

WHAT IS EDUCATION?

EDUCATION is that training which fits for the duties of life—♦♦♦all the duties♦♦♦development of mind and muscle, training for citizenship, for home-making, for parenthood, for social and economic duties.

Education is derived from all surroundings and experiences, and cannot be limited to any set term of years, nor any place nor system. It is a progression all through life.

Education has been defined in many ways according to the age and country in which the teacher lived; but when it is all summed up, we find that what people need is the kind of teaching which will make it possible for them to do their part in the world's work.
