Vanite Beats the Resolute

Vanite, the privately built candidate for defender of the America's cup against the challenge of Sir Thomas Lipton, has beaten the Resolute, the official candidate of the New York Yacht club, in the first trial races in Long Island Sound. So much time and money had been spent by the

3,000,000 Roses Used at Annual Festival

**United Press Service**  
PORTLAND, Ore., June 10.—It was estimated that more than 3,000,000 cut roses were used in the decorations of the floral parade held here this afternoon in connection with the annual rose carnival festival.

The parade consisted of hundreds of the smartest pure bred horses, owned by members of the Northwestern City Hunt Clubs, supplemented by nearly 1,000 handsomely bedecked

Owing to unusual natural conditions, there was a heavy fall of mud throughout a large section of country near the city of Tiflis, in Russia. A snowfall ran into a heavy windstorm, which had picked up huge clouds of dust from the Baku district. The two combined produced a dark gray mud, which fell so thickly as to stop trains in some places.

Street cars run by gasoline motors have proved successful in Baroda, the capital of the native state of India. They are both rapid and cheap.

Germany Is Making a World Circling War for Business

Kaiser's Commercial Activities Are to Invade Every Country and Port, According to Plans of Project

By KARL H. von WIEGAND  
(Berlin Correspondent of the United Press)

BERLIN, June 10.—Germany is launching the most tremendous war for trade conquest of modern times. Organization upon organization in every branch of trade and industry is being formed with a definite, specific plan and purpose of capturing a new market, extending trade already in existence or crowding out the trade of some other country.

The captains of Germany's industry are planning a movement that in effect is a leaf from the famous aggressive tactics of the German army applied to the peaceful conquests of the world's markets.

At home efforts are being concentrated on ousting foreign made goods and replacing them with domestic manufacture wherever possible, while abroad Germany's commercial guns, backed by the vast resources of the empire, government and private, are to be trained on every market, especially where American, English and French trade may now enjoy an advantage.

Germany has set for itself the task of doubling its export and import trade, which at present is approximately \$5,200,000,000. It has chalked up the figures \$10,500,000,000 as a trade target at which to aim.

Like the famous "Grosse General Staff" (Great General Staff) of the German army, which has every move outlined and planned in advance for war, so the German captains of industry are mobilizing the economic forces of their country, not defensive but offensive, for world conquest.

Organizations which have been at loggerheads for years are being induced to drop their differences and join in one united, gigantic crusade against America, England and France. Within the last few weeks there has been organized the "Institute for Sea Traffic and World Trade," "The League of German Foreign Trade Associations," "The German-American Economic Union," "The German-China Institute," and now as a sort of general staff to scientifically direct all the other organizations, there is being formed the "German Association of World Commerce." This latter is headed by Arthur Ballin, director-general of the Hamburg-American Line, whose motto is "Mein Feld is die Welt" ("My field is the World").

The markets of the world are being plotted out for these different organizations like a gigantic battle map. The German-China Institute, composed of the industries which have trade in China or see the possibilities of trade for their respective branch

of commerce or manufacture, will command and direct the "divisional commercial army" which is to develop and capture China's trade for Germany. It will include among other colonial trade organizations the powerful German-Asiatic Company, the Hamburg East-Asiatic Concern and the German Colonial Company, with millions of dollars back of them.

Among the outlined plans of the campaign for invading China are the establishing and financial support of a chain of German-Chinese elementary grammar and high schools, manual and industrial training schools and medical institutes, teachers for all of which are to be sent from Germany.

German newspapers are to be founded in several of the principal cities of China. Wherever possible, German language institutes are to be opened to give the Chinese an opportunity to learn German at small cost.

The sending of Chinese students to Germany is to be encouraged and supported. In fact, every possible effort is to be made to win the sympathy of the Chinese for Germans, Germany and German goods.

There is a German-Argentine Association, a German-Brazilian organization, each of which is to further relations, interests and trade with these South American countries. For the purpose of concentrating and unifying the efforts of these organizations for a more aggressive and scientifically directed campaign in South America, there has been formed the "League of German Foreign Trade Associations."

This organization of captains of industry will be another "divisional German staff." Its principal battlefield will be Mexico and South America. It also will organize propaganda in every country not already covered.

The German-American Economic Union, organized since February, has for its purpose the fostering of better trade relations with the United States and Germany, of course, the furthering of German exports to America. Each of the organizations named will have much to say about the reciprocal trade agreements with the different countries in the trade of which they are specialists. They will examine all new proposed trade treaties and make suggestions to the government.

"The Association of World Commerce" will be the general headquarters and central directive agency of all the other organizations. One of its principal missions will be to hunt down and counteract the alleged "slanders" on German trade by French, English and American rivals.

A sort of "intelligence department" will be one of the subdivisions in the World Association. Through the association it will keep every German manufacturer minutely posted on trade conditions in all parts of the world, so that quick and prompt advantage can be taken of opportunities offered to counteract any moving by foreign rivals.

IF IT'S STORMY, IF YOU'RE TIRED OUT, IF YOU WANT TO SAVE TIME,

**Underwood's Pharmacy**  
Corner Main and 7th Streets, Klamath Falls, Oregon

**WHITE BREAD**  
Sponge Method  
Try the following recipe prepared by Professor Joseph Becker, the world's greatest chef. Professor Becker made a careful test of CRATER LAKE Flour for us, and we guarantee results if his directions for its use are followed:  
One cake Fleischmann's yeast, 1 1/2 quarts lukewarm water, 2 tablespoonfuls lard or butter, 1 tablespoon salt, 4 1/2 quarts sifted Crater Lake flour, 2 tablespoonfuls sugar. Dissolve the yeast and sugar in one quart of the lukewarm water, and add to it 1 1/2 quarts of sifted Crater Lake flour, or sufficient to make an ordinary sponge. Beat well. Cover and set aside to rise for about 1 1/2 hours in a warm place. When well risen add to it the pint of lukewarm water, lard or butter, the remainder of the flour, or enough to make a moderately firm dough, and lastly, the salt. Knead thoroughly, place in greased bowl. Cover and let rise for from 1 1/2 to 2 hours. When light, mould into loaves and place in well greased baking pans, cover and let rise again for about an hour. When light, bake 40 to 50 minutes, reducing the heat of the oven after first 10 minutes. This recipe makes four large loaves. The whole process takes from 5 1/2 to 6 hours, and if followed closely, will produce excellent results.
