In buying milk there is only one way in which you can be sure that you get a germ proof product, and that is by insisting on pasteurized milk. We are the only dairymen in Klamath Falls who pasteurize milk and cream. One morning's trial will convince you of its superiority.

KLAMATH MEN TO BECOME WEALTHY ON INVENTION

MOULDING MACHINE ORDERS TOO MANY TO FILL

Former Proprietors of the Klamath Iron Works Close Up Shop Here and Spend all Their Time in Turning Out a Few Machines for California Foundries—Will Let Contracts in East—Cost \$4,000 Apiece.

E. O. Beardsley and W. F. Piper, formerly proprietors of the Klamath Iron Works of this city, have been in Stockton engaged in rush orders for the moulding machines of which they are the inventors, and on which they received patents from the government several months ago.

The two partners worked here on the machine for about two years before they were able to perfect it to any degree of success, cutting the original weight of the machine down to 7,000 pounds, several times less than their first model.

Mr. Beardsley then went to California to make a machine or two to sell. He had no more than started work, however, than several firms in Stockton grasped the importance of the machine, and offered him their plants and equipment to set to work and turn out as many of the machines as he could in as short a time as possible.

As a result, several of the machines have been under construction at the Geiger Iron Works and the Holt Manufacturing company's plants, where 2,100 men are employed.

These are for immediate orders, and demonstration, and after placed Mr. Beardsley leaves for the east to visit Detroit, Chicago, Pittsburg and other iron centers to let contracts for the construction of machines.

The machines will cost purchasers \$4,000 apiece, and result in such labor saving that the two Klamath Iron Foundry men are due to become wealthy from their machine. Mr. Beardsley said while here that the machine will save the foundry using it \$100 for every eight hours in operation. They expect to turn out twenty a day when their contracts are let.

The invention takes care of the heavy moulding work in a foundry, and is equipped with different speed controls and adjustments to handle practically any sort of heavy moulding heretofore done by hand from brass and steel, to core work.

NATIONAL RED CROSS DRIVE BEGINS MONDAY

(Continued from page 1)

United States participation in the world war. Nor can the work be delayed one day. Bullets will not wait on tardy dollars. The man who offers his life on the battlefield for the defense of his country must not be left to bear the burden alone.

In order to do her part, Klamath wants:

- 30 to give \$100.00
- 30 to give 50.00
- 40 to give 25.00
- 70 to give 15.00
- 150 to give 10.00
- 400 to give 5.00
- 500 to give 2.00
- 1000 to give 1.00

And a multitude of smaller gifts. All must help all they possibly can. Let Klamath over-subscribe her allotment.

Why does the government not finance this relief work? The question is often asked. The American Red Cross is ranked as a neutral, as long as it is maintained by private subscriptions. The administration of the Red Cross cannot be carried on as are the national naval and military operations. Relief work, also, must not red tape, must be promptly ready for every emergency, must be governed by humanitarian principles and quick decisions, and must not be hampered by the restrictions of governmental machinery. At the same time, the Red Cross is the only relief agency formally authorized by the government. Its head is the president of the United States. Its accounts are audited by the war department. It is chartered by congress. President Wilson declares:

"A large, well organized and efficient Red Cross is essential. It is both a patriotic and humane service that is rendered by every citizen who becomes a member of the American Red Cross."

Red Cross subscriptions need not be paid all at one time. One-fourth will be due July 1st, one-fourth August 1st, one-fourth September 1st, and the balance October 1st.

A task as great as that of getting the subscriptions is to inform every man, woman and child of the purpose and emergency character of the campaign before Red Cross Week, which begins June 18th. Community committees are urged to have a forceful speaker present at every gathering, whether small or large. Newspapers are called on for liberal space. Ministers are asked to present the subject to their congregations. Let every patriotic citizen speak of the campaign to every other person he or she meets.

In this world war some must give their lives, others their money. No patriot at home could bear to think that a patriot bled to death on a battlefield because he or she failed to contribute his dollar to the Red Cross. You have no right to say you are patriotic unless you give your utmost in service, no matter what it may involve in personal sacrifice.

Vivian Rich, who plays opposite William Farnum in the new William Fox production, "The Price of Silence," is a new bright spot in the Fox heavies. Those who wonder where she got her rare beauty and charm must be satisfied with this: She was born in the South and educated in the North. After graduating from a Boston school, Miss Rich began her theatrical career as a member of a stock company. Later she played on Broadway as a member of the "Country Girl" company. Miss Rich's first fling in stardom was with the original Nertor company. From that concern she went with the American, and played in the "Gentle Conspiracy," "Quicksand of Deceit," and "Little Troubadour." She makes her debut in the Fox forces as Grace, the daughter of Judge Vernon, playing opposite to William Farnum in "The Price of Silence." This role gives her an excellent opportunity to show her dramatic powers. She is wooed by three men, a senator, a wealthy and powerful politician and a young doctor. Thru a tear-compelling combination of circumstances the sen-
