

**REPORTER'S NOTES**

By Robert Downie

Chemawa's baseball team has certainly made a fine showing this season, as all men are practically new. The team played six games; won three, lost two and tied one.

Mrs. Brewer purchased 75 baby chicks last week with funds received from the ice cream sale held recently. She is working hard in order to make up a large flock of chickens for the school ranch.

Irving Tom is kept busy after work hours each evening trimming up the rough spots on the race track and ball field. He does his work faithfully and does it well. The boys appreciate this interest.

Allan Shepard and Logan Fann, both of the class of '19, work hand in hand when there are banners to be made. Allan designs the banner at the printing office while Logan at the tailor shop puts it on cloth.

Word has been received from Martin Colby, one of our boys who enlisted and who is now in France in the Marine corps. He likes the country over there fine, but says it rains more there than it does in Oregon.

On Sunday, Mr. and Mrs. Henderson, trader at this school, left for Seaside, Oregon, where they will take a week's vacation. Mr. McLeod will be in charge of the store during his absence, with the help of the boys who now work there.

On Saturday our track team will journey to Salem and compete with the Willamette University team on the Willamette field. Our team is practically of all new men and they will need all the representatives from the school that can possibly attend to cheer them on.

The Commencement spirit is stirred up throughout the school and everyone is talking of the happenings to come. You will be kept on the tips of your toes from the time you get up on Sunday morning the 2d until Friday night the 7th if you attend all activities Commencement week.

The Brewer Hall ball team, which defeated the strong Mitchell Hall team some weeks ago, are now preparing for the commencement week game. The Brewer Hall boys defeated the Mitchell Hall boys in all lines of sport and they expect to do so again. Give your "rahs" for Brewer Hall.

The Junior Class was very much interested when Dr. Hailman, the medical supervisor, examined the eyes of the pupils in that class. After he would examine an eye he would give some medical term and then ask the class if the term was familiar. Having studied chemistry many of the terms were familiar and the class did not fail to let him know which ones.

Stanley Webster and William Weaver visited Chemawa and friends on Tuesday last. William is connected with the Merchants' Marine at Astoria, Oregon.

Rube Sanders, who has been out each evening with the track men, rounding them into shape will accompany the team to Salem Saturday. Rube is an ex-track man and has been drilling the boys on the fine points of the work.

Francis Boyce, William Johnson and Arthur Johnson are out each evening practicing faithfully on the track for the track meet to be held commencement week. These three boys will compete against each other and all seem to have an equal chance of winning. Do not miss the class day field sports, for there will be plenty of good live races.

**SENIOR NOTES**

Ed Gilbeau has the honor of standing at the head of the boys' division in the class.

Dr. Hailman, eye specialist, examined 463 pupils for eye troubles, but that with a little care all trouble would soon be cured. One pupil in our class had no symptoms of eye trouble.

The Seniors took their examinations last week finishing Friday. They are now working on their play and finishing their industrial work. Katherine Reed stands first in the class and Mamie Frisk second. The former is a nurse, the latter will graduate in home economics.

Alicia Kimball, who has been ill for the past few weeks, went home on Wednesday. Alicia stood second in the class in the academic department and no doubt would have retained the place if she had not become sick. It is hoped that she will speedily return next fall.

Here are a few questions taken at random from the final exam:

Why is farm labor so scarce and what would you suggest?

Place opposite the name of the insect a remedy:

- (a) Borer
- (b) Potato bug
- (c) Chinch bug
- (d) Codling moth

Mention ten of Benjamin Franklin's plans and achievements for the public good.

Plan a menu for one day for a family of five and estimate the cost.

Tell how to make a four-piece skirt.

Write a discussion of not less than 300 words—subject, "How to Deal with Fear."

Write a newspaper report of the "Bent-Loos Circus." Describe the preparation of a patient for a surgical operation.
