## SATURDAY'S FOOTBALL GAME

The result of the football game last Saturday between Chemawa and Pacific University, at Forest Grove, showed a score of 6 to 0 in favor of the University, the only score being made in the first quarter by a long forward pass. This was the only gain made of any length by Pacific during the game and was made from a quick shift formation which baffled our boys the first time it was used. The same formation was tried several other times but resulted in a loss each time.

The Indian boys had the ball in Pacific's territory during nearly all the game and several times a touch-down seemed sure, but did not result owing to a fumble, or a man slipping down in the mud, as the game was played on a very muddy field in a stiff rain. There were no particular stars in the Indian team, but the team as a whole was in every play.

There was a very noticeable change for the better on the part of the team as a whole over that of the previous game. Chemawa gained about four times as much ground as Pacific and excelled in punting and returned punts. Altogether our team showed remarkable improvement and if it continues to improve the season will end with no further defeats.

## INSPECTION

General inspection of the boys' quarters on Sunday morning last by the Superintendent, Disciplinarian, and company officers, showed much care and thoroughness on the part of the boys. The halls and rooms in Mitchell Hall were almost in an immaculate condition. With the exception of a few minor items there were no criticisms; to the contrary, there was room for much commendation. It would be difficult to select from the many rooms the one best kept.

Brewer Hall with its 175 boys is a difficult building to maintain, but in passing through the many well-kept rooms with each boy standing by his bed, spick and span in his uniform, and apparently anxious that nothing be found amiss, was a pleasing sight.

Then, too, the 85 boys in the Small Boys' Building,

who had made such satisfactory endeavor to have their quarters present a good appearance, were not behind in showing a well-kept building. With the beds spotlessly white, without a rumple, and every boy standing at attention, with their rooms generally clean and neat, proved that our boys do not lack interest or ability. Mrs. Loos, matron of Mitchell Hall, Mrs. Doherty of Brewer Hall, and Miss Scholder of the Small Boys' Building, are the guiding hands. Next Sunday the girls' quarters will be inspected. Sunday inspections commence at nine o'clock.

## INDUSTRIAL NOTES

Retha Carson, in the Intermediate Sewing Department, has been making house dresses and is doing exceptionally well. Agrafina Fratis is doing good work on hospital aprons.

John Murray, Blake Cuthbert, Perry Whipple, Lycondra Squartzoff, Albert Hays, Joseph Gale and Gabriel Anderson are taking a great interest in engineering and Mr. Blessing speaks highly of their work in that department.

It would be hard to find nicer kept rooms than those of Henry Campbell, Lawrence Frazier, Edward Gilbeau, Andrew White, Gabriel Anderson and Blake Cuthbert. All the rooms in Mitchell Hall are well kept, but these boys deserve special mention.

Peter Dick, Alex Beyer, vocational carpenters; Kelley Shaw, Lester Mack, Percy Minesinger, Lawrence Taylor, pre-vocational, are those of the carpenter detail who are working on Superintendent Hall's garage. The sashes are being made in the carpenter shop.

It was especially pleasing to witness a dozen or so girls in the school kitchen last Friday gathered around a table, each with a note book making memoranda of an interesting lecture being given by Mrs. Brewer on a home-made fireless cooker, a sample of which was in evidence. Rarely has the American reporter witnessed a class showing more interest or a more practical lesson given.

The first, second and third year vocational domestic science girls have had very interesting instructions for the past week under Miss Taylor. The third year girls have continued their study of food, use of sugar and testing for pectin. The second year girls have been having lectures on gelatines and the first year girls on ices, ice substitutes and beverages. Each class has prepared and served a three-course luncheon.

May Filesteel returned to Chemawa this week from Ft. Belknap Agency, Montana, bringing Katherine Matte and Cecelia Hawley, two new girls, with her.
