Seven Wise Men of Greece. By the expression, "The Seven Wise Men of Greece," is meant a number of men among the Greeks of the sixth century before Christ, distinguished for their practical sagacity and their wise maxims or principles of life. Their names are variously given, but those most generally admitted to the honor are Solon, Chilo, Pittacus, Bias, Periander (in place of whom some give Epimenides), Cleobolus and Thales. They were the authors of the celebrated mottoes inscribed in later days in the Delphian temple. These mottoes, with the name of the author of each, were: "Know Thyself," by Solon; "Consider the end," by Chilo; "Know thy opportunity," by Pittacus; "Most men are bad," by Bias; "Nothing is impossible to industry," by Periander; "Avoid excess," by Cleobolus; and "Suretyship is the precursor of ruin," by Thales.

**Lamb and Mutton.**  
The dividing line between lamb and mutton is not based wholly upon age; a well-bred and well-fed animal, 12 or 18 months old, may still belong to the lamb class, while a yearling of rangy stock, which has been poorly fed, yields meat of an inferior grade of mutton. The best grade of mutton consists of fat, heavy meat. Light and flabby meat is not very palatable. Lamb rarely is an economical meat to serve. The relative difference in food value between lamb and mutton is the same as between veal and beef. The meat should be of a deep red color and firm to the touch; the fat, creamy, white and solid. Mutton absorbs odors easily, so it must be kept in a cool place under proper conditions.

**The New Way of Practicing Dentistry**

**THE E. R. PARKER System in Dentistry is nothing but dentistry put on a common-sense basis. Instead of one man practicing in a small way in a small office, several dentists practice together under the Parker System in large offices, where there is room for complete equipments. Some of the System dentists extract teeth, some fill teeth, some make crowns and bridges, some make artificial plates and some treat diseased teeth. In this way each patient is cared for by a dentist who is experienced in the kind of work each patient needs. Dental work done in this manner is not only done better, but in less time, making fewer visits necessary, and the saving in time helps to make prices lower.**

There are twenty-four offices where the E. R. Parker System is used.

Portland, Ore., 326 Washington, Co. r. Sixth.

Under the Parker System no charge is made for examinations and advice. You can find out what your teeth need without having to pay a cent. Everything known in dentistry to overcome pain is used in Parker System offices, so you need have no fear at all.
