

**DOMESTIC ART NOTES**

Cecelia Ladderoute is our champion rug maker.

The girls of Winona Hall are to have white uniform skirts.

The high school girls spend Saturday mornings in the sewing room,

Esther Paul, a second year vocational, is tatting a beautiful luncheon set.

Rebecca Carpenter made the highest grade in the sewing test in October.

Jessie Cleveland is making a beautiful blue georgette smock for Mrs. Canfield.

Grace Johnson deserves special mention for her beautiful piece of tatted work.

The sewing room girls are making afternoon dresses for company C girls of Winona.

Sixty-eight skirts were made out of one hundred and six yards of midnight blue serge.

The sewing room girls are making some beautiful embroidered pillow cases for the guest rooms.

The sewing department made two beautiful pillow tops for the Winona Hall sitting room last week.

The construction dresses that were made last year have been given to the various girls who made them.

Mrs. Canfield gave an interesting and helpful talk to the first and second year vocationals on Home Economics.

Several rag rugs are being made in the prevocational sewing department. Some are made by braiding and some by crocheting.

The vocational girls of the Domestic Art Department have just finished making some utility caps and aprons for the girls who work in the Club.

The new seventh grade girls are taking up embroidery lessons and they are very much interested in the work. They have learned several new things under Mrs. Canfield.

The girls in the prevocational sewing class have spent a busy month providing two house dresses for each of the new girls, also in reconstructing the gray uniform skirts and many other things too numerous to mention.

**ITEMS FROM THE TRADES**

Mr. Bettles says he will soon have a herd of hogs to sell.

The dairy boys are hauling in corn for feed and expect to have several hundred bushels for both hogs and cattle.

The new machine shop will soon be ready for the floor and shingles. The shingles have been ordered for some time, but as yet have not arrived.

The blacksmiths are taking out the wood floor in the south end of their shop preparatory to putting in a cement floor. This will add greatly to the utility and appearance of this section of the shop.

The electrical forces of the engineering department have recently put up some much needed lights on the campus. No. 5 boiler has been out of service for the past few days, getting a bath and a rest. It will be going again in the near future.

The carpenters have been busy the past few days making the doors for the new machine shop. It is a pleasure to know that our carpenters can do work of this kind. It is excellent practice and gives actual work on which they have recently been studying.

The plumbers have their troubles, too. Three sewers were clogged in the same day recently, but the fact did not appear to disturb them as they went at the job with business-like precision and soon had everything going again. They say "it's all in the day's work."

Mr. Wallace Beebe and his detail of pleasant and active boys get a great deal of various kinds of materials moved with the trucks. Sometimes it is freight from the siding and sometimes it is beans from Salem, and again it is sand for sidewalks or cinders for repairing the roads. However, they always get it there, whatever it may be, usually it is in excellent order. They are a busy and happy crew, much in demand and safely relied upon.

The yard boys are glad the leaves are almost gone. They like the leaves best while they are on the trees. They have spaded the quarter of a mile of roses that are planted along various walks at Chemawa as well as mowing lawns and cleaning up leaves. Sometimes the boys of this detail feel rather discouraged at the daily task of cleaning up. They should remember that on them we depend for the appearance of our lawns and take a pardonable pride in the beautiful campus which is mentioned by so many of our visitors and passing motorists.

**DOMESTIC SCIENCE NOTES**

Ione Henry made the bread for the high school lunches last week.

The domestic science girls miss Ola Fairweather. She was a willing worker.

During our detail in the domestic science Elizabeth Churchill has completed four orderly uniforms.

The junior girls enjoyed the talk on "How to Gain the Standard Point" given by Mrs. Brickell recently.

On Wednesday evening last the senior girls served a dinner to the following: Superintendent and Mrs. Hall, Mrs. Sherman, Dr. Rowland and Miss Nellie, Mr. and Mrs. Iliff and Miss Ahrens. Opal Pearson, with the assistance of Beulah White, did the serving.
