**How to manage your business on \$1 a day.**  
One buck? Right. That's the purchase price of a typical Apple system (\$2,500) amortized over the normal depreciable life of a business machine.  
And for that meager sum, you'll be getting the talents of a manager, controller, accountant, secretary and much more. Without having to hire a computer programmer. Because there's more ready-to-use software for Apple than for any other system you can buy.  
If you'd like to manage on a \$1 a day, come in for a demonstration that's all business. It won't cost you a cent.
