ODDS AND ENDS.

Say "It is I," and "He went with me." There are no opportunities for the unprepared. Italy is estimated to be worth about \$11,755,000,000. Cocus wood is the hardest known wood. Oak is the strongest. The Latin Bible was valued at \$150 in the fifteenth century. When faith is lost and honor dies, the man is dead.—Whittier. A society which nearly any one may enter is no society at all. Chain and cable suspension bridges antedate the Christian era. People never think of whistling in Iceland. It's a violation of the divine law. Chambers agrees that the somnambulist state may come upon a person in the daytime. Train children carefully to read aloud, both for the sake of the voice and the pronunciation. All four of the British-Australian colonists have a Scotchman at the head of their government. Woman is in a normal condition only when she is in love—the love that cheers but not inebriates. It is said that wood for use in making the best pianos is seasoned for 40 years before it is deemed serviceable. One should not make one's trials worse by letting them become the cause of permanent, perhaps fatal, organic derangement. One never knows himself till he has denied himself. The altar of sacrifice is the touchstone of character.—O. P. Gifford. Spirit Lake, Ia., is situated upon the pinnacle of one of the most elevated regions in the state, 1,650 feet above sea level. Street car conductors at Hannibal, Mo., are forbidden to aid women in getting on or off the cars, except when requested. Manchester's career as a seaport commences with 1894. At any rate, Sir J. Harwood expresses himself confident that the ship canal will be opened in January next.

The Gentle Art of Charming. A man says that a woman to be clever at conversation must have a good memory. She must keep in mind so much as she knows of the tastes and prejudices of those present. If So-and-so's brother fought in the Egyptian war, if such a one has Scotch ancestry, if such another had a dear friend or an aunt or somebody who went on the stage, if such another has written a poem on "Mortality" and has opinions on immortality and so on, of each and all she must remember. And "As you said the other day" is a good way to introduce a pungent remark; or, "As your favorite author has it," which shows a flattering regard for one's preferences. All these tricks, if you call them so, must be studied. Don't try to make a man think how clever you are. Make him think how clever he is. Brighten him up. Lead him on to say witty things. You may even coax him up to a joke, be he as grim as Pharaoh's ghost. Remind him of clever things he said "the other day." Never mind if they are inventions of your own. Never mind if he knows they are. So long as he does not imagine that you know they are, you are all right. Tell bright things about him, it won't take long to make him feel, especially if he is a really dull fellow, that he is a lot smarter than even he thought himself, and he will correspondingly adore you. A man is apt to frizzle under the fire of your own humor and wit and brightness, and of course a man is never comfortable when he frizzles.—Woman.

A Designer of Battleships. Lieutenant Nixon, who designed the cruiser New York, which beat all records the other day, is a graduate of the Annapolis academy, but left the navy to enter the shipyards of the Cramps. The battleships Indiana and Massachusetts are being built from his designs. Lieutenant Nixon was sent to England to study naval architecture, but seems to have surpassed his teachers.

ANARCHISTS IN SPAIN. Riffraff Rioters in Paris Fighting the Soldiers. SEVILLE, July 5.—This city was a state of constant alarm all night. The excitement is due to the fact that anarchists or other lawless persons are at work in various parts of the city, causing the explosion of petards.

In France. PARIS, July 5.—It now appears that most of the rioting yesterday was not by students but by the Riffraff who took advantage of the occasion to raise a disturbance. This class resumed rioting this morning and had numerous conflicts with police and soldiers. Numbers on both sides are injured. The affair has assumed such a serious aspect that the authorities are determined to restore order at any cost. Almost the whole city is occupied by troops.

A Prominent Doctor Accused of Murder. A gentleman recently made a startling accusation in the hearing of the writer. Said he, "I firmly believe that Dr. —, intentionally or unintentionally killed my wife. He pronounced her complaint — consumption — incurable. She accepted the verdict, and—died. Yet since then I have heard of at least a dozen cases, quite as far advanced as hers, that have been cured by Dr. Pierce's Golden Medical Discovery. Her life might have been saved for consumption is not incurable." Of course it is not. The "Discovery" will remove every trace of it, if taken in time and used faithfully. Consumption is a disease of the blood—a scrofulous affection—and the "Discovery" strikes at the root of the evil. For all cases of weak lungs, splitting of blood, severe lunging coughs and kindred ailments, it is a sovereign remedy.

FOREIGN INFORMATION. Terrible Disasters Chronicled July Fourth. GERMAN EMPEROR OPENS PARLIAMENT. Renews His Furious Appeal for Militarism.

LONDON, July 5.—At Thornhill, Yorkshire a terrible explosion occurred yesterday. One hundred and twenty miners are entombed, and the loss of life, it is feared, will be heavy. Four bodies have been already brought out. Piteful scenes of distress and anxiety prevail about the mine.

ST. PETERSBURG, July 5.—A terrible disaster, resulting in a large loss of life, occurred on the steamer Alfons, a boat employed in the river trade on the Volga. The steamer, with quite a number of passenger on board, was approaching Romanov, when the boilers exploded, killing twenty-six passengers. Among the dead is General Petrushevski. The explosion tore the upper part of the steamer to pieces, and burning coals blown from the furnaces set fire to the wreck. The boat burned to the water's edge and then sank.

PARIS, July 5.—The startling news has been received here that a revolution has occurred in Greece, that King George has abdicated, and that the people of Athens, backed by the soldiery, have proclaimed Greece a republic. The event was so sudden and unexpected that the particulars of it are as yet but rumors. No official verification of it can be obtained, but considering the dissatisfaction prevalent for some time and the impulsive character of the people, it is not regarded as improbable. A cablegram similar to the above was received in this city by a prominent Greek. Several Greeks were seen in regard to it, but they had no information to give. While surprised, they thought it not improbable. Their countrymen, they say, have long been hoping and planning to make their country an independent republic.

BERLIN, July 5.—The reichstag was opened yesterday by Emperor William. The emperor was attired in full military uniform. He proceeded directly to the dias, which was erected to the right of the press gallery. Bowing low, Chancellor von Caprivi handed the manuscript of the imperial speech to the emperor. Holding himself erect, his majesty, in a firm and clear voice, read his address from which the following excerpts are taken:

"A bill concerning the peace footing of the army, which was submitted to the former reichstag, to my regret did not find approval. In the face of the development of military institutions, the rejection of the army bill was bound to lead to the resolution to dissolve the reichstag and order new elections. Since the introduction of the bill, the political situation in Europe has experienced no change. The relations of the empire with other powers are thoroughly friendly and free from all clouds. The proportion of Germany's organized military strength has however, changed for the worse during the past year when compared with that of our neighbors. I consider that all means at our disposal must be utilized in order to establish an effective defense of the Fatherland. You will receive immediately a new bill regarding the peace footing of the army, in which there will be taken into account as far as possible certain desire expressed during the discussion of the late bill. Consequently, diminished demands are made upon the personal capacity and taxbearing power of the people as far as possible without endangering the efficiency of the army. The empire's interest requires that the bill be passed with the utmost dispatch so that the new recruit calls may be made in the autumn on the new basis. Delay would influence most unfavorably our strength for more than twenty years. "Gentlemen," with a great sacrifice Germany has been united in one em-

pire. The nation honors most those who staked their blood or property on this work which led the Fatherland to prosperity. To safely guard the glorious achievement with which God has blessed us in our battle for independence is our most sacred duty. This duty we can only fulfill if we make ourselves strong enough to remain a surety for Europe's peace. I trust you will not fail to give me and my confederates your patriotic sacrifices and willing support in striving for these aims." The emperor's reference to the duty of the members of the reichstag to preserve and guard that which the nation has won, was greeted with hearty cheers. When the emperor had concluded his written speech, loud and prolonged applause greeted him. His majesty stood waiting for quiet to be restored, and when he could be heard he added a few improvised remarks.

Financial News. WASHINGTON, July 5.—The monthly circular statement issued by the treasury department shows a net decrease of the money in circulation since June first of \$2,425,630, and since July first, 1892, of \$9,346,977, making the amount of all kinds of money in circulation July 1, 1893, \$1,593,723,411. The classification is as follows: Gold coin, \$403,633,700; standard silver, \$65,400,178; gold certificates, \$92,970,019; silver certificates, \$326,489,163; treasury notes under the act of July 14, 1890, \$140,991,695; currency certificates under the act of June 8, 1872, \$11,935,000; national bank notes, \$147,731,139. The amount of circulating medium per capita is placed at \$23.86.

The issue of standard silver dollars from the mints and treasury during the week ended July 1st was \$406,160, and for the corresponding period in 1892, \$492,420. The shipments of fractional silver coins for the month of June were \$767,164; for June, 1892, \$1,025,507. CHICAGO, July 5.—"There never has been a time since the law of 1890 known as the Sherman act was passed that I would not have voted for its repeal," says Senator Sherman. The Sherman act was a compromise measure passed to save the country from a free coinage bill. I have told Mr. Cleveland and Mr. Carlisle that I will stand with them for a sound, stable currency. I think the Sherman law will be repealed, but the danger is that congress may go too far. Should the clause providing for the purchase of 4,500,000 ounces of silver monthly be stricken out it would be well, but if congress should go on and repeal the clause providing that the United States shall maintain the parity between gold and silver coin it would cause widespread distrust. There is in the treasury 350,000,000 of coined silver dollars and \$145,000,000 of uncoined bullion. The legal tender quality of these coins must be preserved and their parity to gold maintained. It is well enough to stop the further mintage of silver, but that in circulation must be sustained. To stop making silver dollars would not impair the usefulness of those already made so long as this guaranty is back of them." The senator further expressed his belief that the cessation of silver coinage would not bring gold more into circulation. He attributed the present stringency to the apprehension in the mercantile and financial world that the government will not meet its obligations in gold but will pay in cheap money.

A good choice house to sell on easy terms. Will take carpenter work in part payment. G. M. Beeler. Cures Scrofula. Mrs. E. J. Howell, Medford, Mass., says her mother has been cured of scrofula by the use of four bottles of S.S.S. after having had much other treatment, and being reduced to a low condition of health, as it was thought she could not live. INHERITED SCROFULA. Cured my little boy of hereditary scrofula, which appeared on his face. For a year I had given up all hope of his recovery, when finally I was induced to use S.S.S. A few bottles cured him, and S.S.S. has since cured the disease in me. S.S.S. is a low condition of health, as it was thought she could not live. Mrs. E. J. Howell, Medford, Mass.
