Weekly, One Year \$1.00, in Advance

THE EDITORIAL EXTREMES.

At the head of the editorial page of the Oregonian under date of November 18th the following appeared as a part of the first column leader of that "ancient and honorable" publication:

"A bad actor, a briefless lawyer, an incompetent editor, a scold, a man for revenue only, a coiner of sounding words and tinkling phrases, this is the democratic offering for the presidency."

"It is a forlorn outlook, but it is, apparently, hopeless of amendment."

If the contents of this argument be true, the leader of the Democratic party is a "Junius" and the leader of the Republican party a "moral imbecile."

The JOURNAL did not support the McKinley ticket in 1896. It is opposed to the Mark Hanna methods, whether in city, county, state or nation. But the above is unfair to Mr. Bryan and unjust to President McKinley. As for the former he is able to take care of himself. Alone and single-handed he is able to take care of himself as is no other one individual public man in the nation. His campaign in Ohio, loaded down as he was with a divided Democracy, and against a campaign fund gathered from all the federal office-holders in the nation, even to the contributions of Oregon country postmasters, was so able and vigorous that it has put the president's state in the doubtful column, and has compelled the announcement that Mark Hanna will not be in charge of the next national campaign.

McKinley's first cabinet was chosen with no expectation of having to conduct a foreign war, or else it had been composed of different material. As it was McKinley did just what any man must do who accepts a party nomination—he chose his advisers from among those who brought about his nomination and election. That explains Algeciras and all the scandals he has suffered from.

McKinley's present cabinet seems to be a strong able harmonious body of men. They are conducting important public affairs with safety, dispatch and success. If they bring the war in the Philippines to a conclusion that commends itself to the patriotic impulses and commercial interests of our country, and substitute a good civil government for Spanish despotism and misrule in all the islands that have fallen under American control—what more can any reasonable man demand?

McKinley is not a saint or a reformer. His high tariff system will break down with the vicious fallacy of Repub-

canism that it is the mission of a political party to produce individual prosperity. Mark Hanna and the political partnership with trusts and syndicates will be rejected by the better sentiment of the entire American people. But the editorial extremist who can see nothing good or beneficial in the McKinley administration is altogether blind.

To Cure a Cold in One Day

Take Laetoxic Bromo Quinine Tablets. All costs refund the money if it fails to cure E. W. Groves' signature is on each box.

PEOPLES' MESSAGE.

Continued from First Page.

try estimates that the receipts for the current fiscal year will aggregate \$640,958,112, and upon the basis of present appropriations the expenditures will aggregate \$600,958,112, leaving a surplus of \$40,000,000. Increased activity in industry calls for a larger volume of money supply.

Banking.

In its earlier history the National banking act seemed to prove a reasonable avenue through which needful additions to the circulation could from time to time be made. Changing conditions have apparently rendered it now inoperative to that end. The high margin in bond securities required, resulting from the large premiums which government bonds command in the market, or the tax on note issues, or both operating together, appear to be the influences which impair its public safety.

The attention of congress is invited to this matter with a view of ascertaining whether or not such reasonable modifications can be made in the National banking act as will render its service in the particulars here referred to more responsive to the people's needs. I again urge that the National banks be authorized to organize with a capital of \$25,000.

Money Standard.

I urgently recommend that to support the existing gold standard and to maintain the parity in value of the coins of the two metals (GOLD AND SILVER) and the equal power of every dollar at all times in the market and in the payment of debts the secretary of the treasury be given additional power and charged with the duty to sell bonds and to employ such other effective means as may be necessary to these ends. The authority should include the power to sell bonds on long and short time, as conditions may require, and should provide for a rate of interest lower than that fixed by the act of January 14, 1875.

While there is now no commercial flight which withdraws gold from the government, but on the contrary such wide-spread confidence that gold seeks the treasury, demanding paper and charged with the duty to sell bonds and to employ such other effective means as may be necessary to these ends. The authority should include the power to sell bonds on long and short time, as conditions may require, and should provide for a rate of interest lower than that fixed by the act of January 14, 1875.

Quotes Cleveland.

Continuing President McKinley says: The message quotes from President Cleveland's message, of December, 1886, which says: "Even though it may be found that federal authority is not broad enough to fully reach the case there can be no doubt of the power of the several states to act effectively in the premises, and there should be no reason to doubt their willingness to judiciously exercise such power."

State Control Facts.

Continuing President McKinley says: The state legislation to which President Cleveland looked for relief from the evils of trusts has failed to accomplish fully that object. This is probably due to a great extent to the fact that different views as to the proper way to discriminate between evil and injurious combinations and those associations which are beneficial and necessary to the business prosperity of the country. It is apparent that uniformity of legislation upon this subject in the several states is much to be desired.

Nicaragua Canal.

The reasons presented a year ago for the early construction of the Nicaragua canal, say the message, are even stronger now.

Foreign Relations.

Referring to our relations with foreign governments the message says: "Our relations with Germany continue to be most cordial. Apart from the questions growing out of the Alaska boundary, the most friendly disposition and ready agreement have marked the discussion of the numerous matters arising in the VAST AND INTIMATE intercourse of the U. S. with Great Britain.

South African War.

This government has maintained an attitude of neutrality in the unfortunate contest between Great Britain and the Boer states of Africa. Had circumstances suggested that the party to the quarrel would have welcomed any kind expression of the hope of the American people that the war might be averted good offices would have been gladly rendered.

Trans-Pacific Cable.

The President strongly recommends the construction of a cable to the Phil-

ippines. Continuing he says: Freedom for Cuba.

By a joint resolution adopted by congress on the 19th of April 1, 1898 the U. S. disclaimed any disposition or intention to exercise sovereignty, jurisdiction or control over Cuba, except for the pacification thereof and asserted its determination when that was accomplished to leave the government and control of the island to its people. Protection of the national forests inaugurated by the department of the interior in 1897 has been continued during the past year and much has been accomplished in the way of preventing forest fires and the protection of the timber. There are now large tracts covered by forest which will eventually be reserved and set apart for forest uses. Until that can be done congress should increase the appropriations for the work of protecting the forests.

The Indians.

The Dawes commission reports that gratifying progress has been made in its work during the preceding year. The field work of enrollment of four of the nations has been completed. I recommend that congress at an early day make liberal appropriation for educational purposes in the Indian territory.

Census of 1900.

In accordance with the act of congress approved March 3, 1899, the preliminary work in connection with the twelfth census is now fully under way. The officers required for the proper administration of the duties imposed have been selected. The provision for securing a proper enumeration of the population as well as to secure evidence of the industrial growth of the nation is broader and more comprehensive than any similar legislation in the past. The director advises that every effort is being made to push this great work to completion in the time limited by the statute. It is believed that the twelfth census will emphasize our remarkable advance in all that pertains to national progress.

Continued on Third Page.

Dr. Bull's Cough Syrup is still in the lead. The people seem to like it this old reliable cough medicine, and we don't blame them; it is the best remedy for a deep-seated cough or cold, and will effect a cure in one day.

Continued on Third Page.

Mrs. R. Churchill, Berlin, Vt., says, "Our baby was covered with running sores. Dr. W.L.'s Witch Hazel Salve cured her." Beware of worthless counterfeits. Stones Drug Stores.
