(from the Enterprise)

Supervisor Brundage and Chief Ranger Mann, of the Columbia national forest, came in from the Lewis river last week bringing with them the crew of some 60 men used in fighting a bad forest fire in that section.

The fire covered an area of more than 7000 acres before being controlled and caused a damaged of \$58,000 to standing timber and new growth timber, says Mr. Brundage.

High winds of recent date proved costly to the orchardists of the Lyle district when a large part of the apples were shaken from the trees. C. T. Dewey, of this city, who owns an orchard in that district, reports that nearly half the crop was blown off.

A report from the Underwood section says that many apples in orchards on the heights were also shaken off. The percentage was not given, but the ground on the Geary place was covered with fine fruit as the result of the big blow of last Sunday. Other sections were not affected. As a result of the fine rains of the past week, the apples were growing in fine shape and the loss will be serious to growers who were affected by the high winds.
