PERSHING'S CHIEF OF STAFF BEGAN AS PRIVATE

General Harbord, now chief of staff to General Pershing in the conduct of the American part of the war in Europe, began his army career as a private in the ranks. He entered the army Jan. 10, 1880. In 1887 he failed in competitive examination for West Point, but in 1891 he appeared before an army board to be examined for a commission and passed with flying colors. General Pershing came to know him well when the two were on duty in Mindanao.

THREE PLANES EACH MONTH FOR YANKEES

WITH THE AMERICAN ARMY IN FRANCE, Aug. 1.—(Correspondence of the Associated Press)—The story of Lieutenant David E. Putnam of Newton, Mass., the leading ace of American aviation, as he tells it, gives the impression that there is nothing extraordinary in the making of a star of the air fleet. Of the big things he has done he tells in so quiet a way that they appear ordinary. His greatest fight took place on June 5, when he engaged ten Germans and shot down five of them.

A year ago he was feeling his way on a Penguin, the machine that is given to all beginners because it cannot fly off the ground. Now his average is three victories a month, having destroyed twenty enemy planes and an observation balloon since his debut, December 20, 1917, not all of these have been officially recorded.

Putnam shows in the air the same ardent aggressiveness that the Germans have been grieved to observe in our infantry. Like a great many new fliers, he sailed boldly over the lines far into the territory occupied by the Germans to provoke battle. In consequence a number of his victories could not be officially confirmed and the risks were largely increased. Twice he has had to plane back over the lines with his motor out of commission and his machine shot up.

After seven months training and one month's service at the front he fought his first battle and won it on January 19. Wally Winter, of Chicago, flying in the same patrol, said Putnam saved him during this fight. Putnam now says he was the man who was saved by Winter. Flying in a high wind that bore him over into the enemy's territory he sighted two Germans below him making for the French lines. He dove after them and got one at 2,000 yards height. Then he discovered that the other German was maneuvering above him and that higher up, Winter was coming down followed by two or more of the enemy. He took height to meet Winter and the Germans abandoned the fight.

A curious accident in his second

FORD TRACTORS FOR MEXICANS ARE PROPOSED

DETROIT, Aug. 20.—Plans for the erection of several tractor plants were announced today by Henry Ford the automobile manufacturer. Ford has notified the Mexican government that he is prepared to spend \$1,000,000 on the first of several such plants, and is awaiting only the selection of an official site.

"We will sell virtually at cost and if profits accumulate we will put them right back into the business," said Mr. Ford. "Not a cent is to be taken out of Mexico."

Should the business grow to such proportions that it will be impossible to absorb the profits, the Mexican government will be given control of the plants, it was said.

"The tractor will give the people an opportunity to realize some of the wealth of their country," Mr. Ford added.
