Why Have Tired Feet?

NATURE shapes our feet for walking and standing—provides the necessary flexibility and strength. If your feet tire easily it is not because Nature has failed, but because you have crippled and weakened your feet by forcing them into shoes of unnatural shape.

Give Nature a chance to remedy your mistake. Put your feet into Educators—they let the feet grow as they should. Compare and see how good-looking they are. For your protection remember, unless the shoe is branded EDUCATOR on the sole, it is not an Educator.
