Conqueror of Warsaw and the Happy Germans Entering City

Prince Leopold of Bavaria led the victorious Germans into Warsaw, the largest city thus far taken in the war. But the way was made for him by the hard work of General von Hindenburg on the north and General von Mackensen on the south.

Warsaw had 872,478 population in 1911, and has been called the most beautiful city in Eastern Europe. It is a great manufacturing center, especially of iron and steel, and is situated in a fertile plain noted for its immense wheat production.

In medieval times it was the chief entrepot for the trade of the valleys of the Pilica, Wisla, Narew and Bug rivers with Western Europe.

The city is the most important so far taken in the war. But the Russian armies escaped, and they will reform within Russia for further attacks on the Germans.

It is connected by railroad trunk lines with Vienna, Kiev, Moscow, Petrograd, Danzig and Berlin. The date of its foundation is unknown, but it was possible in the ninth century. It is not mentioned in history, however, until 1224.

It has many times been conquered and reconquered, and has been the scene of many bloody battles and uprisings. It has been held by the Poles, Sweden, Russia, Prussia, the French under Napoleon, Austria and again, since 1813, by Russia. The University of Warsaw has 1,500 students, and a library of 500,000 volumes.

Expert Tells How to Rid Grain Land of Mustard

Clean Cultivation to Prevent Seeding Is Best. Fall Discing Advised by O. A. C. Expert

By H. S. HAMMOND Botanist, O. A. C.

Where fields are infested with wild mustard the land should be worked up with a disc or spring tooth harrow after the grain is harvested to cover the seeds and induce germination. The plants resulting may be destroyed by fall plowing or freezing, preferably by fall plowing in this region. The fields should be cultivated reasonably early in the spring and before the crop is sown, if grain is raised, to kill any plants that may have started. If the cultivation can be kept up until late in the spring many of the young plants will be destroyed. A liberal seeding of grain should be made when the soil is well prepared, so that growth may be quickly made and will fully cover the ground. If the mustard starts in the grain many of the young plants may be destroyed by harrowing with a light spike-tooth harrow. If scattering plants appear they could be pulled by hand. If in spite of the careful preparation of the land, the field should still be badly infested with mustard, the plants may be destroyed without injury to the grain by spraying.

The injured plants appear to recover and the mustard is killed or prevented from seeding. Showers soon after spraying may require repetition of the spray. This will kill or injure practically all plants of the mustard family if applied on the foliage. It is especially to be recommended when the weed infests wheat and oat fields. Of the iron sulphate (copperas) solution, 15 to 20 per cent solution, (60 to 80 pounds in 50 gallons of water) may be employed, as the chemical is cheaper, though less active. Wild mustard is one of the most troublesome weeds because of its persistent seeding habit and the endurance of the seeds when buried in the soil. It is most common in fields that are devoted exclusively to grain, and disappears when a system is introduced which provides for grass and cultivated crops. The vital point in the process of eradication is to prevent the seeds maturing and shattering out.

KEEP URIC ACID OUT OF JOINTS

TAKES RHEUMATISM SUFFERERS TO EAT LESS MEAT AND TAKE SALTS

Rheumatism is easier to avoid than to cure, states a well known authority. We are advised to dress warmly; keep the feet dry; avoid exposure; eat less meat, but drink plenty of good water.

Rheumatism is a direct result of eating too much meat and other rich foods that produce uric acid which is absorbed by the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly cold weather the skin pores are closed, thus forcing the kidneys to do double work, they become weak and sluggish and fail to eliminate the uric acid, which keeps accumulating and circulating through the system, eventually settling in the joints and muscles, causing stiffness, soreness and pain called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.

Jad Salts is inexpensive, harmless, and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Here you have a pleasant, effervescent lithia-water drink which helps overcome uric acid and is beneficial to your kidneys as well.

Even a King can't dictate what you should like or not like

If it so happened that *Fatimas* were originally "made and blended for the King of Whatis"—would that fact prove that you were going to like *Fatimas* best? It would not.

A man's taste is his own. A cigarette that might delight some old potentate's palate would not necessarily please you.

That's why we leave *Fatimas* up to your taste.

But there is something more than good taste that is mighty important to you. No matter how good-tasting a cigarette may be—it can only be the SENSIBLE cigarette for you if it is comfortable, too.

Its pure tobacco must be cool and comfortable to your throat at all times. And it must leave you feeling fine and fit at the end of a hard-smoking day.

Will it do all that? Then, it is the sensible cigarette for YOU.

There are thousands and thousands of men who believe that *Fatima* is the most sensible cigarette there is.

Try them yourself. You may discover—as these thousands of other men have—that *Fatimas*

have just the cool, mellow taste that you've been longing for in a cigarette.

You may find that *Fatimas* have the kind of mildness which allows you to smoke more of them than you might of other cigarettes.

You may find that *Fatimas* offer you a little more satisfaction in every puff than you ever before found in any other cigarette.
