WHAT'S HAPPENING IN THE SKY

This issue inaugurates a new feature in *What's Happening* for 1983: **What's Happening in the Sky**. This weekly column will tell Eugene/Springfield residents what planets and stars they can see in the sky at night and will also present some interesting celestial tidbits for those who get hunger pangs while traveling through the galaxy. The column is written by Larry Deckman, a local inventor and celestial map maker.

This star map shows the stars visible above Spencer's Butte at 8 pm each night from Jan 13-20. This week high in the sky is Perseus, the Hero, with his arm outstretched. Down beneath his feet are the Pleiades, a bright star cluster. Look slightly farther down and you will find Taurus, the Bull. Incidentally, to really get the most out of this star map, use a dim flashlight or one with a red bulb. That way, you won't blind yourself to the stars above you.

Just after sunset, you should be able to see Venus as a bright white light in the southwest. Slightly to the left of Venus will be red Mars. While not quite as bright as Venus, its color should give it away. For those with early jobs or a taste for sunrise, Jupiter can be seen as a very bright white point (much brighter than any star in the sky) in the southeast before dawn. Saturn will also be visible in the early twilight hours, rising at about 2 am each morning this week. It is a bright yellowish planet that can be seen above Spencer's Butte at about 6:30 am. Try to peek at it with a telescope; you'll be amazed! As to the Moon, get set for a beautiful sight on Saturday the 15th at sunset. At that time it should be visible (weather permitting) just above Venus.

This week's celestial eye-opener (taken from the book, *Other Worlds Than Ours*):

"Small bodies from outer space entering the Earth's atmosphere usually become incandescent 'shooting-stars,' and by far the greater number are completely converted to the finest ash—'star dust'—which floats down through the skies to the almost incredible extent of some 14,000 tons per day."

Glow-in-the-dark maps of the Heavens over Eugene/Springfield are now locally available. Forget the rain outside as you look above your bed each night and see the stars shine! The map also makes a "glowing" birthday or holiday gift. They can be purchased for \$7 from Larry Deckman at 2740 Monroe St. in Eugene. Call 343-7166.

Thursday 13

Workshops

Sufi Instruction, 302 Deady Hall, UO, near 13th & Kincaid, 7 pm, free. Call 343-2491 for information.
