

For Thin, Poor Blood

You can trust a medicine tested 60 years! Sixty years of experience, think of that! Experience with Ayer's Sarsaparilla; the original Sarsaparilla; the strongest Sarsaparilla; the Sarsaparilla the doctors endorse for thin blood, weak nerves, general debility.

But even this grand old medicine cannot do its best work if the liver is inactive and the bowels constipated. For the best possible results, you should take laxative doses of Ayer's Pills while taking the Sarsaparilla. The liver will quickly respond, and so will the bowels.

Anti-Kissers in Mexico.
Civilization is spreading in Mexico. A little red button worn by some 300 women, old and young, married and single, in the city of Mexico, signifies membership in what is known as the Anti-Kissing League. Members of the league take a solemn pledge not to kiss each other, in public or in private, their contention being that kissing is contagious, or, rather, the means of conveying contagious diseases from one fair lip to another.

IN THE BEST OF HEALTH SINCE TAKING PE-RU-NA

IN POOR HEALTH. PAINS IN BACK. SICK HEADACHES. PE-RU-NA CURED

Mrs. Lena Smith, N. Cherry street, cor. Line, Nashville, Tenn., writes: "I have had poor health for the past four years, pains in the back and groins, and dull, sick headache, with bearing down pains. "A friend who was very enthusiastic about Peruna insisted that I try it. "I took it for ten days and was surprised to find that I had so little pain. "I therefore continued to use it and at the end of two months my pains had totally disappeared. "I have been in the best of health since and feel ten years younger. I am very grateful to you." Catarrh of the internal organs gradually saps away the strength, undermines the vitality and causes nervousness. Peruna is the remedy.

Conquest of the Great American Desert

The millions of acres of arid lands of the west already thrown open to the farmers by irrigation and the millions more to be thrown open, will, it is claimed by irrigation experts, open the way for the mightiest Anglo-Saxon settlement the world has ever known. It is estimated that about 50,000,000 acres of land in all, will be reclaimed by the government projects.

The work which the government is executing in constructing great stor-

IN THE COLORADO DESERT.

age and diversion dams and in building canals, laterals and headgates is the largest undertaking of the kind in the history of the United States.

The reclamation act provides that funds from the sale of certain public lands shall be applied by the government to the building of irrigation works. At the present time the fund amounts to about \$28,000,000 and is increasing at the rate of \$4,000,000 annually. This fund is self-sustaining. After the irrigation works have been

600 acres, almost half is in barley, 10,000 acres is in alfalfa. On the American side of the Imperial valley there are some 50,000 head of cattle a large part of which is dairy stock, and there are 10,000 head more on the Mexican side.

The Yuma project contemplates the irrigation of land on both side of the Colorado river in California and Arizona. The government has planned for the ultimate extension of the canals of the Yuma project twenty miles or more from the Laguna dam ten miles above Yuma to the Imperial valley. When this is done the most arid portion of America not excepting Death Valley will be all under irrigation and highly productive.

Although the government contemplates irrigation works for the benefit of homeseekers and endeavors so far as possible to undertake works with the view of bringing water to available government lands, yet in the event that individuals are willing to subdivide their lands and to sign a contract which will prevent land speculation and anticipating increased values through irrigation, irrigation works will be undertaken under the reclamation act where the land is in private ownership.

This is the case in the Salt river valley, Arizona, where a dam capable of impounding enough water to irrigate 200,000 acres of land will be constructed. The settlers in that section have gone ahead and accomplished marvels; the government is coming to their aid. In the Sacramento valley the land individually in large holdings, there being individual ranches of 100,000 acres in extent.

Thirteens on a Silver Quarter.
Superstition seems to be a part of the mental composition of everyone, and it commonly centers to a rooted antipathy to the number thirteen.

HEADGATE—CARSON RIVER CANAL, NEVADA.

constructed the sum expended in any work is to be returned to the government in ten equal annual installments by the settlers prorata. At the end of the first year after any one project has been completed one-tenth of the original amount expended on that work is to be returned and put into other projects.

Among the great projects of the government is the Shoshone project, Wyoming, which will irrigate 160,000 acres of public land; the Uncompahgre Valley project, Colorado, 100,000 acres; the

DROP ON THE IMPERIAL CANAL.

Belle Fourche project, South Dakota, 85,000 acres; the Salt River project, Arizona, 200,000 acres; the Malheur project, Oregon, 90,000 acres; the Hondo river project, New Mexico, 10,000 acres; the Fort Buford project, Montana and North Dakota, 60,000 acres; the North Platte project, Wyoming and Nebraska, 300,000 acres; the Minidoka project, Idaho, 130,000 acres; the Yuma project, Arizona and California, 500,000 acres and the Sacramento-Carson project, Nevada, 350,000 acres; the Klamath project, Oregon and California, 500,000 acres and the Sacramento valley project, California, 2,000,000 acres. Besides the projects enumerated which total is not less than 3,600,000 acres the engineers of the reclamation service are preparing surveys on a great many other projects which will be undertaken as rapidly as the fund expands and is returned to begin work.

The Yuma project on the Colorado river is of especial interest at this time because it is located close to the Imperial valley country on the Colorado desert where is located the largest irrigation works, either public or private, in the United States. Within four years 100,000 acres have been put under actual irrigation in the Imperial valley through the diversion of waters from the Colorado river. Of this 100,

This first of the teens has had to stand for many an action that was ridiculous, and yet there is hardly any persons who would sidestep an inch or mournfully rail at fate should he spy a silver quarter on the sidewalk. Have you ever taken the trouble to scan closely this small piece of silver? If you have not, you may be surprised to find on the eagle side that there are thirteen arrows in the bundle, which is clutched in the left claw, thirteen laurel leaves on the branch in the other claw, thirteen stars at his head, thirteen letters in the Latin inscription, "E pluribus Unum," thirteen letters in the word "quarter dollar," thirteen stripes on the shield, and on the front of the silver piece thirteen stars surrounding the liberty head and thirteen leaves in liberty's crown. This array of thirteen is in commemoration of the original thirteen States which comprised the Union—New York Press.

A Peril Nearer Home.
To Mr. Hippendyke, who had followed with absorbing interest the progress of the war between Japan and Russia, there was something sinister and terrible in the uniform success of the Japanese.

"I tell you, Flanders," he was saying to his neighbor on the other side of the backyard fence, "those fellows are going to make trouble for us all. The Japs have found out how strong they are, and they're teaching the Chinese. Some day there'll be a Chinese army of fifty million men, with Japanese officers. They'll take our possessions in Asia and they'll overrun the whole civilized world. That's the yellow peril we've got to face some time or other. You mark my words."

Just then Mrs. Hippendyke came to the kitchen door.

"Henry," she called out, in a high-keyed voice, "if you want to put a stop to the only yellow peril that's threatening you or me, you get after that yellow dog of Wilkinson's that's out in our front yard, digging up all my plants."

Not His Favorite Surgeon.
Gunner—You don't seem to have much faith in Dr. Lance as an appendicitis expert.

Guyer—Faith? Why, I wouldn't let him cut the appendix out of my dictionary.—Judge.

When we think of the ease with which we deceive others, we should think of the ease with which others may deceive us.

Prove It By the Oven Fire

Put the wonderful KC Baking Powder to the test. Get a can on approval. Your money will be returned if you don't agree that all we claim is true. You'll be delighted with the delicious, wholesome things that

ECZEMA A FLESH FIRE

Those afflicted with Eczema know more than can be told of the suffering imposed by this "flesh fire." It usually begins with a slight redness of the skin, which gradually spreads, followed by blisters and pustules discharging a thin, sticky fluid that dries and scales off, leaving an inflamed surface, and at times the itching and burning are almost unbearable. While any part of the body is liable to be attacked, the hands, feet, back, arms, face and legs are the parts most often afflicted. The cause of Eczema is a too acid condition of the blood. The circulation becomes loaded with fiery, acid poisons that are forced through the glands and pores of the skin which set the flesh aflame. Since the cause of the disease is in the blood it is a waste of time to try to cure it with local applications; the cause must be removed before a cure can be effected. S. S. S. has no equal as a remedy for Eczema; it enters the blood and forces out the poison through the natural channels, and builds up the entire system. The skin becomes smooth and soft again, and the Eczema is cured. Cases that have persistently refused to be cured under the ordinary treatment yield to its purifying, cooling effect on the blood. Book on Skin Diseases and any advice wished, without charge.
