## WOMAN MAKES RECORD DRIVE FROM SOUTH

After one of the most thrilling motor car trips ever made between San Francisco and Portland, Mrs. Z. Kathleen Ayers, of San Francisco, was officially checked in at Portland with her 1922 Buick four-cylinder coupe, after having made the fastest time ever recorded for an automobile in this famous inter-city run. Mrs. Ayers sat behind the wheel and drove the Buick the greater part of the 725 miles, only occasionally being relieved by the official representative who had been detailed by the Howard Automobile Company to act as her escort.

The record is official in every respect, as the Buick coupe and its fair driver were checked out of San Francisco at 1.02 o'clock p. m. Monday, May 1 and were checked in at Portland at 11.45 a. m. Tuesday, May 2. The checking was done at both places by members of the local press, while the timing was done by officials of the Western Union Telegraph Company.

The total time consumed in making the inter-city dash, including the 35 minutes necessary to cross San Francisco bay to Oakland, was 22 hours and 43 minutes. This is a new mark for this trip, so far as Western Union records show, beating the best previous time made by automobile 3 hours and 8 minutes, as the former record was 25 hours, and 51 minutes, while the fastest schedule of the Southern Pacific Company's express train is 28 hours and 30 minutes, so the four-cylinder Buick coupe now holds the mark over rail as well as highway competitors.

Mrs. Ayers paid high tribute to the car which she drove. She said: "My four-cylinder Buick never gave me a particle of apprehension. Not a single stop had to be made for mechanical adjustments of any kind. It was the sort of a trip which would be a severe test for any automobile, irrespective of price or size of engine. Inasmuch as I have had considerable experience in driving many different makes of cars during the period of the war as a member of the Women's Red Cross Motor Corps, I feel that I am posted well enough to judge the merits of an automobile.

"The manner in which this four-cylinder coupe behaved was a revelation to me. Whenever I called on it for reserve power on the grades or in the tight places, the little car instantly responded and enabled me to come through with flying colors. It is one of the best and easiest riding cars I have ever handled. It is the ideal car for the woman driver.

## GUN CLUB NEWS

Last Sunday was the last regular prize shoot of the first three months' competition in the Hood River Gun Club. It was a very nice day to shoot, but for some reason, and for the most part, the most of the boys were unable to connect with the little clay saucers in a very satisfactory manner. Marshall and Ingram were the only ones that made worth while scores, Marshall making a straight run of 58 and Ingram a straight run of 25.

As to the prizes, Marshall finished first and won first prize in Class A with a final percentage of 96. Haviland won the prize in Class B with a final percentage of 82.5, and Carl Rand won first prize in Class C with a percentage of 82.4. There was no second prize awarded in Class C as no one else was competing. It is a lamentable fact that with all the Class C shooters that there are in the club, there was only one competing for the prize. The members will now all be reclassified and a new three months' series will begin the first of June, and if more of the Class C shooters don't get into this competition they are going to be missing a lot of fun for themselves.

Tomorrow night is the next regular meeting of the club, and a good attendance is urged.

## Fusion-Husbands

A pretty wedding was held at the St. Mark's Episcopal church Saturday morning, May 27, when Miss Esther R. Husbands became the bride of Wilbur Fuson. Only the immediate family were present. The bride is a Hood River girl, her parents, Mr. and Mrs. R. H. Husbands, being early pioneers of this city. The groom is a graduate of Hood River high school and of the Oregon Agricultural College and for the past two years has been a member of the high school faculty of Weston, Oregon.

Mr. Fuson comes of a pioneer family of Weston and has for several years been interested in wheat raising in that section of the state.

The couple left immediately for a motor trip. They expect to make their home on a wheat ranch near Athens, Ore., after about the first of August.

## W. L. Mason's Home Burns

News reached here Monday of the loss by fire Saturday night of the orchard home of W. L. Mason, of the Upper Valley. The fire is thought to have been started from a kitchen fire. Only a small amount of the furniture and household goods were saved. The loss, which will reach \$5,000, was partly covered by insurance.

## Company C Dance Success

One hundred couples attended the military ball given Tuesday night by Company C at the Pythian temple. The social function was one of the most successful held here this season. Music for the dance was furnished by Ford's orchestra.

## Virginia Apple Crop Light

Advice received here from W. F. Wagner, owner of a Willow Flat orchard place, who resides at Philadelphia, to the effect that the frost prevailed last month over Virginia cut down the year's apple crop in the commercial districts of that state by 70 per cent. Mr. Wagner wrote, however, that the peach crop of the state would be up to the 10-year average.

## Mrs. S. Hansen's Brother Passes

Funeral services for Harold Olsen, former Danish sailor, aged 25 years, who died Thursday at the home of his sister, Mrs. Stieg Hansen, of the Odell district, were held Sunday afternoon at the Anderson chapel. Interment followed at Idlewild cemetery. Rev. W. S. Gleiser, pastor of the Odell Methodist church, officiated at the service.

## Sewer Completed

The city has advertised completion of a new sewer in a Heights residence section on A street. The cost of the construction, which was done by C. A. Cass, will reach an approximate \$3,000.

Special prices on Utah King Coal direct from the car. Phone 2181. Emory Lumber and Fuel Co.

## LOCAL MEN OFF ON GOOD ROADS TRIP

Efforts may be made to raise funds here for aiding White Salmon, Glenwood and Yakima good roads enthusiasts in constructing a two-mile length of highway north of Glenwood. The short line, it is said, is the only obstruction that will prevent the proposed caravan of 1,000 automobiles of the Yakima orchard district from visiting the Portland Rose Festival by way of the Simcoe Indian reservation, the two Klickitat county points and Hood River.

C. A. Bell, Mark Cameron, Amos Benson and James Stranahan left yesterday to investigate the link of road. If the men find that it will be possible to open the short stretch before the Rose Festival, they say they have no doubt of raising a substantial sum here.

## Frost Hits Berries

While no general damage prevailed, reports from Dee and the Upper Valley Saturday indicated that isolated berry tracts where air drainage is not good suffered severely from frost Friday night. In the Dee district the most of the acreage was apparently not touched by the frost, while a few patches report a loss of 50 per cent. No frost prevailed on lower levels.

The Apple Growers Association has begun sending out express shipments of berries. Carlot shipments, according to A. W. Isbell, in charge of berry receipts, will start about June 12.

## Newell Resigns From City Post

E. E. Newell, city engineer the past year, has resigned his post because, he states, of the press of private business. Mr. Newell is engaged as engineer for several irrigation concerns here and in Klickitat county, Washington.

While no successor has been appointed to date, the council has announced that Carroll M. Hurlburt will receive the post.

Before you buy an automobile you should see the new Studebaker at the Cameron Motor Co. m41f

MOST MILES per DOLLAR

## Firestone CORD TIRES

The tire section above at the left shows the condition of a Firestone 33x4 1/2 Cord Tire after 20,994 miles on a Yellow Cab in Chicago.

The section at the right was cut from a new Cord of the same size. Careful measurements show that only 1/3 of the tread of the tire on the Yellow Cab has been worn away after this long, gruelling test. The carcass is intact after more than 11,000,000 revolutions.

Firestone Cords have averaged over 10,000 miles on Chicago Yellow Cabs (1,200 cabs all Firestone equipped). In thousands of instances, they have given from 16,000 to 30,000 miles.

Look at the tread—scientifically angled against skid, massive

and heavy in the center where the wear comes, tapered at the edges to make steering easy and to protect the carcass against destructive hinging action of high tread edges. The carcass is air bag expanded to insure uniform tension and paralleling of every individual cord. It is double "gum dipped" to make sure that each cord is thoroughly insulated with rubber.

This is the reason why Firestone Cords unfailingly deliver extraordinary mileage. It explains the unanimous de-

mand of thoughtful tire buyers for these values. The local Firestone dealer will continue to provide the personal service that makes Firestone tire comfort and economy complete.
