SALEM has no wild exciting boom.

She only possesses a good healthy and steady growth.

DIDN'T the JOURNAL tell you that the Capital City Electric Railway meant business?

THAT MOTOR line to Silverton is a certainty.

THE JOURNAL is glad to know that Salem readers do not "hash."

Its always at the twelve hours "over due," you know.

WHAT will Salem's population be in 1891, do you suppose?

THE JOURNAL wishes to see any one in Salem has heard the sound of that bell at the East Salem school.

You know on what to have been bought.

WONDER who will constitute our next city council?

The JOURNAL would ask what's the matter with the present one? Ain't it all right?

THE JOURNAL is anxious to know who is the "farmer" at the Salem, Chemawa Indian school.

It ain't Rev. Irwin's son is it? No, surely not, he isn't qualified you know.

SAY, won't it be lovely to pass a few hours amid the beautiful surroundings of that Landscape Park, next summer?

Mr. Waite and the whole Decoration Union, should be congratulated on their efforts in this matter.

WONDER if Eugene will send for a certain Salem gentleman to come and build their street car line, "by air."

We suppose, dear readers, you are aware that a gentleman of this city proposed such a thing to the people there, but they failed to see the point.

A NEW use has been found for the carrier pigeon in Russia—

carrying negatives taken in a balloon to the photographer's.

The Novoe Vremya gives an account to this end recently made in which the Czar's winter palace was photographed in the air,

the plates being sealed in paper bags impervious to light, tied to a pigeon's foot, and sent to the developer.

CLOSE observers have remarked at the comparative rapid falling of this blue flowers.

H. Mollisch, a German chemist, after careful study, declares it attributable to the action of the alkalies on anthocyan.

"Small quantities of alkalies," he says, "turn the purple anthocyan blue, while larger quantities render it green, yellow, and finally colorless.

In nature this result is attained by the readmixture of the anthocyan with the protoplasm of other cells from which it was previously separated."

WHALES are becoming more and more plentiful on the coast.

Last winter four were sighted off the Hamptons, and one off the Quogue (Long Island).

The Nantucket people reported more whales in sight two winters ago than have been seen since there was an open-boat whale fishery on the island.

Prof. True, of the National Museum, who has been studying the subject for years, say that, unless there is more found for whale products and the industry is revived, they will soon be as thick in the coast waters as they used to be in the old days.

THE investigation of food products recently set afoot by the Minnesota State Board of Health showed that the laboratory, rather than the field and dairy, is playing a principal part in supplying food.

We quote: "Of twenty-five samples of baking powder, two were of phosphate, four cream tartar, and nineteen alum baking powders.

Of twenty-three samples of cream tartar bought of retail grocers, two only were fairly pure, twenty-one did not contain any traces of cream tartar, being composed of tartaric acid, acid calcium phosphate, and in some instances alum.

Of fifty-five samples sold as cider vinegar, eleven were pure, thirteen spurious cider vinegars made from the exhausted pomace from which the cider had been pressed, and thirty-one were colored low-wine vinegars, containing in some instances a small proportion of apple solids or cider vinegar.

Three samples sold as malt vinegar were colored low-wine vinegars, nineteen being below the legal limit of acidity.

Of sixty-eight samples of lard, thirty-seven were adulterated with cotton seed oil. Of ten samples of olive oil, six consisted largely or entirely of cotton seed oil, the other four being pure."

The report says that all through the state impure goods are being sold for unadulterated goods.

John T. Harris, chief of police at Johnstown, Pa., lost eleven of his family of thirteen at the time of the flood and his home was swept away. In spite of this, he worked like a hero at the head of his men during the gloomy days and nights which followed the disaster.

STATE OF OHIO, CITY OF TOLEDO, Lucas County, S. F. Frank J. Cheney makes oath that he is the senior partner of the firm of F. J. Cheney & Co., doing business in the city of Toledo, county and state aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of catarrh that cannot be cured by the use of Hall's Catarrh Cure.

A GIGANTIC RESERVOIR. The present dam of the Bear Valley Reservoir Co., in San Bernardino, was constructed in 1885, and is 50 feet high, 16 feet thick at the base, 3 feet at the capstone and 300 feet in length. It is built into the bed rock at the bottom of the Bear Creek Canyon, and abutted into solid rock on either side.

THE VERDICT UNANIMOUS. W. D. Sull, Druggist, Bippus, Ind., writes: "I can recommend Electric Bitters as the very best remedy. Every bottle sold has given relief in every case. One man took six bottles, and was cured of Rheumatism of 10 years' standing."

Carter Harrison has gone south to boom Chicago's claims to the World's Fair. "Another wonderful discovery has been made and that too by a lady in this country. Disease fastened its clutches upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent.

Catarrh

is a constitutional and not a local disease, and therefore it cannot be cured by local applications. It requires a constitutional remedy like Hood's Sarsaparilla, which, working through the blood, eradicates the impurity which causes and promotes the disease, and

Catarrh

effects a permanent cure. Thousands of people testify to the success of Hood's Sarsaparilla as a remedy for catarrh when other preparations had failed. Hood's Sarsaparilla also builds up the whole system, and makes you feel renewed in health and strength.

Catarrh

"I used Hood's Sarsaparilla for catarrh, and received great relief and benefit from it. The catarrh was very disagreeable, especially in the winter, causing constant discharge from my nose, ringing noises in my ears, and pains in the back of my head. The effect to clear

Catarrh

my head in the morning by hawking and spitting was painful. Hood's Sarsaparilla gave me relief immediately, while in time I was entirely cured. I am never without Hood's Sarsaparilla in my house as I think it is worth its weight in gold."
