## BASKETBALL---CHEMAWA VS. SILVERTON

Probably as exciting a game of basketball was played in our gym on Monday night after study hour as is often witnessed. The contest was between Chemawa and Silverton with a large crowd of rooters accompanying the visiting team which, added to our student body and faculty, filled the balcony and stage in the gym to overflowing. The first part of the game was decidedly in favor of Silverton, with a score at the end of the first half of 18 to 6 in favor of the visitors. The last half, however, was a different story, when Chemawa made 22 points and Silverton 6, making a final score of 28 to 24 in favor of Chemawa.

During the first half our team did not seem to wake up, but Mr. Hauser's enthusiasm and personality, put the desired "pep" into the boys during the last half and they played a hard, fast, snappy game, with the opposing team extending themselves to the limit to hold their lead. It was only during the last minute or so of the game that Chemawa finally overcame Silverton's big lead. The Chemawa adherents went wild when our team began to pile up the baskets. It was a fine game to watch and aroused great enthusiasm. Our team is generally new material this year.

## Y. W. C. A. SOCIAL

The Y. W.s, assisted by Miss Eakin and Miss Judd, Christian workers, gave a most successful social on Thursday evening last and had as their guests the members of the Y. M. C. A. and several of the faculty. Various games and "stunts" followed close upon one-another in which everyone enthusiastically took part. It was a jolly evening throughout and everybody was happy. There was not one dull moment. The girls served refreshments during the evening. The time for departure came all too soon, each one declaring it was one of the most pleasant evenings spent for some time. Miss Eakin is fast winning her way into the hearts of Chemawa people and we predict much success for her in the religious work.

Mrs. Eaton and Mrs. Risser spent the week-end in Portland.

## LOCAL

Mr. Hobucket, our dairyman, reports that he is securing about 60 gallons of milk daily.

Miss Scholder and her small boys seldom receive an adverse inspection report, as every department is well kept.

Now that the sun is shining so brightly and the weather moderated our campus has again its brilliant coat of green.

The father of Catherine and Anita Reed visited the school on Sunday. Catherine and Anita accompanied him home to Coos Bay. Catherine returned yesterday.

The older students had a good time at the bimonthly social Saturday night. The Y. M. C. A. sold cake, coffee and snails to raise a little fund for association expenses.

Lumber is on the ground for construction of an implement house and work has been begun by the carpenter detail. It will be fitted for temporary use as a stable for our new horses.

Chemawa has a large lot of onions stored away, a greater quantity than can be used by the students. There are also more potatoes and carrots on hand than has been the case for a number of years.

Mr. Chapman, our new baker, has purchased a baking establishment at Dallas and will leave us on February first. He will be succeeded by Mr. William Mizner, a professional baker of Salem.

The students are enjoying the popcorn delivered to the various quarters. Home-made poppers are kept busy during spare moments. The writer has never seen finer popcorn than that raised the past season at Chemawa.

The Sigma Phi's are arranging for their annual social to be given on the first open date after the Excelsior entertainment and party, which is expected to be on February first. Next in order is the Seniors' annual party.

The weekly meeting of the Y. M. C. A. was held in the auditorium January 12th. After singing several songs, Paul Liphart told of the Y. M. C. A. work in the navy. Mr. Roberson also gave a little talk in closing. Several new members were taken into the association.

The digging of drainage trenches is being energetically pushed. Mr. Carrow and a force of boys are at work in the 30-acre lake track near the Pacific Highway this week. About fifteen acres of wet lake land have been grubbed and made ready for the plow and drainage laterals. It is expected to use wood drainage boxes.
