Soil Restoration, LLC

Soil takes a beating from chemicals. Soil Restoration, LLC, a local manufacturer in Central Oregon for the past 12 years offers a complete product that will reverse the damage and restore soil so that it nourishes your plants.

A formula developed by Jim Roth 20 years ago features 30 different products in a special blend that provides everything a plant needs to thrive in a single product that offers a cost-effective way to treat everything from a garden plot to a pasture. Nutrients can be "tied up" by chemicals in the soil. Treatment with Soil Restoration's products improves bioavailability.

"We use aerobic bacteria — a special blend, which helps to eliminate chemicals," explains Jaken Bierman. "It's a complete product, which is

unusual."

Drainfield Restoration

It's a moment to dread: Your drainfield is failing. Replacing it and tearing up your yard is dauntingly expensive, running into the thousands of dollars. But what if you could restore your drainfield without replacing it?

Turn to Drainfield Restoration. As Central Oregon's only factory-trained Terralift operator, they can restore your drainfield for a fraction of the cost of replacement. Drainfield Restoration blasts air into the soil, breaking up biomat and compaction, restoring the soil's original leaching capacity. They can also jet inside lines and remove tree roots that are often the culprit in drainfield problems in Sisters Country.

It's a one-day project — and it works for years. In business since 1995, Drainfield Restoration

has saved clients thousands of dollars across the state of Oregon. For tips on restoration and care of your septic system, visit www.RestoreYourSeptic.com.
