WORK IS HARD ON ARTISTS

Singing into the Recording Horn Conceded to Be a Nerve-Racking Experience.

Music is a lot trickier to can than peaches or pears, remarks Farm and Fireside.

When you play one of your phonograph records you have no idea how hard it may have been to get that melody "preserved." You are listening to the result of a lot of mighty hard work, which may have included considerable storming by the director and tears on the part of the artist. Some artists simply cannot sing for the records at all, while others are nervous wrecks for days after a session of recording.

To sing into a recording horn may look easy—just as it may look easy for a baseball player to hit a ball over the fence for a home run—but in reality it is one of the most difficult, nerve-racking things anyone can attempt.

On the concert stage a singer with a good voice may make little mistakes without the audience noticing them. If he has an attractive presence and an engaging manner, he may even sing a bit off key and yet make a hit. But the wax master record is a relentless mirror, with no mercy for the imperfections that the average artist—like other human beings—is guilty of. The slightest waver or strain in the voice, the slightest deviation from the true pitch, comes out badly. And the very fear of making these mistakes and flaws "hoodoo" most singers into making them.

WAS HURTING ALL THE TIME

Kidney trouble saps vitality and strength. It causes backache, headache, stiff joints, sore muscles, shooting pains. John F. Brooks, 712 S. 17th St., Omaha, Neb., writes: "My back was hurting me and I had a pain in my right side. Since taking Foley Kidney Pills I feel no pain at all." Sold everywhere.—Adv.

EXPERIMENT WITH SALTING METHODS

Experiments to determine the best and most economical method of salting stock in the forest are being conducted by officials of the Deschutes National forest. Authorization of the experimental work has been received from the district headquarters.

INQUIRY MADE INTO LAKE TITLE CHANGE

U. S. Geographical Board Takes Interest In Commercial Club Request For "Lake Bend."

Inquiry in regard to the desired change in the title of Lost lake to "Lake Bend" was received here Monday by Postmaster W. H. Hudson, from Secretary C. S. Sloane of the U. S. Geographical board at Washington. The blank form for reply was turned over to the Commercial club, which recently passed a resolution to petition for the change in name.

Crude Methods of Defense.

Pueblo Indians were never warriors, but in the old days they were subject to frequent attacks by the wandering tribes, such as the Apaches and the Navajos. Therefore many of the crude adobe houses were built with port-holes up near the roof, which the occupants used to defend themselves from the attackers. Many of these old houses are still standing, and port-holes are still there, just as they were years and years ago. Of course they are all occupied, for no new houses were built unless there is an absolute necessity for them.

Japan's Fight on Hydrophobia.

The Japanese are inoculating dogs instead of people to prevent rabies, which is now "widespread" in that country, says the New York Evening Post. The bacteriologist Umeno and his coworkers at the Kitasato Institute for infectious diseases have perfected a method of prophylactic inoculation that can be given the dogs in one or two shots. In all, 31,000 dogs have been treated and in not a single instance has any one of them been found suffering from rabies. Instead of the usual methods of killing mad and stray dogs, the Japanese medical experts are advocating inoculation of all the dogs of Japan.
