

## LOCAL

It is now time for the little fellows to write their annual letter to Santa Claus.

Mr. Iliff spent a few days of last week in the Cottage Grove section inspecting lumber for shipment to various Indian schools.

A little sunshine makes all the world akin. "The world loves sunshine" observed Supt. Hall in chapel last Sunday evening.

Mr. Bent is taking active steps to reorganize and put new life into the band. Supt. Hall wishes the band kept up to a high standard of excellence and he is going to be behind Mr. Bent and the boys who love music.

During chapel last Sunday evening the orchestra played "La Paloma" by Yradier, Grace Peterson sang "I Heard You Go By" by Wood, the girls' octette sang "Pale in the Amber West" by Parks, Lydia Davis recited "Find the Favorite," the choir sang "Rejoice in the Lord" by Tussing, and Supt. Hall gave a talk of unusual value and interest. He spoke on subjects of fundamentally vital importance to all, such as politeness, appearance, and so forth, as valuable assets for all who would make a place in the world for themselves.

Twenty-five members of the Climbers' Club accompanied their basketball team to Salem last Saturday afternoon to see the game played against the eighth graders of the Parrish Junior High School. Though they lost, the Climbers came home in good spirits and still able to sing and yell. Two weeks ago the Climbers took the Parrishers to the cleaners by a 28 to 12 score. Tentative arrangements have been made to play off the tie sometime during the holidays. The Climbers have broken into the limelight on several occasions and we have always been proud of them for the gentlemanly way in which they have conducted themselves.

The repair work done on the athletic equipment by both the shoe shop and tailor shop forces amounts to a good deal in the course of a year. There is some part of our equipment in either of these two departments almost continually and we must say never has there been more to do nor has the work been done more satisfactorily and quickly than during the past season. Recently all of the football pants and shoes were washed and sent to these two shops for repairs before being laid away for the year. Needless to say the work done is excellent and saves the school many dollars, especially when shoes and pants are rebuilt to the extent that they are almost as good as new. At present basketball covers badly in need of fixing and the new basketball suits that have to be bettered and trimmed are in either of these two shops. Our hats are off to these departments.

## DOMESTIC ART NOTES

Day by day in every way we're progressing further and further. We have completed our gingham frocks and are now beginning our gray panama uniforms.

Donning our ginghams we stood in the middle of the floor while the class and our instructor gazed out of critical eyes. It was rather difficult to stand there and try to keep a look of intelligence on our faces.

What a relief! We've just passed through a trying ordeal. Not such a one as was experienced by the early Romans. Now can you guess what it was? If you can't we'll have to tell you. It was a test. Not a Senior fell below "G plus." What bright Seniors! Now don't go to Salem or any other distant town for your Christmas gifts. Just come up to the domestic art department, for we're going to have a bazaar within a few days.

As Chemawa goes so goes the Seniors. Adios.

THE DIGNIFIED SENIORS.

Yea, Bo! and we're here, too. Who? The Freshmen. Yes, we're here with all our "pep" and busy as can be sewing on our new gingham uniforms.

YE FRESHMEN.

The club girls are all wearing smiles. Why? Because Tuesday was pay day.

THE CLUB GIRLS.

## SENIOR NOTES

A letter was received from Charles Buchert, better known as "Jew," sending his best wishes to the Senior Class. He was married last summer and is living in Alaska. We are glad to hear from him.

Mrs. Palmer is taking her turn now as our Botany teacher. Some interesting discussions have come up concerning plants in ocean water, and in which some girls from Alaska and on the coast delight in reciting upon. We all enjoy our lessons and only hope that she will remain with our class.

Last Thursday morning we were favored with three very excellent lectures on health. Maybelle Bremner gave an illustrated talk on the care of the teeth, which was followed by an interesting lecture on the care of the eyes, by Marian Morgan. Anna Peratrovich gave a very interesting talk on "Care of the Throat."

Billie Williams, an ex-student of Chemawa, is now in training at Camp Lewis. He informs us that he was awarded a medal for expert shooting. This speaks well for Billie and we are sure that everybody who knows him will wish him well. He sent us some pictures of the Shenandoah taken while it was at Camp Lewis.

An unforeseen blunder was made in the Botany Class. The teacher asked what environment was? The hand of some bright Senior shot up. The teacher, pleased with the quick response, motioned him to recite. But her pleasure was short-lived for his answer was that the environment was a greenish scum on top of the water.
