THE UNIVERSAL CAR

"The proof of the pudding is the eating."

Quality

in a motor car is not a matter of looks nor of claims made by manufacturers or dealers nor of improvements that may or may not be experiments.

Quality

in a motor car is proven only by its duration of useful service—its methods of manufacture—its high second hand value—the standardization of its equipment—and its universal popularity.

Ford sales total more than 4000 each day.

CAR PRICES NORMAL SAYS EARL FRANZ

Earl Franz, manager of the Hood River Garage, says that automobile prices are back to normal. Mr. Franz says: "I have noticed that so many people consider car prices are not back to normal, but if a person will give the matter a little thought, he can arrive at the opposite. Take the Chevrolet, for a good example; it sold before the war at Hood River for \$625. Today this same car retails for \$675, or an advance of \$50. Out of this comes the advance in freight rates, which have almost doubled since that time, and the government tax that is added to each car. These alone bring the car down to its pre-war price. "On top of all this today's Chevrolet is a vastly different car than it was at the old pre-war price. With 22 improvements the new Chevrolet offers far more for the money than any car in this price class before. In fact when compared with the Chevrolet of pre-war days, a person at once comes to the conclusion that cars at today's prices offer more for the money than at any time during the history of the car industry."

GRAND OPERA IS ATTRACTING MANY

Portland is making extensive plans for presenting in a big, elaborate manner the season of grand opera to be staged at the Portland Public Auditorium by Mary Garden and the Chicago Grand Opera Co. March 22 to 25. With the box office sale of seats now on in Portland and with mail orders still pouring in from all over the northwest the success of the event which is to be the greatest in the history of the northwest, seems assured. The demand for seats has been so heavy that already a contract has been let for enlarging the seating capacity of the Auditorium by about 1,000 seats. This is being done by the erection of huge seat elevations in the side assembly rooms directly off the main floor. This will furnish 1,000 additional seats where the operas may be both seen and heard as well as in any part of the Auditorium and will increase the capacity of the building to about 6,000 for every performance. Plans have been made for special traffic regulations, street car, hotel and train service during the engagement, for the special benefit of the people coming in from out of the city.

BRIDGE OF GODS WORK UNDER WAY

Concrete will soon be poured for the piers of the Oregon abutment of the Bridge of the Gods, to be constructed across the Columbia river just below Cascade Locks, according to announcement by R. R. Clark, designer and engineer, who drew up the plans for the Bridge of the Gods corporation, the builders, with headquarters in the Chamber of Commerce building, Portland. "The Young-McDonald Company, contractors, are ahead of their program, despite the bad weather of the past weeks," said Clark. "They have completed test work as to foundation, and we are now able to proceed with pier construction on the Oregon side, as it has been proved by core hole tests that the original mountain of Indian romance, upon which the Oregon approach will rest, furnishes a first-class rock foundation. Everyone is much pleased with the progress being made." The contract of the Bridge of the Gods corporation with the contractors calls for completion of the piers on the Oregon side by June 5, but according to Clark, it is possible that the work will be through before that date.
