Inquire Observer or Secretary August Roosens at the place. 43-4tp

## TRANSFUSE OWN BLOOD TO 2

Eastern Physicians Save the Lives of Two Patients by Novel Operations.

Lives of two patients who would otherwise have succumbed from internal hemorrhage were saved by draining off their own blood and reinjecting it, in a rare operation, made at the New Haven hospital, according to a dispatch to the New York World. One of the remarkable transfusion operations was performed on a woman by the staff in obstetrics. The other was by the surgical staff, upon a man apparently mortally injured in an automobile accident.

The woman, according to the announcement, suffered from a severe abdominal hemorrhage from which patients rarely recover. Quick work was required by the obstetrical staff. The hospital blood expert was summoned the blood drawn from the abdominal cavity, the wounded vessels tied and the blood almost immediately filtered and re-injected into the dying woman's veins. The effect was almost instantaneous.

An hour afterward the male victim of the automobile accident was brought to the hospital in an ambulance with a punctured liver, resulting in abdominal hemorrhage. An operation was decided upon. The wound in the liver was mended by the use of rubber, a familiar operation.

The blood was then drawn from the abdominal cavity and re-injected to the man's veins after filtration. In both cases the citrate method was used, that is, citrate was added to the blood to prevent coagulation.

**One More Look.**  
On our return to the locker room a young woman with one shoe and stocking on was distractedly going from locker to locker and finally appealed to us.  
"Has any one an extra stocking in her locker?"  
"Not in mine," we answered after searching our lockers in turn.  
Imagine my embarrassment when I found the missing stocking in my bag.  
—Chicago Tribune.

## Aurora Lutheran Church

There will be no services next Sunday, as the church can not be used on account of the painting. The rededication service has been postponed till November 18, when Rev. L. Ludwig will preach in the morning, the Revs. Aug. Krause and Geo. Koehler in the afternoon, and Rev. O. Butenschoen in the evening. Further announcements later. Choir practice Sunday evening at the parsonage.

Wm. Schoeler.

## UNJUST RESULTS OF MONEY PLANS

Unsound Currency Gives Sellers Unfair Advantage Over the Producers.

EXPERT EXPLAINS MONEY

Points Out Dangers in So-Called Energy Dollars—Other Plans Exposed.

How demagogues are using false doctrines of so-called "sound money" to give themselves or the class they represent unfair advantages at the expense of real producers is exposed in the Journal of the American Bankers Association by H. Parker Willis, expert on the money question.

"There is no subject in whose name more crimes against truth have been committed than that of 'sound currency,'" Mr Willis says. "The term is always resorted to by demagogues. At the present moment there seems to be a danger that it will be used by a potential presidential candidate as representing the 'platform' upon which he expects to run. There is no question that more nearly and directly touches the immediate welfare of every class in the community."

**Purpose of Money**  
Primary functions of money and currency, it is explained, are to serve as a means of exchanging goods and as a means of measuring the value of goods. Mr. Willis continues:

"Demagogues and those who are disposed to mislead the public for various ulterior reasons have succeeded in disseminating an entirely different view of the purpose of money. Some of them contend that the soundest or best currency is that which is so arranged as to bring about a 'fair' redistribution of wealth. They want a constantly depreciating currency—one which keeps playing into the hands of the seller of goods, by enabling him to count confidently upon higher prices in terms of money so that he pays the producer from whom he has obtained them less and less. IT IS A STRANGE THING THAT THIS KIND OF CURRENCY IS OFTEN HIGHLY PRAISED OR FAVORED BY THE PRODUCER HIMSELF, NOTWITHSTANDING THAT HE IS THE GREATEST SUFFERER FROM IT."

**Energy Currency**  
There is another popular view of sound currency which aims to base it upon "natural products" or "natural forces"—usually it is true, specifying products or forces which have been monopolized or can be controlled by the advocate of such currency. Thus from time to time there have been schemes to issue a currency based upon or protected by farm products stored in warehouses or occasionally representing "units of energy" or horse power.

The rulers of Soviet Russia at one time attempted to introduce a currency representing "labor time," each man receiving a check representing the number of hours of time he had put in at work, while goods themselves were to be valued in terms of hours of production time. Thus one man who put in an hour's time in street cleaning received the same control over goods as he who put in

an hour's time at surgery. The theory was that this kind of "sound" currency enabled the "poor man" to get a larger supply of goods.

"The trouble was that when those who could perform a certain kind of labor were not paid in proportion to their effort they stopped making goods. So it was not very long in Russia before the sound currency which was issued in favor of the poor man had brought it about that the poor man could not buy anything with the currency. This was an unfortunate kind of 'soundness.' We do not want something like it in the United States today, yet very similar proposals are now being made in a good many quarters that ought to know better," says Mr. Willis.

## DISEASE TERRORS PASSING

Theory Advanced That Germ Species May Die Out as Did Mammoths and Dinosaurs.

Is it not likely, speaking as a layman and without medical erudition, that germ species originate, grow to maturity, then pass on to senility and die out, like so many families of creatures have done on this earth? The last Methuselahs of certain diseases may now be moving on to oblivion. Did not the mammoths and the dinosaurs rise, flourish and disappear? Then why not the microscopic terrors that menace mankind?

Yellow fever is passing beyond the horizon. It is waving its last saffron farewell to us. Soon it will be history only, its battles with humanity, its successes, as remote as those of Semiramis or the Babylonian kings. Finding no place to lay its fatal finger, it will give up the ghost.

Typhoid, dislodged from its last country well and village drains, has become a fugitive, pursued by health boards who bombard it with serums and germicides. It is in full flight. It cannot pause anywhere to organize the smallest epidemic. The seed of it will perish from the earth.

**Why Worry.**  
"Serenity of mind is the most valuable asset of the present age," declared Senator Lodge of Massachusetts recently. "It is the only way to keep young, the only way to preserve health and, while we laugh at the mad Sarah, we really should envy her."

"Sarah had just resigned her position to get married and when her mistress learned that she was shortly to go to Canada and make her home there, she asked:  
"But Sarah, aren't you rather nervous about going into a strange country like that?"  
"No, madam," answered the girl. "That's my husband's lookout. I belong to him, and if anything happens to me it'll be his loss, not mine."

## Radio Wave Fourteen Miles Long.

Long wave lengths are used to cover great distance, such as transatlantic communication, chiefly because absorption of energy is much less on long wave lengths than on short ones. The big station near Bordeaux, France, sets a wave of ether in vibration that is 23,000 meters in length, or approximately fourteen miles from crest to crest. When Broadcast Central on Long Island flashes a message 4,000 miles across the sea to Germany, the wave length used is about twelve miles long. Station NSS at Annapolis, broadcasting time signals from 3:55 to 4 a. m. daily, has a wave length equivalent to about ten and a half miles. Poz, Nauen, Germany, radiates a wave approximately eight miles long.

## Pacific International Live Stock Expositonal Finishes Production

The Pacific International Live Stock Exposition has finished its program of days. It is as follows:

Saturday, Nov. 3—Children's Day, and all school children are admitted free of charge on that day.

Sunday, Nov. 4—Chiapparelli's band of 40 pieces will give two classical sacred concerts, and the exhibits will be in place and can be viewed.

Monday, Nov. 5—This has been named Fraternal Society and Civic Club Day, and all the activities of the exposition start. Horse show in the evening and during the remainder of the week.

Tuesday, Nov. 6—Governor's Day. Four or five governors are expected. This is also Editor's Day.

Wednesday, Nov. 7—Farm Bureau and Grange Day. The former organization holds a convention in this city that day and the day following.

Thursday, Nov. 8—Washington Day. Excursions are expected from Puget Sound and other parts of the Evergreen State.

Friday, Nov. 9—Oregon Day. Similar excursions are looked for from various points in the Willamette valley.

Saturday, Nov. 10—Portland Day.

## Now Senate Lacks Octogenarian.

The death of Senator William P. Dillingham of Vermont removes from the senate rolls the last octogenarian. And on March 4, when congress adjourned, there were three.

Senator Page, also of Vermont, who was eighty last January, retired on that date.

Knute Nelson of Minnesota, three weeks younger than Page, died in May on his way from Washington to his home.

And Dillingham, midway in his eightieth year, died early in July.

Removal of these octogenarians from the senate leaves Francis E. Warren of Wyoming, now one month past seventy-nine, the oldest member. Next comes LeBaron Colt of Rhode Island, seventy-seven; then Albert B. Cummins of Iowa, a youngster of seventy-three, third; Lodge of Massachusetts, three months younger than Cummins, fourth.

## Save His Money.

An Irishman boarded a car the other day, but after a word with the conductor made for the door again.

An inspector who happened to be on the car said to him: "Surely you don't want to get off again so soon, and besides, you haven't paid your fare."

"Oh, I want to go to Southern street," said the Irishman, "and the conductor says there ain't no such place."

"Well, there isn't," answered the inspector.

"Then, faith, an' pwhat's the good of going there, then?"

## NEW Overland CHAMPION

**\$695**  
F.O.B. Toledo

America's Only Versatile Car

Front and rear seats adjustable forward and back for tall and short people.

50 cu. ft. for farm truck, luggage, etc., by removing rear seat and upholstery.

Both seats and upholstery make into a full sized bed in the car for camping.

The new Overland Champion is the first all-purpose car! Doors front and rear! Washable upholstery! Steel body! Bigger new engine! Overland quality, reliability and economy! Come in—get complete details!

**HUBBARD GARAGE CO.**

Hubbard, Oregon.
