

A Great Blessing

My wife and I have found in Hood's Sarsaparilla. She had rheumatism very severely, with ankles and legs badly swollen, and hardly able to get up and down stairs without help. Many other remedies failed, but Hood's Sarsaparilla entirely cured her. It was only shortly after that I was taken with the same complaint, affecting my limbs and hips, so I just tried the same medicine with the same result. My wife and children take Hood's Sarsaparilla whenever they feel the need of a medicine and it immediately makes them feel better.

Hood's Sarsaparilla
Saves me doctor's bills. I am an engineer, and well known in this locality. Q. W. WYATT, White Head Hill, Indian Ter.

Hood's Pills easy to buy, easy to take, easy in effect. 25c.

NEW YORK FASHIONS.

NEW STYLES FROM PARIS THAT WILL SOON BECOME POPULAR.

Pattern Waists For Autumn—Bulgarian Embroidery to Be Used Extensively—An Attractive Costume For a Garden Party. Some Novelties For Next Winter.

Today I saw some new pattern dresses and waists just arriving from Paris and the styles they show will be landing ones the coming season. At the first glance I saw but little difference from those of the present moment, but after awhile it dawned upon me that there is considerable difference and that as the season progresses to

SOME NEW GOWNS.

ward winter they will become more marked and distinct. The new loose waists have the bishop sleeves drooping from the shoulder and having cuffs deep or narrow as one may prefer.

Some of the new separate waists cost \$15 and \$20, and yet they appear extremely simple. One was made of fine white material and embroidered by hand in Bulgarian stitch in dull blue and red washable colors. One wide band was worked around the middle of the sleeves. The cuffs were covered with it, and so was the collar. Two narrow rows were worked down each side of the front. Across the upper part of the bust were cords and silver buttons.

I mention this in detail because this Bulgarian embroidery is going to be seen on everything where it is possible to put it, even on black woolen goods where the surface is smooth. To make it one must get some loose meshed canvas and baste it to the goods or garment and work the stitches through both. When it is all done, the canvas threads are to be pulled out, and this leaves the pattern directly on the goods or the made up garment. This is work that cannot be done by machine, and therefore it will never be common or cheap.

There are new silks in some of these new pattern waists copied after old, old time goods, mostly patterns of printed delaines. The mingling of colors is very artistic, but the patterns themselves are superlatively ugly. There was one pattern waisted plaited from the shoulder and tucked up at the bottom in a slight blouse effect. There were a draped belt and a stock collar of the material, with a soft bow at the back of the neck. Down the front and on the shoulders were straps of black velvet ribbon, held by silver frosted buttons. This is calculated for the young ladies, though the same form has been exactly followed in dark purple and heliotrope pinks de sole and satin dresses for more elderly persons.

It is certain that the "waist" has another winter before it. I saw a delicate shrimp pink and moss green striped taffeta waist in blouse fashion, with six stripes of moss green taffeta each edged with narrow butter colored lace. These were brought down the front. There was a square collar of the moss green silk, edged with lace. Frosted silver buttons fastened the front. The belt was made like the stripes. The sleeves had cuffs of the green, with square pointed chateleine cuffs falling over the hand. These, also, were edged with plait val in butter color.

There was among these new gowns a suit of brilliant lilac rough crepon. The skirt was plain. The waist and sleeves were of green surah, just the color of lilac leaves. Over the shoulders was an immense pelerine of yellow point de venise. Down the front of the waist there was a double jabot of lilac silk mull, and there was a fancy sash bow of green.

The importer told me that these were too cool and comfortable to give up while hot weather lasted. She also thinks that there will be considerable of the deep crinkle crepon worn the coming season, though it will not take rank as a high novelty. There are some new ideas in these crepons now being wrought out, and one will be those with loops of wool thrown up on the surface of the upper crinkle. That will bring it in the limit of the new frise fashions, which will be seen on almost everything in wool and mixtures.

There was a costume complete for a garden party, which I will describe, partly for its own beauty and partly because the general style will be reproduced immediately for many handsome fall dresses. One is to be made to order in shades of rose and purple, with black lace trimmings. This is of a delicate salmon pink taffeta with cream shades. The skirt is full all around, though cut with fine gores. The gores are not very sharp, and that leaves ample

plaits at the waist line all the way around. Between these clusters there are double

EARLY FALL COSTUMES FOR THE YOUNG.

edged insertions of butter colored point de gaze laid on flat from the waist to the bottom. On the long, drooping bishop sleeves the goods are particularly effective and two on the waist from the shoulders down. There is a strap on each shoulder, and the waist is gathered to this. On the shoulders and down the center of the front is a gathered ruffle made of the same lace, the points giving it a very light and pleasing effect. A tiny cope of the same

pretty silk edged with a full ruff of the lace accompanies this costume. At the waist and neck are dresden pink ribbons, ending in bows with short ends. As the dress is seen in several of the samples of next season's goods. Particularly effective and pretty it is in all silks and in the delicate crepe de chine. This, with quaker drab, will be the favorite for those whose tastes are truly refined.

There is one thing not to be forgotten, and that is over half the new skirts are to be draped, plaited or paneled. This breaks the awful monotony of the plain skirts so long the fashion. Some of the heaviest of the tufted wools will open in slashes over an underskirt of silk of the same or some other color. The plainer goods will have slashes with the edges embroidered or wrought with fine jet beads. By the way, we are told that there will be an unusual quantity of fine cut jet fibers worn on mantles and capes and elegant indoor gowns. Hungarian point is to be another favorite trimming for gowns and other garments. This resembles Bulgarian work to a certain extent, but it is in more subdued coloring. It is always hand wrought and made on canvas.

Indigo blue in several shades is seen in the new wools, and also in silks. There is a softness about indigo blue that is not seen in any of the other blues, and it blends better with other colors. Indigo blue and white make a stylish combination and one likely to obtain much favor this fall, both for grown people and young ones. There was a frock for a girl of 13 which will illustrate the point. The dress was in Hubbard shape and made of indigo mohair. The yoke was of white serge. It was cut to form two points in front, and these were edged with narrow black braid, forming a trefoll loop above each point. The upper portions of the sleeves were white and the middie blue. This, with a white sailor hat, makes an ideal school costume. Beef blood red is also among the colors set forth for the young for fall and winter. One handsome pattern gown for a girl of 14 was of blood red, with broken spots of seal brown all over it. Other patterns had red or white and blue spots, as well as diamonds, clubs and spades done in black. The material is cashmere or wool delaine. Sometimes the pattern is printed and sometimes it is raised tufts.

One gown made of this material is brown and red had a plain gathered skirt. The waist was made with a yoke. There was a laces belt of white grosgrain ribbon with two rows in front, from which depended two lengths of the ribbon, ending under double bows. It is a simple but very effective decoration. For a young lady of 16 there was very neat and charming suit of quaker drab serge. The skirt was laid in box plaits and held closely fitting the hips all around to a distance of about 18 inches, when they were fastened with strong "arrowheads." The rest was left to hang at will. The waist was short and open down the front to simulate an Eton jacket. It was cut square across the shoulders. There were revers of the serge, set with white bone buttons richly carved. The whole front and shoulders were made of white china silk.

Jinks—Hello, old fellow! Where are you living now? On the Hudson somewhere, I believe!
Blinks—No. On my wife's money.
—Pittsburgh Bulletin.

SLEEPY, DULL,

languid and morose, in the way you feel when your liver fails to do its work properly; in consequence you suffer from indigestion, dizziness, and dyspepsia. You have a "don't care" spirit and a "played out" feeling, and everything tires you.

To set the liver in action, purify and enrich the blood, and to strengthen and vitalize the whole system, take Dr. Pierce's Golden Medical Discovery. Having a peculiar tonic effect upon the living membrane of the stomach and bowels, it makes a lasting cure of all stomach, liver and bowel disorders. By increasing the blood supply, as well as enriching it, all the organs of the body are strengthened, and the nerves are fed on pure, rich blood.

Neuralgia is the "cry of the starved nerves for food"; nervous debility and exhaustion, sleeplessness and nervous prostration are in most instances the direct result of a starved condition of the blood. The true way to cure these ailments permanently is to take the "Golden Medical Discovery," which was discovered and prescribed by an eminent physician, Dr. R. V. Pierce, at present chief consulting physician and specialist to the Invalids' Hotel and Surgical Institute, Buffalo, N. Y. If you want a medical opinion on your case, write him. It will cost you nothing.

A Book of 135 pages on "Diseases of the Digestive Organs," will be mailed to any address on receipt of postage, six cents. It contains names, addresses and reproduced photographs of a vast number of people who have been cured of dyspepsia, liver complaint, chronic diarrhoea, and kindred ailments by the use of "Golden Medical Discovery."

"LIVER COMPLAINT."
Climax, Kalamazoo Co., Mich.
Dear Sir—A few of my symptoms were heart-burn and fullness after eating; sometimes pain in my bowels and bad taste in my mouth; sometimes I was severely with hot flashes over skin. After taking your "Golden Medical Discovery" I was relieved of all these symptoms and I feel perfectly well. Yours truly,
A. Charles Book

What is CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrup, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria.
"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."
Dr. J. P. CROOKER,
Lowell, Mass.

Castoria.
"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup, and other hurtful agents down their throats, thereby sending them to premature graves."
DR. J. P. CROOKER,
Conway, Ark.

Castoria.
"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."
H. A. ANCKER, M. D.,
111 So. Oxford St., Brooklyn, N. Y.

Castoria.
"Our physicians in the children's department, have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."
