

**PUPILS' ITEMS**

The farmers unloaded four cars of gravel and one carload of sand last week.

The first year engineering boys are having splendid lessons on safety valves.

Cereals and their food values have been studied recently by the first year domestic science girls.

The sewing-room girls are making blue uniform dresses, and also work dresses, for the small girls.

John Pablo, an old student who has been at his home in Idaho, has returned to school.

A card was received from an old student, Archie McDonald, who says he may be back in a few days.

The spraying of fruit trees is a study that is at present holding the attention of the horticultural boys.

The gardeners are clearing a couple of acres of land near the hog lot. They are ploughing 15 acres more land.

Mr. and Mrs. Harry Wright of Klamath Reservation gave Elden Miller a surprise by calling on him this week.

Mr. Swoboda is much pleased with the work the boys in the shoe and harness-making department have been doing the past week.

The eighth and ninth grade girls of the domestic science department are studying the composition, structure, and uses of eggs.

The seventh grade class in English is preparing for a debate on the question, "Which is more beneficial, Academic or Industrial Training."

The boys of the blacksmithing department have just completed a spring seat and a bed for the garbage wagon this week, and are starting on a new set of wheels.

The eighth grade class is about to finish the study of United States history and will soon be given an examination in history. Mr. Hammond is to furnish the questions.

Albert Courville and Peter Ogden are trying to complete the plowing of the large field back of the laundry this week. They are showing commendable interest in their vocation.

The three companies of Winona Hall girls are competing for a prize in the matter of line-up. Competition is to continue until February, and the successful company will be privileged to have a party.

The engineering department has an 8-horse power boiler for heating the oil so that it can be pumped to the new concrete oil tank. The boiler has almost paid for itself already, because after 48 hours the railroad company charges \$5.00 per day for car demurrage, and with the new boiler the car can be pumped empty of oil in less than eight hours.

**MAN WANTED**

The Indian Leader contains an article showing the qualifications of two men who wish a job, which we reproduce:

**Mr. A's Qualifications:**

Drinks smokes, and chews.

Was a deserter from school.

Swears and tells vile stories.

Will not work steadily.

Complains of being sick frequently.

Keeps irregular hours and loafs about pool halls, saloons, and other hangouts.

Never has \$2 long enough for them to get acquainted.

Never earned much; never saved any.

**Mr. B's Qualifications:**

Signed a temperance pledge and is keeping it; likewise he has cut out tobacco and is using the money to buy books and papers.

His school record was good.

His language is clean.

He will work without a boss over him.

Is seldom sick.

His hours are regular and he takes care of himself.

He has a bank account and he is adding a part of what he earns from time to time.

Earning power increasing.

**WHO WILL GET THE JOB?**

**AN EARLY-DAY TEAM**

Charles Parker, a recent visitor at the school, was a member of Chemawa's first baseball team. He states that the team was organized in 1885, and gives the names of its various members as follows:

Frank Carson	-	-	-	-	-	Captain and short stop
Carl Spencer	-	-	-	-	-	Catcher
Caleb Charles	-	-	-	-	-	1st base
Pangor Long	-	-	-	-	-	2d base
Jacob Norman	-	-	-	-	-	3d base
Charles Parker	-	-	-	-	-	Outfield
Walter Kennedy	-	-	-	-	-	Outfield
Jack Allen	-	-	-	-	-	Outfield

The above players cleared the ball field.

Russell Adams is busy in his spare time making crutches. He is making one pair for Logan Fann another pair for Thomas Bull in Sight.

Edward Gilbeau and Logan Fann, vocational boys in the tailoring department, are busy working on civilian suits. They do very creditable work.
