

Fire dept. offers Halloween safety tips

Children dressed in costumes excitedly running door to door to trick-or-treat, festive decorations like glowing jack-o-lanterns, paper ghosts and dried cornstalks adorning front porches — these are some of the classic hallmarks of Halloween that make the holiday special.

Unfortunately, these Halloween symbols and activities can also present lurking fire risks — but by planning ahead, you can help make this Halloween a fire-safe one. Taking simple fire safety precautions like keeping decorations far away from open flames and using battery-operated candles or glow-sticks in jack-o-lanterns can help ensure your holiday remains festive and fun.

The Sisters Camp-Sherman Fire District wants to ensure that you and your children have a safe and Happy Halloween. Consider these tips from the National

Fire Protection Association:

- When choosing a costume, stay away from billowing or long trailing fabric. If you are making your own costume, choose material that won't easily ignite if it comes into contact with heat or flame. If your child is wearing a mask, make sure the eye holes are large enough so they can see out.

- Provide children with flashlights to carry for lighting, include glow sticks as part of their costume.

- Dried flowers, cornstalks, and crepe paper are highly flammable. Keep these and other decorations well away from all open flames and heat sources.

- It is safest to use a flashlight or battery-operated candles in a jack-o-lantern. If you use a real candle, use extreme caution. Make sure children are watched at all times when candles are lit. When lighting candles inside jack-o-lanterns,

use long matches or a utility lighter. Be sure to place lit pumpkins well away from anything that can burn and far out of the way of trick-or-treaters, steps, and walkways.

- Remember to keep exits clear of decorations, so nothing blocks escape routes.

- Tell children to stay away from open flames. Be sure they know how to stop, drop and roll if their clothing catches fire. (Have them practice stopping immediately, dropping to the ground, covering their face with hands, and rolling to put flames out.)

- Use flashlights as alternatives to candles or torch lights when decorating walkways and yards. They are much safer for trick-or-treaters, whose costumes may brush against the lighting.

- If your children are going to parties at others' homes, have them look for ways out of the home and plan how to get out in an emergency.

Homecoming royalty...
