A CLAIM TO HUMAN GRAT TUDE.

Charlotte Corday, the sad-faced, tender-hearted peasant girl of Normandy made great history by one desperate act!

Sickened by the saturnalia of the French revolution, and moved to des-peration as Robespierre and Marat were leading the flower of France to

bloody reign.

Marat had demanded two hundred thousand victims for the guillotine!
He proposed to kill off the enemies of the Revolution to make it perpetual!

Horrible thought! No wonder it fired the blood of this patriotic peasant maid! Gaining access to his closely guarded quarters by a subterfuge, she found him in his bath, even then in-

excrable and giving written directions for further slaughter! He asked her the names of the inimical deputies who had taken refuge in Caen. She told him, and he wrote them down. "That is well! Before a week is over they shall all be brought to the guillotine."

At these words, Charlotte drew from her bosom the knife, and plunged it with supernatural force up to the hilt in the heart of Marat.

"Come to me, my dear friend, come to me," cried Marat, and expired under the blow! In the Corcoran gallery at Washington is a famous painting of Char-lotte, represented as behind the prison

bars the day before her execution.

y's enemies. What a lesson in this tragic story Two hundred, nay, five hundred thousand people would Marat have sacrificed to his unholy passion of

Methods are quite as murderous and inexorable as men, and they number their victims by the millions. The page of history is full of murders by authority and by mistaken ideas! In the practice of medicine alone how hundreds of millions have been allowed) to die and as many more killed by unjustifiable bigotry and by

bungling!
But the age is bettering. Men and methods are improving. A few years ago it was worth one's professional life to advise or permit the use of a proprietary medicine. To-day there are not two physicians in any town in this country who do not regularly prescribe some form of proprietary

remedy!

H. H. Warner, famed all over the world as the discoverer of Warner's safe cure, began hunting up the old remedies of the Log Cabin days; after long and patient research he suc-ceeded in securing some of the most valuable, among family records, and called them Warner's Log Cabin rem-edies—the simple preparations of buchu, cough and consumption and other remedies have struck a popular chord and are in extraordinary demand all over the land. They are not the untried and imaginary remedies of some dabster chemist intent on making money, but the long-sought principles of the healing art which for generations kept our ancestors in perfect health, put forth for the good of humanity by one who is known all over the world as a philantropist —a lover of his fellow man,—whose name is a guarantee of the highest standard of excellence.

The preparations are of decided and known influence over disease, and as in the hands of our grand-mothers they raised up the sick. cured the lame, and bound up the wounds of death, so in their new form but olden power as Log Cabin remedies, they are sure to prove the "healing of the nations."

Cordsy did the world an incalcu-lable service in ridding France of the bigoted and murderous Marat, just as this man is doing humanity a service by re-introducing to the world the simpler and better methods of our

A Sound Legal Opinion.

Bainbridge Munday Esq. County Atty., Clay Co., Tex. says: "Have used Electric Bitters with most happy results: My brother also was very low with Malarial Fever and Jaundice, but was cured by the timely use of this medicine. Am satisfied Electrit Bitters saved bis 116.21

Mr. D. I. Wilcoxson, of Horse Cave, Ky., adds a like testimony, saying: He positively believes he would have died, had it not been

for Electric Bitters.
This great remedy will ward off, as well as cure all Malaria Diseases, and for all Kidney, Liver and Stomach Disorders stand unequaled. Price 50c. and \$1, at Dr. H. W.

CRANBERRY CULTURE. — About \$60,000 has thus far been expended on the cranberry marsh at the head of the bay, and the yield is just beginning to be a matter of note. It is expected that the marsh, when in full yield, will produce 6000 bushels a year. Cranberry culture will be one of the live industries of the country before long.—Pacific CRANBERRY CULTURE - About of the country before long.-Pacific

FACTS FOR THE FARMER.

NICE, CLEAR BUTTER.-There should always be milk enough skimmed with the cream to give the butter, when churned, a bright, clear look. Butter churned from The Field of Politics-Another Accicream with little or no milk in it the guillotine, she determined that will usually have an oily or a shiny she would put an end to Marat's look. This shows that the grain of the butter is injured, thus affecting Its keeping qualities.

> lady who has been reading up on agriculture writes as follows: "I am the deceased left an estate valued at not a farmer's daughter and I don't \$1,500,000. wish to be. I prefer the city to the country any day. I presume it is nice enough in summer, but in winter I don't imagine it to be very pleasant harvesting the winter wheat and picking the winter To-night he speaks at the Irishapples. I don't think any of you country girls can deny that."

PRUNING ORCHARDS,-The trees should not be allowed to go as they please. Keep them low, so that a man on top of an eight-foot ladder can pick all the fruit. Cut out the top and center of the tree so that Juring several others. the sun can get into the center of it. This will cause young branches to cut off from two to six more will by the superintendent. grow out. Thus you will have a fine lot of fruit-bearing branches all along the inside of the tree. A tree thus pruned can bear up all the fruit that will grow on it; it will the best quality. Herein lies the secret of growing fine peaches.

CARE OF POULTRY .- The coming season is one in which all farm animals require special care and, most of all, poultry call for more careful attention. No other animals are so 100 or 150 eggs in a year, each one of which will weigh two ounces or more, thus yielding, in solid matter, cities. nearly four times her own weight in the 12 months. At the same rate of product a cow would yield two tons of cheese or butter in the year, and al Republican Committee to-day this comparison shows conspicuously paid John Broderick \$2000 for causedies—the simple preparations of roots, leaves, balsams and herbs which were the successful standbys hen over the more valued cow. George Worden, who falsely registhe relative superiority of the modest ing the arrest and conviction of ment Company, in the near future. of our grandmothers. These simple, old-fashioned sarsaparilla, hops and tributley of ourse she will remain of the prevention of brood of 10 or 12 chicks and care for | illegal voting. them until they are able to look after themselves, while the cow rears but one duplicate of herself yearly. If the hen fails in doing the man who fell from the bridge this it is for want of her owner's at this place some days since, passed which diverts success from her own well-meant and motherly care.

> WORTH OF POTATORS.—The potato is the most productive crop grown, if reckoned by the amount of food elements contained in it. That is to say that it may be made the most productive source of food, if full advantage is taken of its natural plant at its true value, for one reason among others that it is considered deavor to carry out the exclusion food for all kinds of domestic ani- department's decision yesterday. mals than any other grown. Al! farm animals eat these tubers with avidity, and while they are somewhat objectionable in a raw state of J. J. Whitney against D. R.
