AN OPEN QUESTION.

Is Harrison a Descendant of Poenhentas?

It is popularly believed that President Harrison is descended from Pocahontas and from the Parliamentary soldier and regicids General Thomas Harrison who was executed

Thomas Harrison who was executed in 1660.

Pocahonfas, daughter of Powhatan, manifested a friendliness for the early white settlers of Virginia when she was but a girl. The story of how she saved the life of Captain John Smith, who had been captured and condemned to death by her father—how she on saveral occurrences made known. she, on several of asions, made known to the settlers their danger when about to be attacked-is well known to all acquainted with the early his-tory of America. Her subsequent marriage with John Rolfe, an Eng-lishman—her remoyal to England where a son was born, from whom numerous wealthy families of Virginia claim descent—is the basis of the opinion that President Harrison is one

of her descendants.

Whether this be true or not it is. however, well known that President Harrison is a descendant of a noted family, distinguished alike in peace and war. The came of Harrison is already indelibly written upon the pages of American history, for General Wm. Henry Harrison—the ninth President of the United States—was the grandfather of Gen. Ben. Harrison.

The election of another member of the Harrison family is but another proof of the prevailing disposition of the public to return to healthy administration of public affairs so characteristic of the early years of government. A similar desire has en manifested for a revival of early manners and customs in many various ways, of which mention in particular
