

HOME PRODUCTS BANQUET DRAWS CROWD AT GYM

CIVIC LEAGUE DINNER BIG SUCCESS

BUY AT HOME ADVISED

Speakers Emphasize Importance of Using Home Made Articles— Creamery Business Shows Big Growth, Report By Director.

Practical demonstration of the best way to bring out a representative attendance of the Commercial club membership for an evening session was given Thursday at the Woman's Civic league home products banquet at the gymnasium. Nearly 150 were present, and agreed that "Made in Oregon" viands, prepared under the supervision of Oregon women, can't be beaten.

The superiority of products made in the state was emphasized throughout and, as a novel introduction, an Oregon product not on the menu appeared. Riding on a large tray, carried by Charles W. Erskine, two-year-old Lloyd H. Magill, jr., wearing little in addition to his birthday clothes, gravely surveyed the applauding crowd as he made the circuit of the tables.

Urges Women to Buy in Bend. Speaking on the subject, "Why is a Commercial Club?" L. Antles, secretary of the local organization, noted with satisfaction the revival of civic interest in Bend, and declared that this city is known as having the biggest commercial club in Oregon for the size of the town.

"Ask for home-made and home-grown articles when you do your shopping," was the advice given the women in the audience by Mrs. Carrie D. Manny, president of the Civic league, in her address on "The Housewife's View of Home Trading." She pointed out that the merchant's part in mutual cooperation is to make sure that the articles he carries in stock are the equal of those to be obtained from points outside of Bend.

Creamery Payroll Grows. E. E. Butler, director of the Central Oregon Farmers' Creamery association, sketched the history of the creamery, showing that any profits go back into the price of cream, and that last month \$5000 was put into circulation in the form of cream checks paid to farmers. For the first time, he said, Bend-made butter is being shipped out of town. Eight thousand pounds were produced last month, and the creamery has a capacity of 15,000 pounds, he said.

"No food will take the place of butter, and no butter will take the place of Deschutes Gold butter," he concluded.

A cow, modeled by Mr. and Mrs. J. F. Arnold from Bend-made butter, was commented on by the speaker.

"Trade in Trade in Truth vs. Barter and Bunk," was the subject developed by Carl A. Johnson, who opened his remarks by stating that The Shevlin-Hixon Company has always purchased the product of the Farmers' creamery.

Mail Order Buying "Bunk." "Bunk" in selling is largely in the form of leaflets and catalogues from mail order houses, he said. "Your home merchant, on the other hand, is always here, and ready to stand back of his goods," the speaker declared. "Catalogue shopping is always uneconomical in the end."

Mr. Johnson urged that buyers and merchants get together on a basis of mutual understanding. "If you have a kick, or think you have, go direct to the merchant with it; give the merchant a chance to explain."

A wholesale grocery for Bend was a need that was pointed out in conclusion by the speaker.

The character of Bend's citizenship is a home product, the value of which cannot be too highly emphasized, H. H. De Armond, the last speaker, pointed out. It means the future of the community," he said, adding that "a city which has a citizenship like our need have no fear of Bolshevism or kindred evils."

Oregon Films Contribute. Musical features of the evening were excellent vocal solos by Dr. L. W. Gatchell, with Mrs. R. S. McClure at the piano, and by Miss Gene-

vieve Wagner and Charles G. Wilson, with Mrs. K. E. Sawyer as accompanist. Mr. Wilson's solo was the recently adopted Oregon state song.

The home products menu represented contributions from the Palace and Beaver meat markets, R. K. Hudson, the American bakery, the Bake-Rite Sanitary bakery, the Pacific Fruit & Produce Co., the Bend Dairy store, the Logan Candy Co., and the Riverside Florists of Bend; and Wadham & Co., Dwight, Edwards Co., Allen & Lewis, Wadham & Kerr Co., and Mason & Ehrman Co., of Portland.

COUNCIL IDEAS ON ORDINANCE SHOW VARIETY

Two men on the Bend city council favor allowing the ordinance proposed in initiative petition for the establishment of the woman's protective division to go to a popular vote, one member favors passage by the council, and three express no opinion. These were the results of a poll of council members taken last week. Those who favor a popular vote would also have an alternative measure embodying the council's plan for the solution of the problem, vague hints concerning which have been thrown out from time to time, appear on the ballot. This plan, it is unofficially stated, has as its feature the placing of the burden of protecting the city's morals on the Salvation Army rescue department.

Says Delay Wrong. "The question should never have been laid over at all," J. S. Innes declared. "I would rather that the people should vote on the proposed ordinance and on the alternative measure, and have the matter cleared up, once and for all."

"I believe that the proposed ordinance should be put to a vote of the people, with the alternative measure," N. H. Gilbert said. "It seems to me that the Salvation Army could handle the situation very well indeed, working in cooperation with the juvenile court."

C. J. Leverett had an opinion on the subject, but doubted the wisdom of making it public. "I may get out a circular explaining my stand," he added, referring to the dodgers which he distributed outlining his platform preceding the election.

Not Criticized, Says Fox. "I know what I'll do, but I don't care to say," Lon L. Fox answered when the question was asked of him. "I haven't talked with the other members of the council about it."

Referring to a report that he had been taken to task by a member or members of the council for seconding the motion made by H. E. Allen, providing for the continuation of the division under Mrs. Emerson Stockwell to all for a month's investigation, Mr. Fox stated that there had been no criticism. He had seconded Mr. Allen's motion merely to bring the question to a vote, he said.

Mr. Allen was the only member of the council who favored direct action by the city fathers on the ordinance, passage of which is sought by initiative. "The council should pass the measure," he declared. "I see no use of mixing it up with an alternative plan if the question must be passed on for a popular vote."

"I haven't made up my mind," declared G. H. Baker, president of the council. "You can't take a pot shot at the question while it is still under investigation."

HAMILTON SPEAKER AT WASCO BANQUET

Responding to an invitation extended by The Dalles Chamber of Commerce, R. S. Hamilton, president of the Bend Commercial club, was a guest of honor at a community banquet given last night in the Wasco county seat. Because of the fact that Bend has just completed a successful campaign for a greater commercial club, Mr. Hamilton was asked to give an address on "How Bend Puts Things Over."

Frank Branch Riley shared the program with Mr. Hamilton.

POTASH DEPOSIT INSPECTED. B. F. Millard, mining operator for the past 22 years in Alaska, is on his way to inspect a potash deposit, situated nine miles southeast of Fort Rock, in the interests of a Swedish concern, which has an option on the property.

Should the inspection prove satisfactory, development work will be started at once, stated Mr. Millard. The product will be used for commercial fertilizer.

SILAGE VALUE IS EMPHASIZED

UNION COUNTY AGENT SPEAKER

Many Crops Adaptable, P. H. Spillman Tells Farmers—Will Take Place of Higher Priced Feed For Beef Cattle, He Says.

Silage is going to be the basis of cattle feeding in the state of Oregon, declared P. H. Spillman, county agent of Union county, in his address Friday morning to Deschutes county farmers who attended the last of a series of lectures on agricultural subjects, given by experts from the O. A. C.

He based his assertion on figures taken in various counties in the state, showing the difference in the cost of feeding silage and hay, as compared with that of grain and other foods, and also from experiments which have been made in Union county during the past few years.

One of the features of silage feeding, declared Mr. Spillman, is that it is possible to use almost any sort of crops raised in the country, such as sunflowers, cornstalks and cuttings from along the edges of irrigating ditches, which would not be used ordinarily, and he stated that he knows of instances where silage-fed stock has commanded the highest price on the market.

Experiments Show Value. During the experiments carried on at the Union county station, Mr. Spillman stated that, in a feeding period of 120 days, cattle that were fed an average of 23 pounds of silage and 29 pounds of hay a day showed a gain in weight of slightly over two pounds daily, and compared favorably with cattle in other states that had been fed grain.

He declared that experiments have proven that grain-fed cattle cannot be raised for market at a profit, owing to the high cost of feed, and in addition to being cheaper, silage feed showed almost the same results as cattle fed on corn and grain.

Mr. Spillman stated that five years ago there were five silos in Union county, and today there are 150, showing that the farmers in that section consider silage as the best stock feed to use.

Lectures on Storage. Sulphate of ammonia is the best fertilizer to use on new potato ground, Professor Hyslop stated in his Thursday afternoon's lecture.

Where ground has been seeded to alfalfa and clover, good results are obtained by using sulphur and lime plaster, he said, and barnyard manure is also beneficial.

He stated that in order to secure the best results, the ground should be well prepared before the seed is planted and that after it had begun to grow, care should be taken to weed out any plants that show the least sign of disease.

On the subject of storage of potatoes the speaker pointed out that it is necessary to store the tubers dry, and that they should be kept at a temperature of between 36 and 38 degrees.

Use Perforated Flue. A good system to use, he said, is to have a perforated flue placed in the center of the pit, and pile the potatoes around it, thereby allowing the escape of the heat generated.

When possible, he advised that the potatoes be placed on a false bottom, made of slats. Studding around the pit, which will enable the air to circulate through the potatoes, will prevent them from rotting, he added.

Professor Hyslop answered questions regarding farm products in general, told of the experiments being carried on at the college in the use of ensilage and advised that the farmers write for any information they need and for pamphlets, which are issued each year.

Among those attending the lecture were L. J. Soeberger, L. E. Lindsay, Almus Neff, J. C. Block, H. B. Richter, Bonnie Tekampe, H. G. Soitong, F. A. Schaefer, G. T. Murphy, H. Marchand, G. L. Moore, R. G. Hunsley and Glenn H. Slack, all of Bend; O. P. Dahle, George M. Erickson and Rolla Chase, Grange Hall; V. F. and C. E. Lindsay, Plainview; George Holton, Deschutes.

HE SAYS IT IS JUST FINE. Robert Gibbs, 156 Colfax St., Lexington, Ky., writes: "My wife and I have been using Foley's Honey and Tar for some time. It is just fine."

It checks colds, stops coughs, cuts phlegm and relieves croup, whooping cough and in gripe coughs. If you don't get Foley's you don't get the genuine. Sold everywhere.—Adv.

Put it in The Bulletin.

QUALITY OF DESCHUTES COUNTY POTATOES PRAISED BY EXPERT FROM O. A. C. IN LECTURE HERE

That the Netted Gem, the potato most extensively grown in Central Oregon, is the best variety on the market today was the declaration of Professor George H. Hyslop, Oregon Agricultural college faculty member, in his address here before Deschutes county farmers. Professor Hyslop stated that he had made extensive trips over all this section, and had found that the soil is particularly well adapted for this variety of potato.

Professor Hyslop spoke of the favorable reports he had heard in different parts of the state regarding the potatoes raised in Deschutes county, because of the almost complete absence of diseases common to potatoes in other sections, and advised that the potato growers be careful in the selection of the seed used in order that this reputation may continue.

In speaking of the methods that have been successfully used in planting, Professor Hyslop advised that the potato should be cut into pieces from one and one-half to two ounces in weight, of a blocky shape, each piece having from two to three eyes, and that the blossom end be left entirely whole, being the best part of the seed. From 12 to 16 bushels of seed should be planted to the acre, he said.

BEND REPRESENTATIVE WINNER IN POPULARITY VOTE IN HOUSE

(Special to The Bulletin.)

SALEM, Jan. 28.—Stenographers in the present legislature have been carefully looking over the members of both houses. They found it difficult to decide as to who the handsomest member might be. Finally they took a vote among themselves and the important question was soon settled. By almost unanimous agreement they decided that Representative H. J. Overturf was the handsomest man, and now that this great question has been decided, the girls are wondering if Mr. Overturf is married. Mr. Overturf takes his new honors modestly and it not giving out anything for publication on the subject.

Much discussion ensued in the senate when Senator Smith attempted to smother a bill introduced by Senators Staples, Farrell and Hume, providing for the regulation of drugless doctors and creating the Oregon board of drugless examiners, by requesting the adoption of the minority report rather than the majority report of the committee on medicine, pharmacy and dentistry.

The bill presented by Senator Hume, denying recognition to graduates of private, denominational or parochial schools, has been defeated through indefinite postponement.

Hume's second bill in the senate, forbidding the wearing in the public schools of the state of any garb indicating adherence to any religious order, was laid on the table.

The bills, it was declared by members of the educational committee, which had reported them out ad-

versely, were evidently aimed at the Catholic church, although this has been denied by Senator Hume, who asserted that they were merely representing an attempt to protect the public schools of the state from the injection of religious propaganda, regardless of its nature.

A third bill by Senator Hume, raising the standards of private, denominational and parochial schools above the eight grade to comply with the standards obtaining in state schools, was reported out favorably by the educational committee and is now on third reading.

In the house, Mrs. William S. Kinney of Clatsop county presented a bill to provide for service of women on juries, on request of the Portland Woman's club.

"In criminal cases the trial jury shall consist of 12 persons, unless the parties consent to a less number, and in all cases in which a minor under the age of 18 years is involved, either as defendant or complaining witness, at least one-half of the jury shall be women."

The Rogue river fish bill passed the house without trouble and with an almost unanimous vote. This is the first time in the history of the legislature that such a bill has passed without a good, stiff fight having been put up.

Under the terms of a proposed law introduced in the senate by Senator Banks of Astoria, every pupil in public grade schools in Oregon would be furnished free books. The bill states that free text books should go to grade schools alone, and not to students in the high schools.

INITIATIVE PETITION DEFINES PROTECTIVE DIVISION'S DUTIES

Work of the Woman's Protective division, reestablishment of which has been urged during the past few weeks by the citizens of Bend, is defined in the initiative petition now being circulated, providing for the enactment of an ordinance by popular vote covering this question.

The ordinance contained in the petition is as follows: "Be it ordained by the people of the city of Bend:

"Section 1. There is hereby created and established the Woman's Protective division, to be operated and maintained as an adjunct of and supplement to the police and health departments of the city of Bend.

"Section 2. The Woman's Protective division shall be in charge of and directed by a woman who shall be appointed by the mayor immediately upon the adoption of this ordinance and thereafter at the first regular meeting of the common council after its election, who shall be superintendent of the division, and shall be under the general direction, advice and counsel of a committee consisting of the mayor and the chairmen of the police and health committees of the common council, and shall serve until her successor is appointed. No woman shall be appointed superintendent of the division who has not for at least six months preceding been a resident in and citizen of Bend.

ent of the division, and shall be under the general direction, advice and counsel of a committee consisting of the mayor and the chairmen of the police and health committees of the common council, and shall serve until her successor is appointed. No woman shall be appointed superintendent of the division who has not for at least six months preceding been a resident in and citizen of Bend.

"Section 3. It shall be the duty of the Woman's Protective division: "(a) To work for the protection of women and minor children, who, because of environment, employment, habits or other causes, may become delinquent;

"(b) To cooperate with the state board of health, the juvenile court and similar departments of other cities in assisting women and minor children who are delinquent.

"(c) To make available to the proper officials such facts as it may

WOULD WALK THE FLOOR ALL NIGHT

Engineer Crossy Gains Fourteen Pounds and Nervous Are Now Strong as Steel.

"Tanlac has built me up so that I have not only gained 14 pounds in weight, but I am feeling as well and strong as I ever did in my life," was the statement made recently by H. L. Crossy, a well known engineer, living at the Matsonia apartments, corner of Post and Leavenworth streets, San Francisco, Cal.

"At the time I began taking Tanlac I was in a bad fix, and had been ever since I had the 'flu' back in September, 1918. I had lost 28 pounds in weight, felt good-for-nothing all the time and was so weak I could hardly do my work. For months I never knew what a good night's rest meant, and I was so nervous I would jump out of my chair at the slightest noise. My stomach was so upset I couldn't eat a single meal in peace, for as soon as I had finished I would blow up with gas and feel so tight and stuffed-up I thought I would choke to death. Many a time I was in such pain and misery I walked the floor all night long, and finally I was told that an operation was my only hope.

"But I made up my mind to first try Tanlac, and in no time I was feeling better, and already I have taken on 14 pounds of my lost weight and am still gaining right along. My nerves are as strong as steel and I am sleeping eight solid hours every night. I wish everybody could enjoy their meals like I do now, for I can eat anything and everything I want and digest it without a particle of trouble. The pains and gas have all disappeared and I can breathe as free and easy as ever before. Tanlac has made me all over again and the remarkable thing about it is that it has done it in shorted time than I ever thought was possible."

Tanlac is sold in Bend by the Owl Drug Co., in Sisters by George P. Aitken, and in Bend by the Horton Drug Co.

have obtained in the pursuit of its work evidencing the violation of any ordinance or law.

"(d) To cooperate with the city physician in enforcing the laws relating to venereal diseases.

"Section 4. The superintendent of the Woman's Protective division shall be paid a salary of one hundred and twenty-five (125.00) dollars per month, and shall be supplied with a suitable office, and shall be allowed to incur such other expenses as may be necessary for the proper performance of her duties.

"Section 5. All ordinances or parts of ordinances in conflict herewith are hereby expressly repealed."

HEAD AND HIDE OF BUCK SOLD

\$119 ADDED TO RED CROSS FUND—BIDDER PRESENTS TROPHY TO THE CIVIC LEAGUE TO BE SOLD AGAIN.

For the use of the Red Cross in alleviating suffering in Bend, the head of the buck recently seized by District Game Warden Earl B. Houston brought \$119 when sold at auction at the close of the home product banquet at the gymnasium. The venison had been sold for \$44.90, the money being devoted to the same use, making a total of \$163.90 for charitable purposes. The last bidder, C. S. Hudson, presented his newly acquired property to the Civic league. This organization sold the head and hide to the Emblem club.

Last night's auction was conducted by Carl A. Johnson.

Mrs. V. A. Forbes, home service secretary for the Red Cross here, expressed the gratitude of the organization to all individuals and firms whose assistance in disposing of the buck made possible the substantial additions to the fund for charitable work.

M. J. SCANLON HERE ON INSPECTION TRIP

On one of his trips of inspection, M. J. Scanlon, vice president of the Brooks-Scanlon Lumber Co., arrived in Bend last week and remained for several days. While in the city he was a guest at the home of H. K. Brooks, general manager for the company here.

A GOOD THING TO KNOW

Foley Cathartic Tablets are a genuinely wholesome physic—an ideal laxative. They keep the system fit and fine, purged of poisons and ready to resist disease. Miss J. Hunter, 1260 Stedman St., N. S., Pittsburgh, Pa., writes: "I cannot praise Foley Cathartic Tablets too highly for what they have done for me." Sold everywhere.—Adv.
