IONE ITEMS.

Mr. Sims and family left for their home near Viola, Idaho, last Friday. They own a small fruit farm there and are anxious to get back. They have been living at Ione for the past few months and have made many friends. Mr. Sims ran the dray for his son-in-law, "Shorty" Calkins.

Say, we want one of "them there" Moral Squads down here too. It has been rumored that Larry Londergan is willing to accept the presidency and that Frank Engleman has consented to be general manager.

MORAL SQUAD NOTES

By the Secretary.

Tom Morgan has taken to the woods to get a few days much needed rest from his arduous duties as member of the Moral Squad. Tom said before leaving that it would be a violation of the U. S. Postal laws to send some of Heppner's residents Morals and the Squad through the mail and that A. Farm Hand would have to call on Pruitt Cox personally for the Squad.

Prof. Hoffman refused to accept Al Slocum's mantle, saying that the weather is too hot to interfere in anybody else's business. Al has returned from his Washington trip claiming that the legal business is poor over in that state. He has asked to be reinstated to his old place in the organization.

Dr. Dye's dog is now the mascot of the Squad. He is of a very peculiar build and breed and Dr. Prentice has ordered that he be fed nothing but macaroni. Justice Cornett objected to taking the dog in because he can't bring his cat to the meetings.

Ralph Yeager, Dr. Prentice and Dr. Dye were representatives of the Squad who inspected hotel accommodations at Ione during the celebration. Everything was found satisfactory.

Claud Andrews, the conductor, has bid in this run and is on the job. He has a home in The Dalles and his family will live there unless he decides to move later to Heppner.

CITY COUNCIL MEETING.

The regular meeting of the city council was held Monday night and all were present except Oscar Minor. The main event of the evening was the provision made for a night watchman and policeman. This office was created for three months and will have a salary of \$60 a month. This is certainly a wise move as there are too many people working during the night that should be better employed in the daytime.

The usual liquor licenses were granted, seven in number. The reports of the Marshal and the Recorder were read and approved. The Treasurer's report was referred to the Finance Committee. The Council opened the city's purse and donated \$500 to the Fair. The current expenses and bills for labor were allowed. The following is the list:

INDUSTRIES and INDIVIDUALS

Men and Businesses With Whom Prosperity and Success are Associated in This County.

By E. G. H.

It is a matter of common observation that a man who has not traveled much is not widely educated. Emerson said that travel was a fool's paradise. There is a limit to travel, however, specially if you have to hold down a job and have no vast amount of ready cash. We are, nevertheless, getting acquainted with the world. The quick mails, the telephone, the telegraph, the talking machine and the cinematograph are bringing the world to you and its wonders file past as if you were a Roman Emperor perched high on your Imperial throne. I was in Missouri not long ago and there the people ask for the visual

CASTLE ROCK NOTES.

Fire that threatened to wipe out the town of Castle Rock was started in the pasture of Mike Marshall last Thursday and it was only by the heroic work of Jerry McDade, Mr. Boardman and Mr. Weston was it stopped about a quarter of a mile from the edge of town.

Charley Marshall is improving rapidly.

Mr. Weston and John Marshall went across the river to visit Mr. Marvory last Saturday.

Mr. Weston is now riding about in a new buggy.

The following people went to Arlington to spend the Fourth: Mr. and Mrs. Mike Marshall, Catherine and Bob Marshall, Jimmy Kernan, and John McDermot.

Mrs. Barr and son, George, were Sunday visitors at Castle Rock.

Tom Brew was in Castle Rock on Sunday.

Mr. Poston and son came across the river Sunday.

Charley Marshall and sister were in Heppner on Tuesday having his shoulder cared for by the doctor.

The Fair Board had a meeting at Lexington this morning. J. L. Wilkins, John Vaughn, Mayor Smead and Rev. Goulder were present from Heppner. They decided to telephone Mr. Freytag to come and assist in planning the arrangement of buildings which will be started at once. A meeting is planned to be held in Heppner on next Monday but this is not settled for certain. Everything has been progressing well and Morrow County will have a banner fair this year.

demonstration—"show Me." The motion pictures satisfies our desires because it shows us. The customs, habits, and ways of the world which it shows is great and far reaching for good.

Mr. J. B. Sparks has a motion picture house in Heppner. Mr. Sparks is a mechanic by prenatal disposition. He operated a machine for the People's Amusement Co. of Portland. We are told that he was industrious, took an interest in the business and for his strict attendance to business was paid more than the average operator. Later he traveled with a motion picture machine and visited many towns. When he came to Heppner he was so impressed with the prospects of a permanent show that he decided to locate. There were some who said that he couldn't make it pay. Some said that he was becoming for the referee in bankruptcy and some had it even worse. This was three and one-half years ago, let me add.

His building is on the east side of Main Street and probably the best location in town. It is 25x80 feet and the stage opening is 16x17 feet. Ventilation was the thing Mr. Sparks was looking for. There are two windows and two doors on the north side, with a double entrance and a double door in the front. Five electric fans agitate the ether. 200 opera chairs in three divisions fill the room.

The operating room is Mr. Sparks' favorite spot. Here safely and conveniently are linked hand in hand. A 16-inch pipe takes the carbon smoke and heat out through the roof. All windows are tied with cotton cord and these are fastened directly above the machine and should this start a fire the cords would be the first to burn, thus dropping all the windows automatically. Two machines insure no breaks that would put the show out of business. These are arranged so that when one reel is shown the second follows immediately. Being operated by a small motor there is little vibration and a steady speed. All reels are rewound by the same motor with an attachment made by Mr. Sparks. A reel requires 16 minutes to show.

At the present time Mr. Sparks is showing the Universal program. Outside of what is known as the "Trust" pictures, the Universal pictures take a leading rank. These pictures were introduced because many patrons asked Mr. Sparks to give them a trial. They bring many new features, new actors, and are good pictures. The "Trust" pictures, however, will again be seen in a short time. These cost three times as much as any other pictures but nothing is too good for the people of this community and Mr. Sparks will see that they get it. There is a change of program daily. Three times a week, three reels are shown and twice a week four.

Besides the house in Heppner, Mr. Sparks operates a show at Ione. This opens three times a week except in the summer when it opens twice a week. This theatre will be remodelled soon and put into first-class shape. Mr. Sparks also states that when the electric current goes to Lexington he will put in an electric theatre there. Without electricity gas must be used and gas is not satisfactory.

One of the interesting pieces of machinery in the theatre is the electric piano. It plays the entire 88 notes, something that very few electric pianos do, and has a mandolin and wood pipe attachment. It plays pieces and rewinds itself. It can be started from the operating room.

I was in a school in Kansas City not long ago where they had motion pictures for the opening exercises. In the rear seats were a few men and I also noticed a few women with their aprons rolled up who evidently came in from the nearby houses to see the pictures before doing the morning's work. The Montessori system of education that we are hearing so much about has for its main proposition that everything that makes an impression on the child's senses is educating the child. An impression upon the brain through the sense of the sight is the easiest way possible to teach. It is the natural way to teach. There is fascination in motion—just watch the crowd before the show window where anything is being done.

Yes, we are getting acquainted with the world. A few years ago civilization was provincial. Only a few people were able to travel, see and know. The many were submerged in ignorance and superstition. The sailors who went around the world were natural fakirs. The stories that they told would make your hair stand on end. Read John Mandville.

The big thing about the motion pictures to many of us is that they are Jeffersonian simplicity and practical democracy. You slide in and out and the whole thing is free from frills, fads, and fussiness. It lubricates the wheels of existence, refreshes, stirs the imagination, brings into play a new set of convolutions and costs fifteen cents. One vote for the "movies," you boy with the tab.
