For President, BENJAMIN HARRISON, Of Indiana. For Vice President:

LEVI P. MORTON, Of New York.

FOR PRESIDENTIAL ELECTORS. Robert McLean, of Klamath County. Wm. Kapas, of Mulinomah County. C. W. Fulton, of Clabsop County.

FRIDAY, OCT. 12, 1888.

A nox of manuscripts relating to Poe has been recently discovered in Georgia. It is thought that they may be those of Griswold, who was known to possess many of Poe's papers, all of which unaccountably disappeared.

A Chicago burglar overlooked \$80 in a bureau drawer, and the papers announced it the next morning. He returned that night and not only secured it, but a suit of clothes as well. And yet there are people who say advertising don't pay.

LIPWARDS of four hundred cases of typhoid fever exist in and adjacent to Duluth. The number of deaths is daily growing larger, and preserves, which are esten with a soon. President Hewitt, of the Minnesota board of health has been sent for to investigate the sanitary condition of the city and the unusual mortality.

WILLIAM TAYLOR, the distinguished African Bishop, believes that Henry M. Stanley, the explorer, is alive and in the interior of Africa, and may not be heard from for a year or two yet. What an everlasting favor Stanley would confer on an anxious populace if he would only speak from the wilderness and shout, "Oil korrecet."

and 1326 in 1886, it was about 2700 at the last election.

THE FREE TRADE MENACE,

In no other country does so large a percentage of farmers own the lands they cultivate as here. In no other country is there so large a proportion of workingmen who own the homes they occupy. In no other country does the fiscal policy so decidedly favor the man who honestly and industriously endeavors to better his condition in life. Nowhere else in the world can the laborer get so many of the necessaries and comforts of life for a day's work as here

in the United States. All this we are asked to menace by

adopting a policy that has thrice brought disaster to the business of this country; a policy with but one aggressive advocate among all the nations of Europe-and that one nation to-day representing within her borders some of the strongest possible arguments against the policy she seeks to enforce upon others. While the Cobden Club and leading British journals are preaching the benefits of free trade, the British farmer is depressed, 800,000 working men are idle, and the police of London are kept busy suppressing uprisings of men made desperate by hearing their children cry for bread. Nothing can be dearer than "cheap-

THE BOUNDARY LINE.

A matter which may strongly tend to strengthen the already strained relations between the Dominion and the United States has presented itself in connection with the limits of the jourisdiction at points adjacent to the boundary line between Alaska and British Columbia.

The result of the recent investigation was reported to the government here. Valuable gold fields, It is claimed, which have been discovered and which are now being worked on the Yukon river, are in British, and not in United States territory as has all along been supposed. These gold fields, it is represented, will be of great value, and as the American officers in Alaska dispute the claim that the deposits are In ##Positrasters are authorized to re-British territory, a conflict between ceive subscriptions. the miners, who believe they are Salem, Oregon, Postofflee, June 21, 1885. and the British authorities who and the British authorities, who assert jurisdiction, is feared.

The provincial government of Republican National Ticket, The provincial government of British Columbia is now issuing mining permits, and in the absence of any definite international boundry line it cannot but follow that in many instances they are granted without knowledge as to whether they are in United States or British territory. It is evident the time has arrived when serious international complications can only be averted by a definite location of the boundary line between Alaska and British Columbia.

> TEXAS will furnish this year the ever, he is not much of a kld.

been permitted to land at Portland ed to his newds. is named Yong Sing Hee. Hee is a

To be Held in the Fingers.

There are a number of things that wel bred people now eat at the dinner table with their fin, e s. Bread, toast, and all tarts and small

Strawberries, when served with the

Lettuce, which should be dipped in the dressing or in a little salt.
Asparagus, whether hot or cold, when

served whole,

Colery, which may dropesly be placed
on the table cloth beside the plate. Fruits of all kinds, except melons and Cheese, which is almost invariably eaten with the fingers by the most partie

Even the leg or other small piece of a disorders of the bowels. The best bird is taken in the tingers at fashionable mode of giving it is when it is fresh, dinners, and at most of the luncheous and if placed in the fire and heated ladies pick small pieces of chicken without using a fork.

To the list also should be added "Saratoga chip" potatoes.

Quick Wit.

Many appendites are parrated to illustrate the fact required in dealing with lunatics Among the inmates of an asylum near Philadelphia was a man who was considered harmless but having no home, w.s. allowed to remain there, being employed PROTECTION and free trade had a to show visitors. The doctor went on the fair stand-up fight in the district of roof with him one day to see about repair-Congressman Reed, of Maine, in the ing it, when the man suggested that they recent election. Reed is the leader should jump down to the ground together. of the protectionists in the house, Immediately the doctor replied, "No and the democrats pitched in with don't let's do that. Any one can jump vigor to defeat him, and this was down. Let's go down and see if we can the result: While his plurality was jump up." The lunatic considered the 117 in 1880, 317 in 1882, 316 in 1884, point "well taken" and agreed. The head of a private asylum in England was to the bail - oom watching a number of lunatics bathe, when one of them called out, "Let's duck the doctor!" and they all took up the cry. Seeing his danger, the doctor said attonce, "All right boys, but suppose you give him a cheer first," and the cheering brought the keepers in to his rescue. The same doctor was in a room with a lunatic, who, by some means, had possessed himself of a carving knife. The lunatic informed him gravely that he had been ordained by God to cut him into little pieces, and much as he regretted it, he should be obliged to do it. "Yery well," said the doctor; "of course, if that is the case, I shall make no attempt to prevent you; but I see your knife needs sharpening. Allow me to tetch a grindstone for you." And no objection being raised, the quick witted stock. doctor made his sscape.

How's This

We offer one hundred dollars reward for any case of catarrh that can not be cured by taking Hall's

catarrh cure. F. J. Cheney & Co., props., Toledo, O. We, the undersigned, have known F. J. Cheney for the last lö years, and believe him perfeetly honorable in all business transactions, and financially able to carry out any obligations made by

FACTS FOR THE FARMER.

bowel diseases and stave off injury from young grass.

APPLES FOR Pros.-A prominent fruit grower who used to feed about future probabilities. Yet there is good cholera, and he believes that it can liver. be prevented by eating apples.

ASHES AS FEBTILIZER, -The ashes of very old wood do not contain so much potash as ashes of wood of tained, and add together the figures younger growth. Ashes generally at the top of the columns in which pay well on all ordinary crops, but are specially adapted to the wants of fruit trees, grape vines and all kinds of vines, clover and peas.

OUR Root Crors.-The rooterops are sometimes enormous on rich land, and can be grown at a low cost compared with their value. As many as 1000 bushels of beets have been grown on one acre and at a cost of only four cents on a bushel. For mileh cows they are invaluable, and should be made a special crop on all dairy forms.

OATS FOR YOUNG STOCK,-No. kind of grain is so well adapted to feeding young stock of any kind as oats. Their large proportion of oldest voter in America. His name husk keeps them from clogging the is Richard Kidd, and he is 115 years stomach, even stock that has too of age: contrary to his name, how- poor digestion for thriving on corn. Pigs will prefer the latter grain, if both are given together, but a pig is THE young Chinese who has just not the best judge of what is adapt-

> BONE FOR POULTRY.-Poultry raisers should not neglect to use sufficient raw bone, either crushed or in the form of meal. It contains lime, as do also oyster shells, but it contains animal matter which is of great value. Bone when burnt is of comparative little value over oyster ROLLED OATS, shells, but when crushed or ground raw, supplies value peculiar to itself. All classes of poultry are extremely fond of it.

Charcoal For Hogs.—There is nothing more highly relished by hogs than charcoal. They will help TRITICUM, themselves to it and it will prevent disorders of the bowels. The best and if placed in the fire and heated occasionally it would be more serviccable. It corrects the acidity of ISSS NEW BUCKWHEAT the stomach, and as it is cheap a constant supply should be kept constantly in the pen.

FOR WAGON TIRES.—Should a wagon or buggy tire become a little loose from shrinkage of the felloes, instead of taking the whice to the shop to have the tire cut and replaced get a gallon of linseed oil, and after heating it pretty well pour the same in a shallow dish and give the rim of the weel a few slow turns

rim of the weel a few slow turns around through it. The oil penetrating the felices will so swell them that the tire will become as tight as ever.

GLANDERS SPREADING.—Eastern journals say that glanders is appearing in new quarters every year. Its virulence, its incumbility and the fact that it is the most loathsome discusse with which live stock is afflicted are in themselves sufficient to make it thoroughly dreaded by all who know anything of its nature. And when there is added to this its easy when there is added to this its easy communicability to man and its 10-std unfailing fatality, the gravity of the situation is certainly sufficiently apparent. Special cognizance of this disease must be taken by veter- BLACKSMITHING and HORSESHOEING. inary authority, and that soon, if the country is to be spared of one of the worst scourges it has ever had from any malady affecting its farm

The Center Of Population.

For one hundred years the point which represents the center of the republic has been steadily moving due westward along the thirty-ninth parallel of north latitude. Its average rate of progress has been about tive miles per year. In 1800 its location was eighteen miles west of Baltimore; in 1850 it had passed the mountain barriers and was following the Little Kanawha through West Virginia; in 1870 it their firm.
