The Pacific Peacemaker is a 54-foot steel ketch-rigged motor sailing ship and has travelled 11,000 miles in the last 6 months. The aim of this odyssey is a nuclear-free Pacific. In Australia, the boat was purchased and funded by selling shares for \$250 each. These original shareholders must be reimbursed by Nov. 1982, and therefore the Peacemaker Committee is seeking loans and funds to continue their travels. Please contact Chris Johnson (206) 324-2342 or rose MacHardy at (206) 328-2509.

Community Television

After almost four years of effort by hundreds of volunteers, Eugene now joins many other cities who have their own Public Access Television Channels. Public Access was born out of the concept that the airways belong to the public. And now, here in Eugene, at 326 W. 12th, we have a community studio (with minimal equipment, but more is coming) from which Cable Channel 11 is broadcasting locally made tapes, live programs, and some taped shows made in other studios.

Types of programs vary from **Nuclear Questions**, which covers energy and environmental issues, to **Television As Folk Art** featuring live acts, short tapes, and conversation.

Program highlights this coming week are **Lane County News** with Jerry Rust, **Naturesource**, a live interview with a local couple who produce alternative video games and **La Voz Hispanica**, a Spanish language news program.

What's Happening will publish the Public Access schedule weekly. The alternative programming on Channel 11 provides an exciting option for TV viewers in the community.

Regional Energy Planning

In December 1980 the U.S. Congress passed the Northwest Power Planning and Conservation Act which created an 8-member Power Planning Council to develop an energy plan for the region. The Council will release an initial draft of the plan very soon. If you want your ideas and opinions to be considered, try to attend both a panel discussion on Monday, October 4 and a workshop on Monday, October 11. The panel discussion will be held at 7:00 p.m. at Eugene City Council Chambers, 777 Pearl. The following week, the workshop will be at 7:00 p.m. at Roosevelt Junior High School, East 24th and Hilyard.

The panel discussion on the 4th is set up to give participants an overview of the issues; each panelist will present his view of regional conservation strategies; the public will then have input during a question-and-answer period. During the workshop session on the 11th, participants will meet in small groups to discuss the issues and suggest strategies for inclusion in the draft plan. Workshop results will be compiled, analyzed, and submitted to the Power Council. The Council urges you to attend both sessions. Notify Oregon Appropriate Technology office in Eugene at 683-1613 or Oregon Department of Energy (toll-free) at 1-800-452-7813 if you will be able to participate.

The Eugene meetings in October will be the last chance for citizens to voice their opinions before the draft plan is released for public review in January 1983. So get in your word on a regional energy plan for the Northwest.
