

OUR BUDGET OF LORE

LOCAL AND OTHERWISE

Supervisor Peairs has sent us word that owing to lack of prospective attendance the institute which was scheduled for the Carlisle school this year has been cancelled.

On May 16 Supt. Wadsworth, Mr. Smith, Mr. Pugh and others went by auto to O. A. C., at Corvallis, to attend the military drill and inspection of cadets at that institution.

Mr. Adams of Siletz was a visitor at the school during commencement. During the past year four of his children attended school here and one of them, Russell, graduated last month.

In the early part of this month Miss Ruth Brewer graduated with honors at the Salem High School. Her career as a high school student was most creditable in every way and we are pleased to note her well-merited successes.

Among those whom we were very glad to see during our commencement was Robt. Service, of Astoria, Oregon. He is a graduate and a worthy one. At present he is engaged in salmon fishing near Astoria, with his father, and is getting along nicely.

Mrs. Redford has accepted a transfer to Warmspring, where she will hold a position as clerk—a position which she held here for a couple of years. A large circle of friends at Chemawa will always be pleased to learn of her success and happiness no matter where she may be.

About the first of June Reggie Downie left this office for Alaska. When last we heard of him he was in the vicinity of Wrangell, where he had employment in connection with the fishing industry. Reggie was one of our most capable printers and will make good anywhere.

This year the baccalaureate address to our graduating class was delivered by Dr. J. O. Hall of Willamette University. "The Great White Throne" was his topic and he handled it in a masterly way. Supt. Wadsworth was fortunate in securing so able a man to deliver our baccalaureate this year.

While primarily for the benefit of Indian service employes, the institutes to be held at the various Indian schools this summer are open to all without the service who may care to attend. The Oregon Agricultural College is co-operating with the government in connection with our institute this year and it is needless to state that a fine course of lectures will be delivered during the two weeks of the institute.
