FARM BUREAU AIMS

Expert advice as to the best method of establishing a community of interest between city and country was given recently to the Bend Commercial club by F. L. Ballard, assistant state leader of county agents. In brief, he suggested that the club familiarize itself with the program adopted by the county farm bureau, then let it be known that the club is ready to assist at any time that such assistance is desired in carrying on this program.

Here is the line of action mapped out by the Deschutes County Farm bureau for the present year. It is a campaign broadly comprehensive, and at the same time strengthened by definite detailed aims. It is one which the Bend Commercial club, or any other civic organization, need have no hesitancy in endorsing:

Poultry project—Culling demonstration.

Potato project—1. Seed certification. 2. Fertilizer trials.

Cooperative shipping of livestock.

Cooperative marketing—Pooling orders for seed, sulphur, etc.

Irrigation—1. Development of projects of Deschutes county. 2. Cooperation in laying out field irrigation systems.

Rural finance—1. Crop reports. 2. Cost account systems.

Rodent control—1. Sage-rat poisoning. 2. Rabbit poisoning.

Dairying—1. Better and pure-bred stock. 2. Bull associations. 3. Cooperative purchase of pure-bred stock.

Livestock—1. Feeding demonstrations. 2. Cooperative purchase of pure-bred stock.

Silos and silage—1. New silos. 2. Silage crops.

Bees—1. Cooperative purchase of supplies. 2. Demonstrations.

MAKING MONEY WORK

The New York Evening Post in its financial columns expresses the belief that the treasury savings movement is a medium for mobilizing the country's idle dollars and putting them to work. Under the caption, "Putting Idle Money to Work," in a recent issue of the Evening Post, its financial commentator, "The Investor," said the following:

"Idle money in a period of credit stringency is just as great an economic waste as idle labor in a period when there is work for all hands to perform. The treasury department is trying to convince workers that it is to the advantage of industry and, therefore, of labor in general, especially now that there is so much unemployment, to have every idle dollar put to work in the form of investment. The new thrift campaign has much good material to work on. It should not be difficult, for instance, to show workers how a busi-

ness revival is dependent on the credit situation and how an easier money position will be realized sooner if the supply of money is increased by the investment of all idle capital. What goes into the savings banks is 'doing its bit,' but the treasury is going after the millions of dollars which are hidden away in sugar bowls, stockings, mattresses—lost to use. Every investor and taxpayer, no matter how large or small, is interested in the success of this latest drive to gather small amounts of capital into the treasury in return for savings certificates or for the smaller units—thrift stamps and savings stamps."

MAILING EARLY

In the last few years, criticism of postal service has become common, but while the department head under the last national administration was getting the blame, the men and women who handle the mails, members of the National Federation of Post Office Clerks, were evolving a plan for better service, a plan which would give critics an opportunity to aid in improving the system criticized.

In a circular sent out by the clerks' organization, business men are told that they can help in the interests of prompt and accurate distribution by signing letters at noon and at frequent intervals thereafter, by depositing mail frequently during the day, by mailing circulars and relatively unimportant mail in the morning, by "facing up" (with stamps the same way) if there is a large quantity of letters, and by keeping long and short letters separate.

The early mailing practice is probably the most important feature, insuring early dispatch and delivery but all the items of advice given by the clerks are in the interest of greater efficiency and are worthy of consideration.

SHIRT CUFF NEWS

When you visit Washington these days you hear much more about the farms than formerly. We presume that this is because of the activity of the farm organizations and the increasing importance of the Department of Agriculture. Any way, a reporter recently jotted down some facts and news on his shirt cuff that came to him by chance during a day spent in Washington. Here they are:

American farmers own 200,000 automobiles.

"Ultraclay" is the name of a new substance found in soil by scientists.

Department of Agriculture is suspicious of clover seed imported this winter.

Agricultural Department has discovered the cause of "rot rot" in corn.

Sugar substitutes, like dextrose will be allowed in curing hams and bacon.

Uncle Sam has eight million farms; about one-third are over 100 acres.

The farmers have over 21,000,000 horses.

Bureau of Soils has now surveyed one-third of the United States.

Agricultural Department is about ready to announce a method of saving fruit and vegetables on railroad cars from freezing.

Rhode Island lost one-third of its farms in the last ten years.

Perhaps all these facts are not news to farmers but we'll bet most of them are.

AIR VS. SEA FIGHTERS

They have been having a terrible time down in Washington over the question as to whether the giant battleship or the airplane is the better man.

A certain number of sky ship men insist that the day of the battleship is over; that the military airplanes, with their high explosive bombs, will be able to sink the best of them. Therefore, no more battleships should be built.

The navy experts all deny this. They say it will be many years before the airships will be able to destroy a swift, armored, skillfully maneuvered battleship, if ever. So the navy department is going ahead with its plans.

The other day there was a test of the skill of the military airplanes. The old battleship Indiana was towed out to sea, anchored and abandoned. The air captains began to drop their smartest bombs on her. When they were all through the Indiana still floated triumphant. Of course, her deckworks were ripped up a bit and she was a wreck above board. It must be remembered also that there was nobody on board her to oppose the air bombardment with anti-aircraft guns.

Some people never know when they have enough work. In accepting the position of councilman, H. E. Nordeen seems to have qualified for this class. Sometimes, though, it's the busiest who find time to do just one thing more.

The resolutions passed by the Rod and Gun club may mean much in safeguarding one of the greatest attractions which Central Oregon has to offer the tourist.

TO EXPLORE OCEAN'S DEPTHS

British Government Contemplating an Expedition for the Gathering of Scientific Information.

The British government is contemplating the dispatch of a deep-sea exploring expedition which is expected to gather much valuable scientific information.

Most people imagine that the depths of the ocean have been pretty thoroughly explored, but this is very far from being true. As a matter of fact, only a very small fraction of the whole area of deep sea bottom has been surveyed. Attention is particularly called to a vast subaqueous region around the Falkland Islands and up as far as Montevideo, which is almost unknown, and which, having a depth of less than 100 fathoms, may offer opportunities for the development of lucrative fisheries.

The first deep-sea exploring expedition, that of the famous Challenger, was set on foot just 50 years ago. The ship left port in 1872, and idlers on the subject were in those days so primitive that there was dispute as to whether she should use wire or hempen rope for soundings. It took a whole day to make one sounding, or a single cast of the dredge for bringing up fishes and other animals.

Since then deep-sea sounding apparatus has been much improved by cable ships, and fishing gear has been greatly modified by steam trawlers, which use dredges. Besides, a great deal that is of value has been learned by oceanographic expeditions subsequent to that of the Challenger. Hence the new exploring vessel will start out with a prospect of accomplishing a very great deal of work of real importance.

Fifteen Years Ago

(From the columns of The Bulletin of March 9, 1906.)

The Methodist people of Bend and the vicinity have organized into a church society and will hold preaching services here every two weeks.

R. B. Mutzig is building a large feed shed on his lots on East Oregon street, in block 15.

The Columbia Southern Irrigation company is beginning to push construction work on its segregation west of the Deschutes.

F. S. Stanley, who has been spending several days in Redmond this week, has donated \$500, to be used for premiums for a fair at Redmond this fall.

The Oregon Railroad & Navigation company is making preparations to receive bids for ties to be delivered on their right of way on the line surveyed southward from Madras through Redmond and Bend.

The railroad surveyors moved to Rosland Tuesday and expect to be here about three weeks.

Montell Coe left Bend yesterday for San Francisco.

Mr. and Mrs. John Ryan spent the first of the week in Prineville.

A. C. Lucas has erected a fine new sign before the Pilot Butte Inn.

NATIVE TRIBE LITTLE KNOWN

Tehuacanas of Patagonia Have Many of the Characteristics of North American Indians.

Many are the strange and interesting native tribes that are found in the Americas. Among the most interesting are the people of the ostrich, who inhabit an almost as yet unknown country, and in language, and character, and race, are altogether distinct from other Indians, says an article on "People of the Ostrich" in Boys' Life. They live in the remote and almost legendary regions of the "land of large-footed men"—a land, that like Chili, Peru, Mexico, and northwest South America, has its story of the existence of a hidden city among the unexplored wilds of their Cordilleras.

The Tehuacanas of Patagonia, that vast peninsular end of South America, are scattered across it, from the Straits of Magellan and the Rio Negro—a territory of over 1,000 miles in length and 300 at its narrowest. A brave, active, athletic people, wonderful horsemen, singularly expert with their weapons and implements, who lead a wandering life, and hunt the wild cattle, the guanacos—and ostriches. For Patagonia is a home of that splendid bird, which was there ages before men crossed its path in the faraway wilds of the interior. To the Tehuacanas, this fine bird is as important in their existence as the guanaco, for they are a race of hunters, and grow but little food for themselves.

PREACHES FROM AN AIRPLANE

Minister With Many Parishes to Cover Puta Modern Mode of Travel to Good Use.

No tolling church bells announce to the little communities scattered through one section of America's great Northwest the periodic Sunday morning arrival of the region's most enterprising itinerant evangelist. Instead, they hear the coughing exhaust of an engine, as his airplane spirals down upon the village. Drawn irresistibly by the novelty of the visit, they flock to the airplane, now at rest in a nearby field or meadow. They find the preacher on his feet in the pilot's cockpit of the plane "Sky Pilot," ready to begin his discourse.

Explanation of this strangest of all the airplane's uses is found in the evangelist's decision, some months ago, that the time and energy required for constant travel among distant parishes was seriously curtailing his effectiveness. He decided to defy all precedent by allying aeronautics and religion. He first subjected himself to a rigorous course of training, and became an accomplished airman. He then purchased his plane, selecting a three-seater of sporting type. The rear cockpit seats the pilot, and serves as his pulpit when the meetings are held in the open; the forward cockpit accommodating his two assistants, one of them a song leader.—Omaha Bee.

Women Crave Excitement

The wife of a very wealthy man was arrested with a group of bandits after a pistol battle with the police, in which the woman was shot in the arm. She is a woman who has traveled, is educated and bears every evidence of refinement. The police say that there are many women of this kind who work with thieves unbeknown to their families. The call of adventure is the prime motive. In a raid on an East side wine cellar recently ten men and one woman were taken to headquarters in a patrol. All the men had criminal records. The woman is happily married to all appearances, and is a patron of the opera. She said the men and women in her set were dull and that she liked to get out and mingle with the men who lived by their wits and were not afraid of dangerous paths.—New York Times.

The Glory of the Oleanders.

This bright morning we looked from the roof of our veranda, and our neighbor's oleander-trees were glowing like a great crimson cloud; and we said, "There! the oleanders have come back!" No nothern ideas can give the glory of these trees as they raise their heads in this their native land, and seem to be covered with great crimson roses.—Harriet Beecher Stowe.

GILSON WANTS FRANCHISE FOR WATER SYSTEM

(Continued from Page 1.)

the Women's Civic league. Among routine matters disposed of was the passing of improvement and sprinkling assessment resolutions.

Under the disposal of claims against the city, bills from A. G. Long for fire equipment, were held for further investigation. The two bills in question, amounting to \$2,075.75, were incurred early in the second year of the last administration, Councilman Fox, chairman of the ways and means committee, declared.

Bills Ordered Paid The following bills were ordered paid: Baker's Express.....\$ 4.25 J. H. Buchholz, police dept.... 13.00

Spring Is Here

Now come the Pigs—the Calves—the Colts—and the Lambs.

TIME for your work horses and mules to shed their winter's coat.

—TIME to tone them up—give their systems a spring house-cleaning—and drive out the worms.

Dr. Hess Stock Tonic

A Spring Conditioner and Worm Expeller

Your COWS that have long been on winter feed need the system-toning, bowel-cleansing, appetizing effects of Dr. Hess Stock Tonic. Puts them in fine condition for calving. It means more milk.

Your BROOD SOWS will be relieved of constipation and put in fine fettle for farrowing by a course of Dr. Hess Stock Tonic,—which means healthy pigs, and a mother with an ample milk supply to nourish them.

Your SHOATS will be greatly benefited by a course of Dr. Hess Stock Tonic. It drives out the worms—stimulates the appetite and makes them thrive.

Feed it to EWES before lambing time. It prevents fevered udders and scouring lambs. Feed it after lambing time to stimulate the flow of milk, insuring lambs for the early market.

Dr. Hess Stock Tonic contains Tonics for the digestion, Laxatives for the bowels, Diuretics for the kidneys, and Vermifuges for the worms.

Why Pay the Peddler Twice My Price?

BEND, OREGON

To Our Depositors and Others:—

Better times are just ahead. Depositors who have been unable to increase their reserves during the last three months, or who have been forced to decrease them, will shortly start building up their accounts again. Those who were not depositors will realize as they never did before, the value of a savings account to carry them through a period of rainy days.

The rainy days of business and industry are nearly over. It's time to make plans for an era of prosperity. Habits of thrift will play an important part in making those plans effective. Decide to start that savings account at the first possible opportunity. One of the Central Oregon Bank's safe type or dime savings banks will help you to keep your dollars, working for you.
