We have a new globe in our school room. It hangs from the ceiling. It is a very good one.

Mrs. Middleton has a new clock on her desk.

We have twenty books from the Salem State Library in our room. We like to read them in our spare time.

We boys are glad to hear that Mr. VosBurgh is better and will soon be home.

Our class began the study of Asia this week. We found out by the globe that Asia stretches half way around the earth. And another thing we found out is that Indians came from that country to Alaska.

We hope we will have lots of eggs to eat on Easter Morning.

Last week our troop took a long walk with troop 2 instead of having a regular meeting.

One night we met in the gym and learned some new games.

#### ELECTRICIANS

The last project of the school year, wiring the root house, was completed during the week under the direction of Arnold McKay. This was a test and met all the requirements of high-grade work.

The remaining weeks will be given over to class conferences, special problems, and talks on the theory of electricity.

Engineering students worked faithfully and completed the spring cleaning of all boilers. They are now erecting a vertical steam engine and studying the functions of its various parts.

The home economics department is proud of the recognition given the senior high clothing instructor, Miss Lillian Black, by the merchants of Salem. Miss Black was the stylist at the Fashion Revue held at the Elsinore Theater on Friday night, March 11. Some fifty models took part, representing eight of the leading shops for both men and women. Everyone was well pleased with the revue.
