THE HUMAN HAND.

Its Relation to the True Education of the Young.

No animal or bird can endure the extremes of climate like man or if at home in so many different parts of the world. A dog, it is true, will follow man anywhere, but only when food and shelter are provided. Nor can any other creature subsist on such a variety of food as man can digest. He flourishes on roots, herbs, grubs, insects, fruits or fish, on which flesh eating animals would starve, or he is equally pleased with animal and bird flesh on which herbivorous animals would starve. He can pick nuts with the monkey, catch fish with the otter, dig roots with the wild pig, eat ants' eggs with the ant eater and grasshoppers with the snake.

And all this is due to man's hand. Because his hand could grasp a stone or a club man rose on his hind legs and walked and talked. His hand is the most wonderful of all tools. It twists like a monkey wrench, hangs on like a grappling hook, cracks like a nutcracker, picks like tweezers, tears like forceps, grabs like a grasper.

This brings us to the first great lesson of health and common sense. Man owes all to his hand. Train the child's hand, then answer the questions that the brain, which the hand builds, will ask, and you have true education—education at its best. Give children every kind of hand work that their play instincts call for—and their play instincts are the deepest and most useful in their nature—and then brain development will follow as naturally as the night follows day.—San Francisco Chronicle.

It Gets the Criminals.

According to the Chinese method of criminal prosecution, a man is responsible for the crime he may have committed personally, but if he chooses to escape justice by running away from the place where the deed was committed then the remaining members of his immediate family are held and punished in lieu of the real culprit. This may seem a strange way of attracting the real criminal back to the scene of his crime, but it appeals to the religious side of the man's superstitious nature. According to their religion, the man who forsakes his parents when in peril will find his soul sailing around through hades without chart or compass for all eternity. In view of this, compliance with the law is very prompt, for John Chinaman does not care to take the desperate chance.

He Explains.

"Why is it, professor," asked the young man with the bad eye, "that when Christopher Columbus discovered this country he didn't settle down and stay here?"

"Doubtless you are aware, my young friend," answered the professor, "that the Spanish form of his name was Cristoval Colon?"

"Yes, sir."

"Well, a colon does not mean a full stop. We will return now, young gentlemen, to the consideration of the lesson."—Exchange.

Makes Friends.

There is nothing so healthy as plenty of human nature about one, young, old and middle aged. When we stay at home too much or associate entirely with a very limited circle we lose the proper sense of perspective. The few individuals whom we like assume giant proportions in our thoughts and the rest of the world recedes.

Springtime is Here

Spring is here and right now is the time to make things grow. The trees and the bushes need pruning, the dead limbs should be taken off, and the garden and lawn will amply repay you for a little attention now. Good workmen use good tools, and those are the only kind we carry. Let us suggest GARDEN BARROWS, GARDEN and LAWN RAKES, SPADES, SPADING FORKS, SHOVELS, TROWELS, PRUNING SHEARS, SAWS and SPRAY PUMPS. Briefly, everything to make the lawn, garden and shrubbery beautiful for the coming year.
