

Astrologically Speaking: Pisces

The Sun is in the sign of Pisces from February 20 until March 19. Pisces is the last sign of the zodiac. Because this is a time of completion, people often become melancholy and somber. Now we must confront alternative aspects of reality and find an internal peace which will sustain us until the emergence of Spring. Pisceans have a highly attuned emotional nature. Their sensitivity is often expressed through music, dance and the fine arts. Illusion and vision unite here to express the principles of compassion and spirituality. Through the essence of Pisces we learn acceptance of our imperfections and through their acceptance behold their metamorphosis. The intuitive hidden and secluded areas of the mind are the realm of Pisces. During this month explore these areas in yourself, retreat inward and contemplate your purpose. We have the choice to be either overwhelmed by negativity or released from it.

The sign Pisces is ruled by the planet Neptune. Neptune symbolizes imagination, illusion, vagueness, receptivity and all areas of consciousness expansion. During the next two years Neptune completes its transit through the sign of Sagittarius. The world has been experiencing the dissolution of religious and philosophical systems. While many belief structures are crumbling, reformation is possible. Through the creative inspiration of Neptune those teachings involving personal growth on an inner level are most beneficial. Sagittarians and Pisceans are ending their crises of consciousness. Neptune brings us into contact with the unknown and is experienced through prayer, meditation, dreams and less appropriately through drugs and alcohol. By accepting the energy of Neptune we may discover our connection with the universe and expand our thought to bring about world peace.

An astrological interpretation of an individual examines in depth each symbol in the birth chart. This column is merely an introduction into Astrology. In order to have a more complete understanding of the month ahead, read the sections for your Sun, Moon and Ascendant signs. These forecasts are in effect from February 20 until March 19.

Aries: Retreat from the world. Learn to meditate or get reborn. Calm down, breathe and prepare for your birthday.

Taurus: Almost any organization would appreciate your down-to-earth practicality. Spend some time with your friends and offer valuable solutions. Make a wish!

Gemini: Keep looking for a career. People in authority are favorably inclined toward you, so send out your resume. Resist the temptation to spend all your time with your partner.

Cancer: Philosophical truths are revealed. Traveling is excellent so make the journey you've been contemplating. Cook some foreign food.

Leo: Take as many internal risks as possible. You are able to transform your power into success. Don't be surprised if someone offers to support you.

Virgo: Your partner begins to resemble your ideal. Become more public and you will be well received. Conquer your competition with your superior understanding of the facts.

Libra: Work, work, work. Learn a new technique. You are able to bring some innovative ideas to your job. Shatter your reputation for laxness.

Scorpio: Romance is in the air. Find something to create. This is your month for winning so place a bet on yourself or on a race horse.

Sagittarius: Expand your family to include the world. Your house probably seems too small so find something with lots of space. Check the plumbing and the roof before you move in.

Capricorn: Write a letter to the editor and express your opinion. Communications flow easily. Have an adventure—go for a long drive and leave your map at home.

Aquarius: Demonstrate your prosperity consciousness. Create financial security for yourself and others. Even your unorthodox ideas can make money now.

Pisces: Happy Solar Return! Since you understand this time of year so well, develop your initiative and set a good example. Your personality projects so perfectly that strangers say, "Haven't I seen you somewhere before?"
