other is the still more patent fact that there are not a few persons in and out of newspaper offices who dearly love an excuse for making a commotion. It is disagreeable to be delayed for four days on the north Atlantic, just south of Newfoundland and in a stormy December. It is like being kept for an hour outside Cannon Street station in a freezing fog. But, after all, when you are in a Canadier which drifts as steady as a church with three sea anchors out, when there are three weeks' provisions on board without having recourse to short rations, when you are in the track of the trade and steamers are passing as quick after one another as they do in the channel, when you have from 100 to 500 fathoms of water under you and there is no lee shore nearer than the Azores, it is quite unnecessary to play at shipwrecks and disasters. —London Saturday Review.

A Life Job.

The solitary man who pecks at a stone step in front of the capitol with his mallet and chisel does enough pecking to keep warm. He does not care to hurry his job, and nobody cares to hurry him. The longer he is at the longer it will be before anybody has to provide him with another job. The man himself is not hibernating, but as a type he is worth observing. His method is the universal one in government service. The disposition to do the least possible work in return for pay is manifest in all the clerks' desks in all the bureaus, and something very much like it seems to take hold upon congress itself now and then. —Washington Cor. New York World.

Wholesale Perjury.

A foreign steamship lately arrived at New York brought 900 stowaway passengers, each one duly provided with a sworn certificate that he or she was an American citizen or the relative of an American citizen or a tourist. The whole crew was promptly landed. And yet of all the 900 American citizens, relatives of American citizens and tourists, singularly enough, not one could speak the American language. The ways of some immigration agents are ways that are dark and vain. —Boston Journal.

The New Mail Flag.

The pennant to be borne at the masthead of the United States mail subsidy ships is 20 feet long, 8 feet 6 inches at the mast and 5 feet at the end of the swallow tail. Its field is red, bordered by 9 inches of blue. In the upper left hand corner is an eagle in blue, with arrows and a branch in its talons, and bearing on its breast a shield with stars and stripes in red and white. —Charleston News and Courier.

Flesh

means strength to withstand chronic ailments, coughs, colds and disease. Sound flesh is essential to health.

Scott's Emulsion

the Cream of Cod-liver Oil, enriches the blood, builds up flesh and fortifies the system against sickness and chronic ailments. Physicians, the world over, endorse it.

Always get it from the Authentic Source!

FEEDING THE COWS.

Much Said and Written About Standard Rations.

TO BE SUCCESSFUL IN DAIRYING

Much Science Must be Brought Into Requisition to Make the Rations Correctly Balanced to Fit the Physical Requirements of the Cows.

There is a great deal being said and written nowadays about standard rations for cows, and much science is brought into requisition to make those rations correctly balanced to fit the physical requirements of the cows. Every young farmer who hopes to become successful in dairying should study such tables and become accustomed to technical terms, so that he will know just what they mean wherever he sees them. Having done this, he should learn the cost of different cattle foods delivered on his farm, whether raised or purchased. Knowing this, he should then make his own standard ration, and whenever he cannot get the materials for making that standard without paying too much, he must look for substitutes in kind and quality.

The ration, as estimated, is most conveniently the food for twenty-four hours for a cow weighing between 800 and 1,000 pounds. This much can be done with books, and is a very useful part of the lesson. The real test of merit in this work comes from the actual feeding of cows. The rations may be most scientifically correct and fed in exact proportions, and yet fail to produce or return the first cost, which should not have exceeded 15 to 20 cents a day per cow. The best dairymen claim to make butter worth 50 cents a pound on a ration not exceeding 15 cents a day. But it will be seen that when the ration cost is less than the cow must give at least one pound of butter a day in order to pay her board bill and do much better than this if any money is to be made out of her.

With a cow in good condition, fat and fresh, and the ration properly mixed, the test may be made in the following manner. The individual characteristics of each cow are not to be studied. One will find big eaters and small eaters, rich milkers and small milkers, rich milkers and those that give thin, poor milk. All the virtues, or all the faults, are not to be found in any single cow. An average must be reached. For this do a little guessing about them as possible. Weigh the milk of each cow at every milking, and test the butter fat in the milk often enough to learn what her standing is. Now comes the vital point of how much to feed her. Having learned this, the work will not have to be repeated during her life.

FARM NOTES.

After burning up the trimmings and other rubbish, give the ashes to the trees.

To keep butter from sticking to the churn the latter should be thoroughly scalded.

It is said that 3,000,000 acres of land in Colorado is now watered by artificial irrigation.

Pumpkins are excellent food for hogs and cattle, and sheep soon learn to eat them with relish.

Milk should be aerated as soon as possible after it is drawn, and it should be cooled at the same time.

Since last October 469,885 bags of potatoes have been imported from Great Britain, and 39,099 bags from the continent.

Hog-raising should go hand in hand with dairying. Sweet whey, buttermilk and skim milk are profitable food for pigs.

Canadian packers recommend farmers to raise grade Yorkshire and Tamworth as the best ideal of bacon pigs for home and export trade.

An exchange reports that grease weed, which is invading the country from the north, is likely to prove almost as damaging as the Russian thistle.

If cultivation is neglected this month, it will very probably be impossible to give the crop proper attention afterward in the rush of harvesting.

The prevalence of tuberculosis among Ayrshire cattle abroad is attributed chiefly to inbreeding for the sake of securing the quality which the judges at the shows set so much store by.

VALUABLE RULES.

How to Estimate the Exact Weight of Live Animals.

The following rules may be applied to estimate the weight of live animals:

Take a string; put it around the beast, standing square, just behind the shoulder blade; measure on a foot rule the feet and inches the animal is in circumference—this is called the girth; then with the string measure from the bone of the tail which plumbs the line with the hinder part of the buttock; direct the line along the back to the fore part of the shoulder blade; take the dimensions on the foot rule as before, which is the length, and work the figures in the following manner: Girth of the bullock, six feet four inches; length, five feet three inches; which, multiplied together, make thirty-one square superficial feet; that multiplied by twenty-three (the number of pounds allowed to each superficial foot of cattle measuring less than seven and more than five in girth), makes 713 pounds. Where the length, five feet three inches; which, multiplied together, make thirty-one square superficial feet; that multiplied by sixteen (the number of pounds allowed to each superficial foot of cattle measuring less than three feet in girth) makes forty-four pounds. Again, suppose a calf or a sheep should measure four feet six inches in girth and three feet nine inches in length, which, multiplied together, make forty-two square feet; that multiplied by sixteen (the number of pounds allowed to all cattle measuring less than five and more than three feet in girth) makes 672 pounds.

Aluminum as a Coin. A petition has been addressed to the Grenobles chamber of commerce, France, soliciting the demonetization of copper and its substitution by aluminum. The manufacture of the last named metal at the Progres works, it is stated, has of late experienced considerable expansion. —Baltimore Herald.

A Diamond Wedding. Ireneo and Aneta Elton of Vineland, aged respectively 95 and 92 years, celebrated their diamond wedding Wednesday, having been married 75 years. —Cor. Philadelphia Press.

THE GRAND OLD MAN'S DAUGHTER.

Miss Helen Gladstone's Work as Vice-Principal of Newnham College.

"The Grand Old Man's Daughter" is the title of the book "Miss Helen Gladstone" by the Newnham College, which is a biography of Miss Helen Gladstone, daughter of England's ex-premier and vice principal of the college. She was not long ago, and the faculty, evidently thinking that the lack of ruling in hereditary in Gladstone's family—a very consistent English doctrine—at once engaged her to fill the important post she now occupies. She did not receive a degree, for it is at this point that the highest education of a woman should be. Gladstone's education is not one of her duties. Her work at the college is of an executive character. Her father once helped rule England, and she bends her womanly energies toward ruling the girls in the college.

She is a woman of rare intelligence and education, and ranks high among the emancipated daughters of England of whom the world hears so much nowadays. One odd feature of her life at the college is her firm friendship for the principal, Mrs. Henry Sidgwick, although Mrs. Sidgwick is a sister of Arthur Balfour, one of her father's most able political opponents. When Miss Gladstone was a student in the college, she was very democratic and approachable and never encouraged the formation of those cliques that are the bane of English university life, among male students especially.

Tennis and hockey are the popular sports with Newnham college girls, and Miss Gladstone is said to be a clever and enthusiastic player in both games. The founder of Newnham was Miss Anne Jemina Clough, sister of Arthur Hugh Clough, the poet. She lived in Charleston from her sister to her death in 1861, when she returned to England, where her name soon became prominent in educational work. At Ambridge, one of Miss Clough's first schools, Mrs. Humphry Ward was once a student. Miss Clough was principal of Newnham college until her death in 1892, and she always gave a very hearty welcome to the American girls who sought its educational advantages. In 1882, 1883 and 1884 Longfellow's daughters attended the school. Many graduates of the college are engaged in the work of reforming social conditions and in the university settlement, which resembles that on Rivington street, New York city.

WHERE BILLIONS CHANGE HANDS.

Proposed New Home of the Great New York Clearing House Association.

In these days of high buildings that seem to be on the point of poking their roofs into the planets of the solar system the new building of the New York Clearing House Association will not be particularly imposing so far as altitude is concerned. It is to be only three stories in height, 94 feet long and 87 feet wide, but it will make up in quality and beauty what it lacks in height and quantity. The site of the structure is at 77 to 83 Cedar street. The building is to be of white marble, in Italian renaissance style, and as it is to be detached from adjoining structures the architect has made the most of his greater opportunity of making the structure a thing of beauty. A tubular crane extends through the two lower stories, serving to preserve masses of solid masonry in the four corners. The building is to be surmounted by an attractive dome, which rises 50 feet above the main structure.

Rusticated arched doorways 9 feet wide and 17 feet high will form apperches to the building. The clearing house will use the eastern approach, and the other will be for its sole tenant—a bank, which will occupy the entire ground floor and part of the basement. The administration offices of the clearing house are to be located in the second story, and the third story will be devoted to the great clearing room, 80 feet long, where the daily exchanges of the banks of New York city and the payments of balances will be looked after.

The New York Clearing House Association, the most important piece of financial mechanism in the United States, if not in the world itself, was organized in 1853. An idea of its enormous business is gained from the fact that in 1891 the total clearings were \$35,368,553,238.81. During the currency famine in the recent financial crisis the association issued clearing house certificates that passed as money and materially aided in tiding over the money stringency and in restoring confidence in the business world.

Efficiency of Ballot Reform. The complete success of the reform system in so large a proportion of the states makes certain its speedy adoption in the remaining states. At the beginning of the present year the only states still without it were Kansas and Idaho in the north, and Alabama, Florida, Georgia, Louisiana, North Carolina, South Carolina and Virginia in the south. All these ought to have it embodied in their statutes before the next presidential election comes around, and the chances are that all of them will do so. In no part of the country is the reform more urgent or more salutary in its results than in the south. It subjects the negro voters to the same test of intelligence which is imposed in the north, and thus removes all ground of complaint in case a portion of such voters are not able to exercise their rights of suffrage.

It is estimated by the leaders of Tammany Hall in New York city that the new system deprives them of from 8,000 to 10,000 votes in every election, because of the inability of the most ignorant voters to comply with the requirements of the law. The exclusion from the polls of voters so sensibly ignorant as this, whether they be in the north or the south, or whether they be black or white is far from being a public misfortune and is also far from constituting a defect in the new voting method.—Century.

They say that money does not bring happiness. This is an experiment, however, which every one wishes to try for himself.

Two Faded Portraits.

Lovers of the mysterious will be interested in this authentic story. Two years ago the portraits of President Harrison, Mrs. Harrison and Dr. Scott were reproduced in a group of glass. Several copies were made. Each portrait was colored and touched up by the artist who took the group. One of these pictures was given to a near relative of the president, who lives in Baltimore. The portraits were all good likenesses, and she prized them very highly. Here is where the mysterious part comes in: About three months before Mrs. Harrison's death the colors in her picture on the glass commenced to fade. When she died, only the head was visible, and that faintly.

Then the same phenomenon was observed in Dr. Scott's portrait. It began to grow dimmer and dimmer until only the head remained. Dr. Scott died within a few weeks of his daughter's. The curious part of the matter is that President Harrison's portrait stands out as clear and strong as it did on the day it was finished. The same colors were used on all these portraits, and there is no apparent reason why one should not last as long as the other.—New York Press.

THE LAND OF PROMISE.

Is the mighty West, the land that "ticked with a hoarse laugh a harvest" the El Dorado of the mine; the goal of the agricultural emigrant. While it teems with all the elements of wealth and prosperity, some of the fairest and most fruitful portions of it bear a harvest of malaria reaped in its fullness by those unprotected by a medicinal safeguard. No one seeking or dwelling in a malarial locality is safe from the scourge without Hostetter's Stomach Bitters. Emigrants, bear this in mind. Commercial travelersjourning in malarious regions should carry a bottle of the Bitters in the traditional grip-sack. Against the effects of exposure, mental or bodily overwork, damp and unwholesome food or water, it is an infallible preventive. Constipation, rheumatism, biliousness, dyspepsia, nervousness and loss of strength are all remedied by this genial restorative.

"You're sweet enough to eat," he cried, at which her heart turned cold; For she was a missionary fair, And he was a cannibal bold.

THEY SOOTHE—NEVER IRRITATE.

Some people have a prejudice against plasters, because, as they think, they burn and blister. That is true of many, but not of Alcock's Poreus Plasters. They never irritate the skin, but always have a soothing effect.

They are useful in case of any local pain, and a rule will bring immediate relief. If they do not, it is because the trouble has not been allowed to become so serious that no external remedy will reach it, and the chances are that any treatment will fail.

For stitches in the side, weakness or lameness of the back, stiffness of the joints Alcock's Poreus Plasters have been proved again and again to be not only a relief, but a cure.

BRANDRETH'S PILLS are safe to take at any time.

Beggar—Will you give me a dime? I am starving. Billings (hurling past him)—So am I, and I'm going to be late for dinner if I don't look sharp.

HOW'S THIS!

We offer One Hundred Dollars reward for any case of catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHEER, Toledo, O.

We, the undersigned, have known F. J. Cheer for the last six years, and he is a perfectly honorable in all business transactions and financially able to carry out all obligations made by their THE Wholesale Druggists, Toledo, O. WALKING, KINNAN & MARVIN, Wholesale Druggists, 709 Broadway, N. Y. City.

HALL'S CATARRH CURE is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all druggists.

A COMPLETE RECOVERY.

D. E. Coughanour writes from Quartzburg, Idaho, of the complete recovery of Mrs. Coughanour from rheumatism. She had been troubled for years, and had suffered great pain, often being unable to walk. Happy over his wife's relief, he tells about it as follows:

QUARTZBURGH, IDAHO, August 20, 1894. N. J. Stone & Co. (Caldwells Rheumatism Cure, N. Y. City.) Gentlemen: My wife took three bottles of your cure, which almost cured her. I saw her three more for her. She took one of these, and then was perfectly well. The remaining two bottles she gave to a woman who could not walk and who cured her. My wife had suffered for six years with rheumatism—sometimes so badly that she could not walk. Yours, D. E. COUGHANOUR.

The price of the medicine is \$5 per package of three bottles. For further particulars apply to N. J. Stone & Co., Flood Building, San Francisco, Cal.

DOCTOR'S BILLS SAVED.

Mineral Pond, Tuscarawas Co., Ohio. Dr. FRANK, Buffalo, N. Y.

Dear Sir—I am glad to say that the use of your "Golden Medical Discovery" has saved me many doctor's bills, as I have for the past several years, been suffering from chronic constipation. I have also been using it for the relief of my rheumatism, and am glad to say that it has done me much good. I have also recommended it to many of my neighbors, as it is a medicine worth commending. If it is a medicine worth commending, I am glad to see that you have a receipt for it. JOSEPH SMITH.

PIERCE Guarantees a CURE OR MONEY RETURNED.

The "Discovery" purifies, vitalizes and enriches the blood, thereby invigorating the system and building up wholesome flesh when reduced by wasting diseases.

BISHOP SCOTT ACADEMY.

FOUNDED 1870. A boarding and day school for boys and young men, under military discipline. Seventh (177) year under present management will open September 18. Academic preparation for colleges and all scientific schools. Commercial Courses. ATHLETIC, PREPARATORY AND PRIMARY DEPARTMENTS. For Catalogue and Full Particulars.

J. W. HILL, M. D., Principal, P. O. Drawer 17, Portland, Or.
