

Prize Hood's

Hood's Sarsaparilla more than any remedy I have ever taken. I have never been robust and am subject to severe headaches, and had no appetite. Since taking Hood's Sarsaparilla...

WINTER DAIRYING IN DAKOTA.

It Pays Even When the Thermometer is Below Zero.

The barn was not an expensive one, but would hold 100 head of stock and was cut into a bank with a slope so that the drainage was perfect. I got down to the dairyman told us during the afternoon while he was curdling for his stock. Every cow seemed to know her owner as a friend—no haste, no rude noise, started her. "Last summer," said the farmer, "I raised some corn fodder, millet and sugar beets for a change of food. I contract early for my bran and in September and October, going dry through flytime. I begin feeding them at once to keep up their flow of milk while butter is high. I never sell for less than 25 cents, and often 40 cents per pound."

"I put my cows up nights as soon as frost comes and feed millet, hay and bran. Now, during the cold of winter I get up at half past 5 in the morning, go to the barn and give the cows their grain feed, consisting of bran, ground oats and peas in the proportion of eight quarts of bran, four of oats and one of peas, or often change to one of new process oilmeal. Then at 6 o'clock we milk, running the milk through a hand separator, feeding my calves and pigs the new sweet skim milk. Then I give a good feed of corn fodder and let my cows alone till noon, when I water them. They finish up all the fodder or millet in their mangers and lie down to chew their cud till half past 4, when I again feed them a smaller grain ration supplemented with four quarts of chopped peas, and at half past 5 go to milking, finishing in one hour.

"Myself, boy and hired hand do the milking. I treat the milk as in the morning and then fill the mangers with millet or oat and pea hay, first cleaning out every bit of rubbish left in their mangers, using it for bedding. I neglected to say I clean their stables every morning, hauling the offal and litter out on the field and scattering from each shed."

He was asked if his cows ought not to be fed often. "No," said he, "cows, with their quadruple stomachs, need much longer to digest their food. Neither do I rouse them up at 3 or 4 o'clock in the morning, I find from observation these hours are their very best for sleeping. Neither do I let them out through the winter unless it is on some especially bright, sunny day. Then I find they are ready to return to their stalls for their evening meal."

"But do you not find your feed pretty expensive?" "No, not very. I feed about 40 pounds of dry, rough stuff. One-half is cheap straw, cutting nothing but the hauling, and I throw the oats and peas out to use as ground. I figure that my grain feed will cost me 20 cents per day; hay, 25 cents—a total of 45 cents per day. My skim milk and manure more than pay all my other expenses. I feed extra hay for this in a cold climate, and I get much milk for my calves. My cows average me 500 pounds of butter a year, besides a fine calf. They are of high grade Holsteins, crossed up with the best dairy cows I could find. I clear \$100 on each cow yearly. My pigs, calves, chickens, etc., pay all expenses, so I can pay up for my work about \$2,000 per year. Besides my farm is getting better every day from the large amount of manure spread each winter."—W. P. Wade is American Agriculturist.

Prosperous Times For Him. "You may complain of the times," said Wall street man to a friend, "but they are prosperous days to a fellow I know."

"Prosperous days?" remarked the other. "Why, how in the world can any one be successful when everything is so bad?"

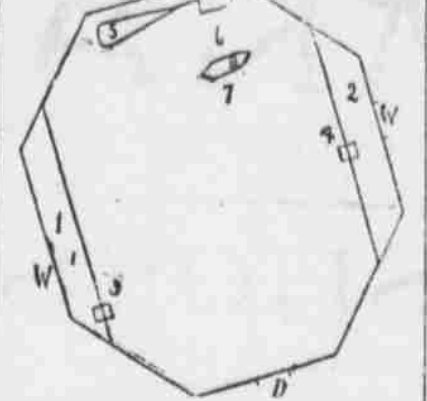

"That's just the point," replied the other. "He prospers when things are so bad. He's an exception to the general rule, but then, you must know, he's a success grinder."—New York Herald.

Mrs. Elliott F. Shepard, says a New York writer, has never wholly recovered from the sudden death of her husband two years since. Social life she has almost altogether relinquished, and even her philanthropic work, in which she was always so active and energetic a worker, has much of it, had to be abandoned. This condition of Mrs. Shepard causes regret and sympathy not only among the many individuals whom she has befriended, but among numberless organizations and bodies who have rallied upon her for both inspiration and support.

SHOP AND TOOLHOUSE.

Two Plans Suggested That Offer Special Advantages to Farmers. There is no use trying to keep tools if you have no place to put them. When they are scattered around barn, woodhouse or driving shed, they soon become spoiled from rust. It does not require an expert blacksmith to do much of the blacksmithing or a carpenter to do many of the jobs about the farm; hence many progressive farmers advocate a workshop. The accompanying diagram, furnished by Ohio Farmer, illustrates in a rough way a substantial but inexpensive structure. The man who owns it says:

We did all the building ourselves in a slack time of the year; hence we did not lay out much money on it. It is built

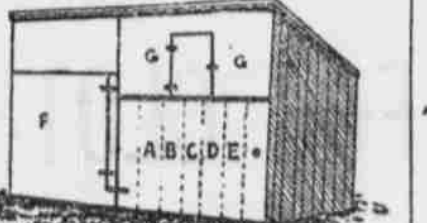

AN OCTAGONAL WORKSHOP.

of concrete wall 11 inches thick and 6 feet high. It has eight sides; therefore it is very near round. The advantages of having it octagonal shape are, there is no waste room in its four square corners; besides, the roof you will have on it is the strongest that you can build, and it requires no ribs or stays in any way, as it is braced in itself, and it is impossible for it to spread, as the sheeting makes it impossible; besides, the wall is much stronger and will do much thinner, it being braced or banded all around. The sides are each 10 feet long on the outside, and being 11 inches thick make it about 23 feet from side to opposite side (diameter) inside. The main expense is in the roof, which required six squares of shingles.

Fig. 1 represents the floor of the shop; D, the door; W, windows; 1, carpenter's bench; 2, blacksmith's bench; 3, carpenter's vice; 4, blacksmith's vice; 5, the bellows; 6, the fireplace, which is built of solid masonry 3 feet square, with a boiler in the top; 7 is the anvil.

In the second cut is shown a tool and implement shed that has given satisfaction. It is 12 by 18 feet, and is thus described by an Ohio Farmer correspondent: On the ground floor is space for the binder, mowing machine, corn planter, three stable plows and two square harrows. The space for the binder is 8 by 14, without a floor overhead. The rest of the shed has a floor above, 6 feet from the ground floor, for small implements, such as one or two persons can lift handily. This sheds is 18 feet high in front and 8 feet at the rear. It has double doors, one (F) 8 feet wide to let in the binder; A, plows; B, corn planter; C, mower; D and E, miscellaneous.

Up stairs, over the 10 foot door, there is a small door 4 by 5, and this part (G) is for small plows and other tools. This is well illustrated by the fact that should a knife or brace, is now radically ruptured or broken, it can be repaired without pain. Clumsy, cheap trusses can be thrown away! They never cure but often induce inflammation, strangulation and death. Ovarian, Fibroid (Uterine) and many others are now removed without the use of cutting operations. However large. Pile Tumors, hemorrhoids and other diseases of the lower bowel, are permanently cured with the Stone in the bladder, no matter how large, cut out or crushed, pulverized, washed out and perfectly removed without cutting. STRICTURE of Urinary Passage is also hundreds of cases. For pamphlet, references and all particulars, send 10 cents (in stamps) to the Dispensary Medical Association, No. 665, Main Street, Buffalo, N. Y.

A KNIFE

The Triumph of Conservative Surgery. It is well illustrated by the fact that should a knife or brace, is now radically ruptured or broken, it can be repaired without pain. Clumsy, cheap trusses can be thrown away! They never cure but often induce inflammation, strangulation and death. Ovarian, Fibroid (Uterine) and many others are now removed without the use of cutting operations. However large. Pile Tumors, hemorrhoids and other diseases of the lower bowel, are permanently cured with the Stone in the bladder, no matter how large, cut out or crushed, pulverized, washed out and perfectly removed without cutting. STRICTURE of Urinary Passage is also hundreds of cases. For pamphlet, references and all particulars, send 10 cents (in stamps) to the Dispensary Medical Association, No. 665, Main Street, Buffalo, N. Y.

MOTHERS

and those soon to become mothers should know that Dr. Pierce's Favorite Prescription robs childbirth of its terrors and dangers to both mother and child, by aiding nature in preparing the system for parturition. Their "labor" and the period of confinement are greatly shortened. It also promotes the secretion of an abundance of nourishment for the child. Mrs. DONA A. GUTHRIE, of Oakley, Oregon Co., writes: "When I began taking Dr. Pierce's Favorite Prescription, I was not able to stand on my feet without suffering almost death. Now I do all my household work, washing, cooking, sewing and everything for my family of eight. Your Favorite Prescription is the best I ever used. I never suffered so little with any of my children as I did with my last."

What is CASTORIA

Castoria is Dr. Samuel Pitcher's Ointment for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhoea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children. Dr. C. C. OSGOOD, Lowell, Mass. "Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ASCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y. "Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other harmful agents down their throats, thereby sending them to premature graves." Dr. J. F. KIRCHHOFF, Conway, Ark. "Our physicians in the children's department, have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it." UNITED HOSPITAL AND DISPENSARY, Boston, Mass. ALLEN C. SMITH, Pres.

The Centaur Company, 77 Murray Street, New York City.

To Arms to Arms. Another War.

50,000 men, women and children wanted to buy the stock of furniture, carpets, matings, etc., of J. A. Rotan for the next 60 days at cost or less, to make room for spring goods. I mean what I say, am also going to add a large line of wall paper and moulding to my stock. J. A. ROTAN.
