

A WAIF OF THE OCEAN

Ten Year old Spanish Boy in an Open Boat ten days

Had Neither Food nor Water During That Time --- is Almost a Skeleton but will Survive

New York, Aug. 13.—On board the Morgan line steamer, which arrived from Galveston today, is a tiny Spanish boy, picked up at sea, after floating many days in an open boat without food or water. He is about 10 years old, nude, helpless and much exhausted. He, with two others, were fishing outside the harbor of Havana, when the boat broke adrift, and his companions swam ashore, and he, being unable to swim, remained. He was adrift five days he remembers, but the captain says it was impossible for the boat to drift so far in five days, as it was 536 miles from Havana. He thinks the boy was adrift at least 10 days without food or water. The boy was too feeble to talk, being not much more than a skeleton. His skin peeled off, and salt water boils covered his limbs; he will survive.

the lower court. It was the most famous murder trial in the history of the state. Mortensen was a Sunday school superintendent, and a prominent building contractor.

Washington, Aug. 13.—The state department has not been officially informed of the Silver Spray affair, and declines to make any statement. RUIN IN ITS WAKE

Damage by Jamaica Hurricane Will Reach Ten Million.

Banana Plantations Ruined, Villages Swept Away, Many Lives Lost and Vessels Wrecked.

Kingston, Jamaica, Aug. 12.—The effect of the hurricane upon the Island of Jamaica was greater than at first believed. The property loss is estimated at \$10,000,000.

Port Antonio, on the north coast, was completely overwhelmed. Only six houses were left standing there. The United Fruit Company's wharves, offices, hotel and plantations were utterly demolished. Five of the company's steamers, including the Simon Duncans, Alfred Dumois and Brighton, were driven ashore, but are lying in easy positions. Port Maria, another town on the north coast, also suffered similarly. The coast is strewn with wreckage of local sailing vessels.

It is feared that the loss of life has been heavy, 30 fatalities having already been reported, principally among seamen.

Villages Are Wiped Out.

The entire eastern end of the island has been entirely devastated. Villages have been wiped out, and public buildings and churches destroyed. Thousands of the peasantry were rendered homeless and destitute, and are wandering about seeking food and shelter.

The destruction of the banana plantations has been complete, and the fruit trade is paralyzed for the next 12 months. Hundreds of prosperous fruitgrowers have been brought to bankruptcy and ruin.

The western end of the island, which it was at first supposed had escaped, also suffered considerably. New banana plantations planted there were partially destroyed, and the orange and coffee crops were also injured.

Renewal of the Storm Feared.

The Norwegian steamer Salvatore di Gorgy was driven ashore at Annotta Bay, and lies in a dangerous position. Several sailing vessels were wrecked on the north side. It is still stormy and threatening, and there are fears that there may be a renewal of the storm. Thousands of houses in Kingston were damaged, the wharves were battered and several coasting vessels were sunk in the harbor. Trade is practically at a standstill.

The southeastern portion of the island has been practically denuded of its crops, the rivers are flooding, and many men were carried out to sea and drowned. Considering the damage to property during the hurricane, the loss of life was comparatively small, though the present estimate is that the death list will reach 50. Hundreds of persons were injured, and there were numerous hairbreadth escapes.

PARRY BREAKS LOOSE

He is the Avatar of the Anarchy of Great Wealth.

At the Same Time Condemns Labor for Following the Example Set by His Class.

Chautauqua, N. Y., Aug. 13.—D. M. Parry, president of the National Association of Manufacturers, today made an address before the conference on "Mob Spirit in America," in which he again bitterly assailed organized labor. He said in this country in past years there has been mobs of different kinds, but the most dangerous of all is the mob of organized labor. No man can object to any kind of association of labor, or other organizations, for lawful and beneficent purposes, but organized labor, as conducted today, stands convicted by its own leaders as a lawless organization. It seeks by physical force to override individual rights, is continually railing against the laws, denouncing the courts and public officials, and fulfills all the requirements of the definition of mobocracy. Unlike lynching bees, it is a vigilance committee and a standing mob, under fair discipline by its officers, and ready upon occasion to commit overt acts of outrage and destruction, which are the true outward manifestations of mob spirit. It declares, in effect, its will is superior to customs, traditions, government regulations, and even the constitution of the country. It asserts the individual has no inherent rights that cannot be taken from him, and, therefore, has a right to say no man shall work, no industry run without his consent. In its attempt to compel recognition of its pretensions, organized labor relies not on reason, but upon coercion, intimidation and the bludgeon. In its continual impeachments against the law, constant appeals to the baser passions, it is doing more than any other agency to incite mob spirit, and encourage unfurling the red flag of anarchy. After quoting different utterances of labor leaders, and criticizing, he continued: "The nation has lost millions of dollars by organized idleness, and the workmen pay millions to agitators, who give them nothing but trouble in return."

Apples, prunes and pears will be an excellent crop this year, but the apple crop will not be quite as large as it was last season.

Harry Day attended Tuslath Academy at the last term, and was very popular with his teachers and fellow students.

Say the Claims are all Right

Oregon City, Or., Aug. 13.—A company of prospectors, consisting of C. W. Kelly, Linwood Jones, John Heurth and Frank Welsh, returned last night from the north forks of the Molalla, where for several days they have been investigating the recently discovered gold mining prospects. They are enthusiastic with the prospects of this section, which they think will justify the excitement that has followed the disclosures of the past week, so far as rich gold deposits are concerned.

The members of the party staked out individual claims on lands adjoining those held by the Fairclough Bros., of this city, where the gold discovery was made a fortnight ago. The excitement incident to the discovery and investigation of the property continues unabated, and many goldseekers are making for that section of the county. Ogle creek, a tributary of the Molalla river, 55 miles from this city, is the scene of the excitement.

Fairclough Bros., of this city and the Portland people, who have an interest in the most promising claims, are considering plans for the most thorough prospecting and developing of their properties.

ABOUT OPEN DOOR

Thinks America Inconsistent in Her Position.

Wants Manchuria open but Closes the Philippines Sauce for Goose and Gander Both

St. Petersburg, Aug. 13.—An ukase just signed by the Czar provides that the Amur districts in Siberia, and the Kwang Tung territory in China, be formed under a special vice-royalty, the viceroy to have supreme civil authority. A Novovremya editorial today on the attitude of America toward Russia relative to the opening of the ports of Manchuria says, that whereas Russia has been accustomed to regard England as her permanent enemy, the situation is now changed, England having been replaced by America, and Germany. The Americans can't see why the open door rule should not apply to the Philippines as well as to Manchuria. America is now guided solely by the commercial instinct, hides behind England and Japan, which she is pushing on, and England with fatal foolishness, does young America's work, as she did that of Germany in the Venezuelan affair. Admiral Alexiff has been appointed viceroy, with supreme power over the army and navy, and to conduct diplomatic relations with neighboring states.
